

Submitted Green Belt Sites									
There are a number of sites which have been assigned a Red/Amber RAG rating which will require additional information prior to allocation. A view will need to be taken by Wirral how to address these risks and the associated cost and timescale implications. The Environmental Constraints assessed by MEAS are Ecology, Archaeology, Land Contamination, Minerals and Waste. No consideration has been given to other environmental constraints e.g. Flood Risk Assessment.									
SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
511	SHLAA 0511 Raby Hall Autistic Centre, Raby	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
526	SHLAA 0526 Land at Upton Waste Water Treatment Works	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
537	SHLAA 0537 South off Park Lane, Meols	Red	Green	Amber	Amber	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non-breeding bird survey and PEA required to inform allocation of the site in the Local Plan.
538	SHLAA 0538 Land off Lingham Lane, Moreton	Red	Green	Amber	Green	Amber	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey and Phase I Desk Study required to inform allocation.
627	SHLAA 0627 East of George Road, Hoylake	Red	Green	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation. Land contamination issues to be addressed at the planning application stage.
632	SHLAA 0632 Thornton Hough WWTW, Raby Road	Green	Green	Amber	Green	Green	Amber	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
637	SHLAA 0637 North of Oakmere Close, Leasowe	Red	Green	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation. Land contamination issues to be addressed at the planning application stage.
638	SHLAA 0638 Garden Hey Nursery, Saughall Massie	Amber	Green - WI17-046	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and land contamination issues to be addressed at planning application stage.
639	SHLAA 0639 Rear of Meadowbrook Road Moreton	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
641	SHLAA 0641 North of White House, Broad Lane, Heswall	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non-breeding bird survey in order to inform allocation of the site in the Local Plan.
642	SHLAA 0642 North of Ferns Close, Heswall	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Range of ecological surveys would be required, including PEA and non-breeding bird survey in order to support allocation of site in Local Plan.
643	SHLAA 0643 West of Latchgate, Broad Lane, Heswall	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
644	SHLAA 0644 Rear of Sandymount, Broad Lane	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
648	SHLAA 0648 West of Raby Hall, Raby Mere	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
649	SHLAA 0649 Land East of Raby Hall, Raby Mere	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
650	SHLAA 0650 Opposite 192 to 204 Eastham Rake	Red	Green	Amber	Green	Amber	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
738	SHLAA 0738 Land at Bidston Station Approach	Red	Red	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - NVC botanical survey and breeding bird survey would be required to inform allocation of the site in Local Plan.

SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
740	SHLAA 0740 North of 137 Garden Hey Road, Saughall Massie	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
741	SHLAA 0741 South of 106 Garden Hey Road, Saughall Massie	Amber	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
742	SHLAA 0742 Opposite 5 to 27 Heron Road, Meols	Green	Amber	Green	Amber	Green	Amber	Environmental constraints. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes, clear understanding of long term proposals at Carr Lane required prior to allocation to ensure that any housing proposals do not sterilise any future minerals extraction. Archaeological issues dealt with at planning application stage.
856	Former SHLAA 0856 Landican Village, North of Landican Road	Green	Red	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology and land contamination issues to be addressed through the planning process.
858	Former SHLAA 0858 Rear of Hulme Cottages, Thornton Hough	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
860	SHLAA 0860 East of Hill Top Farm, Thornton Hough	Amber	Amber - WI17-089	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
861	SHLAA 0861 South of Home Farm, Landican	Green	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
862	SHLAA 0862 North of Green Bank, Brimstage	Green	Amber	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Archaeology, Ecology and land contamination issues to be addressed at planning application stage.
863	SHLAA 0863 Home Farm, Brimstage	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Archaeology, Ecology and land contamination issues to be addressed at planning application stage.
864	SHLAA 0864 South of Brook Cottage, Brimstage	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
865	SHLAA 0865 North and West of Clatterbridge Hospital	Amber	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
866	Former SHLAA 0866 West of Clatterbridge Waste Reception Centre, Mount Road	Green	Amber	Green	Green	Red	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Critical community waste infrastructure. Information would be required prior to allocation on proposed development to ensure compatibility. Ecology and archaeology issues to be addressed at planning application stage.
870	SHLAA 0870 Land at Bank Farm, Barnston Village	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
871	SHLAA 0871 North of Banager, Storeton Lane	Amber	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and land contamination issues to be addressed at planning application stage.
874	SHLAA 0874 Land at White House Farm, Raby	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
877	SHLAA 0877 North of Milner Road, Heswall	Green	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
878	SHLAA 0878 Bridges House Farm, Heswall	Green	Amber	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Archaeology and land contamination issues to be addressed at planning application stage.

SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
879	Former SHLAA 0879 East of Rigby Drive, Greasby	Amber	Red	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology and land contamination issues to be addressed through the planning process.
881	SHLAA 0881 West of Gills Lane Farm, Barnston	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
882	SHLAA 0882 East of Thorncroft Drive, Gills Lane, Barnston	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
883	SHLAA 0883 West of Thorncroft Drive, Gills Lane, Barnston	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
884	SHLAA 0884 Land East of Marfield Lane, Gills Lane, Barnston	Amber	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
891	SHLAA 0891 South of Pickmere Drive, Eastham	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
892	SHLAA 0892 East of Harrock Wood, Irby	Amber	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
895	SHLAA 0895 Rear of Irby Farm, Irby	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
896	SHLAA 0896 West of 52 to 54 Stanley Lane, Eastham	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
902	SHLAA 0902 South of Freshways, Boathouse Lane, Heswall	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
904	SHLAA 0904 Land at Birch Road/Rycroft Road, Meols	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
907	SHLAA 0907 East of 117 to 121 Pipers Lane, Heswall	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Range of ecological surveys would be required, including PEA and non-breeding bird survey in order to support allocation of site in Local Plan. Mitigation of recreational pressure would also need to consider increased recreational pressure within the adjacent WeBS Core Count Area.
918	SHLAA 0918 West of 94 Garden Hey Road, Saughall Massie	Amber	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
920	SHLAA 0920 West of Fender View Road, Moreton	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation.
921	SHLAA 0921 South of Fender Lane, Moreton	Red	Amber	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation.
922	SHLAA 0922 East of Bullrush Drive, Moreton	Red	Amber	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation. Archaeological issues to be addressed at the planning application stage.
923	SHLAA 0923 East of Claremont School, Fender Lane, Moreton	Red	Amber	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation. Archaeological issues to be addressed at the planning application stage.

SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
924	SHLAA 0924 North of Fender Lane, Moreton	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation.
925	SHLAA 0925 North of Diamond Farm, Saughall Massie	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
927	SHLAA 0927 East of 1 to 21 Newton Park Road, Frankby	Red	Green	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation.
928	SHLAA 0928 South of 218 Ferry Road, Eastham	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
929	SHLAA 0929 West of 15 Acres Road, Meols	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
930	SHLAA 0930 South of Kingsley Avenue, Eastham	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
931	SHLAA 0931 Opposite 124 and 126 Barnston Road, Thingwall	Green	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
932	SHLAA 0932 South of Crosshill Reservoir, Thingwall	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
938	SHLAA 0938 Rear of 67 to 77 Barnston Road, Thingwall	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
943	SHLAA 0943 East of Regency Lodge, Broad Lane, Heswall	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
945	SHLAA 0945 South of Wessex, Thornton Hough	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
947	SHLAA 0947 East of The Crossway, Raby	Green	Amber	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination, ecology and archaeology issues to be addressed at planning application stage.
1489	SHLAA 1489 Adjacent 14 Private Drive, Barnston	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1546	SHLAA 1546 West of 210 Irby Road, Pensby	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1549	SHLAA 1549 Rear of Foxmere Cottage, Chester Road, Heswall	Amber	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
1551	SHLAA 1551 South of Burnbrae, Lever Causeway, Storeton	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1588	SHLAA 1588 Land at Mayfield Drive, Eastham	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1760	SHLAA 1760 West of Lilac Cottage, Mill Hill Road, Irby	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1761	SHLAA 1761 East of Willow Cottage, Sandy Lane North, Irby	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.

SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
1762	SHLAA 1762 East of Farm End, Sandy Lane North, Irby	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
1763	SHLAA 1763 East of Sandy Lane North, Irby	Amber	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology issues to be addressed through the planning process.
1764	SHLAA 1764 59 Thurstaston Road, Irby	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1765	SHLAA 1765 41 Thurstaston Road, Irby	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1766	SHLAA 1766 61 Thurstaston Road, Irby	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1767	SHLAA 1767 Land at Deepfield, Chester Road, Heswall	Green	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
1768	SHLAA 1768 Rear of 1 to 35 Mostyn Avenue, Heswall	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
1769	SHLAA 1769 South of 1408 New Chester Road, Bromborough	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1771	SHLAA 1771 33 Whitehouse Lane, Barnston	Green	Green	Amber	Amber	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1772	SHLAA 1772 Former Deeside Caravan Park, Heswall	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1773	SHLAA 1773 Rear of Bren Aud, Banks Road, Heswall	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1774	SHLAA 1774 North of Heathbank Estate, Mill Hill Road, Irby	Green	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology issues to be addressed through the planning process.
1775	SHLAA 1775 Land at Irby Hall, Irby	Red	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology issues to be addressed through the planning process.
1776	SHLAA 1776 North of Thorstone Drive, Mill Hill Road, Irby	Amber	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology issues to be addressed through the planning process.
1777	SHLAA 1777 South of Woodend Cottage, Higher Bebington	Amber	Green	Amber	Green	Green	Amber	Environmental constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Phase I Desk Study required prior to allocation. Ecology issues to be addressed at planning application stage.
1778	SHLAA 1778 West of Sandy Lane, Irby	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
1779	SHLAA 1779 Land off Marsh Lane, Higher Bebington	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1780	SHLAA 1780 Storeton Hall Farm, Red Hill Road, Storeton	Green	Green	Amber	Green	Green	Amber	Environmental constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Phase I Desk Study required prior to allocation. Ecology issues to be addressed at planning application stage.
1781	SHLAA 1781 South of Thorns Drive, Greasby	Amber	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.

SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
1782	SHLAA 1782 North of 365 to 375 Leasowe Road, Leasowe	Amber	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and land contamination issues to be addressed at planning application stage.
1783	SHLAA 1783 North of the Rectory, Telegraph Road	Red	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey and Desk Based Assessment/ Site Evaluation required prior to allocation.
1784	SHLAA 1784 Land at Telegraph Road, Thurstaston	Red	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Archaeological Desk Based Assessment and Site Evaluation and non breeding bird survey required prior to allocation.
1785	SHLAA 1785 North of Rivacre Road, Eastham	Green	Amber	Amber	Green	Amber	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology, archaeology and land contamination issues to be addressed at planning application stage.
1786	SHLAA 1786 East of Warehouse, Hooton Park	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and land contamination issues to be addressed at planning application stage.
1787	SHLAA 1787 South of Hooton Park Circuit, West Road	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and land contamination issues to be addressed at planning application stage.
1788	SHLAA 1788 New Hall Nurseries, Chester Road, Gayton	Amber	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1790	SHLAA 1790 East of Hazeldene, Sandy Lane North, Irby	Red	Amber	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
1815	SHLAA 1815 Adjacent 6 Wittering Way, Heswall	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1816	SHLAA 1816 Between 6 and 14 Ford Lane, Upton	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1817	SHLAA 1817 Toll Bar Cottage, Chester Road, Gayton	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1818	SHLAA 1818 West of 195 Birkenhead Road, Meols	Green	Green	Green	Amber	Green	Amber	Environmental constraints. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes, clear understanding of long term proposals at Carr Lane required prior to allocation to ensure that any housing proposals do not sterilise any future minerals extraction.
1819	SHLAA 1819 South of Mountwood, Lever Causeway, Bebington	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1821	SHLAA 1821 Rear of 101 to 105 Barnston Road, Lower Thingwall Lane	Amber	Amber	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology, archaeology and land contamination issues to be addressed at planning application stage.
1855	SHLAA 1855 Land off Fender Lane, Moreton	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required prior to allocation.
1880	SHLAA 1880 Land at Roman Road, Prenton	Green	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology issues to be addressed through the planning process.
1882	SHLAA 1882 Rear New Hall Centre, Chester Road, Heswall	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
1925	Former SHLAA 1925 Landican Village, South of Landican Road	Amber	Red	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology and land contamination issues to be addressed through the planning process.
1927	SHLAA 1927 Land off Lower Thingwall Lane	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	

SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
1928	SHLAA 1928 South of Seaview Avenue, Eastham	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Land contamination and ecology issues to be addressed at planning application stage.
1929	SHLAA 1929 South of 112 Ferry Road, Eastham	Red	Green	Amber	Green	Amber	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
1930	SHLAA 1930 Land at Vineyard Farm, Bebington	Amber	Red	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology issues to be addressed through the planning process.
1932	SHLAA 1932 Land at Irby Farm, Thingwall Road	Green	Red - SP060	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Archaeological Desk Based Assessment and Site Evaluation required prior to allocation. Land contamination and Ecology issues to be addressed at planning application stage.
1933	SHLAA 1933 Rear of The Ridgeway, Meols	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non-breeding bird survey and PEA required to inform allocation of site in Local Plan. At planning application stage assessment and mitigation of recreational pressure effects would also need to consider effects on adjacent WeBS Core Count Area.
1934	SHLAA 1934 Paddock at Fornalls Green Lane, Meols	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No- Land contamination and ecology issues to be addressed at planning application stage.
1935	SHLAA 1935 Stables at Fornalls Green Lane, Meols	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No- Land contamination and ecology issues to be addressed at planning application stage.
1936	SHLAA 1936 Land at Meols	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non-breeding bird survey, breeding bird and PEA required to inform allocation of site in Local Plan. At planning application stage assessment and mitigation of recreational pressure effects would also need to consider effects on adjacent WeBS Core Count Area.
1937	SHLAA 1937 Adjacent Hoylake Rugby Club	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No- Ecology issues to be addressed at planning application stage.
1938	SHLAA 1938 West of Wittering Lane, Heswall	Red	Amber	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- Non breeding bird survey to inform allocation of site in Local Plan. Archaeology issues to be addressed at planning application stage.
1939	SHLAA 1939 South of Seabank Road, Heswall	Red	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- Non breeding bird survey and Archaeological Desk Based Assessment and Site Evaluation to inform allocation of site in Local Plan.
1940	SHLAA 1940 South of Park West, Heswall	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- Non breeding bird survey to inform allocation of site in Local Plan.
1941	SHLAA 1941 Rear of Hilbre Avenue, Heswall	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- Non breeding bird survey to inform allocation of site in Local Plan.
1942	SHLAA 1942 South of Brimstage Road, Bebington	Amber	Green - SP040	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No- Ecology issues to be addressed at planning application stage.
1943	SHLAA 1943 North of 35 to 51 Gilroy Road, West Kirby	Red	Green	Amber	Green	Amber	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey, Phase I Desk Study and Waste information required to inform allocation of site in Local Plan.
1944	SHLAA 1944 West of Column Road, West Kirby	Amber	Amber - SP013	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No- Ecology and archaeology issues to be addressed at planning application stage.
1945	SHLAA 1945 North of Landican	Green	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No- Ecology and archaeology issues to be addressed at planning application stage.

SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
1946	SHLAA 1946 West of Barnston	Red	Amber - SP062	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Alteration of the site boundary could reduce the RAG rating to Amber. If site allocated any future development would need to ensure that an adequate no-development buffer (e.g. 15m width) is put in place between the development and the ancient woodland LWS. PEA at the planning application stage.
1947	SHLAA 1947 West of Raby Mere	Red	Amber - SP045	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
1948	SHLAA 1948 West of Plymyard Dale, Bromborough	Red	Amber - SP046	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
1949	SHLAA 1949 South of Prenton Dell Road, Prenton	Red	Green	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
1950	SHLAA 1950 Land at Carr Lane Brickworks, Moreton	Red	Green	Red	Red	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes if to be progressed further.
1951	SHLAA 1951 South of Thornton Hough	Green	Amber	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology, archaeological and land contamination issues to be addressed at planning application stage.
1952	SHLAA 1952 West of Limbo Lane, Irby	Amber	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
1953	SHLAA 1953 South of Willowbrow Road, Raby	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and land contamination issues to be addressed at planning application stage.
1954	SHLAA 1954 South of Woodchurch Road, Landican	Green	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and archaeological issues to be addressed at planning application stage.
1955	SHLAA 1955 Beech Farm, Barnston	Amber	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation prior to allocation. Alteration of the site boundary or a no-development buffer of 15m would be required along woodland edge in order to protect ancient woodland habitat. PEA and amphibian surveys at the planning application stage.
1956	SHLAA 1956 North of Whitfield Lane, Barnston	Green	Red	Green	Amber	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation and minerals assessment prior to allocation.
1958	SHLAA 1958 North of Murrayfield Hospital, Thingwall	Red	Amber	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Alteration of the site boundary/details as to how ancient woodland and woodland Priority Habitats will be protected during any future construction works (i.e. a no development buffer of approx. 15m). Archaeology, PEA and amphibians surveys at the planning application stage.
1959	SHLAA 1959 South of Greenhouse Farm, Greasby	Amber	Red	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Land contamination and ecology issues to be addressed through the planning process.
1961	SHLAA 1961 Land at Lodge Farm, Thornton Hough	Green	Green	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology and land contamination issues to be addressed at planning application stage.
1962	SHLAA 1962 Land at Rest Hill Road, Storeton	Amber	Amber	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology, archaeological and land contamination issues to be addressed at planning application stage.

SHLAA Ref	Description	Ecology RAG Rating	Archaeology RAG rating	Land Contamination RAG rating	Minerals RAG rating	Waste RAG rating	Overall Site RAG Rating	Conclusion	Further Information/Assessment Required to Allocate
1963	SHLAA 1963 Land at Keepers Lane, Storeton	Amber	Red	Amber	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Desk Based Assessment/ Site Evaluation assessment prior to allocation.
1964	SHLAA 1964 Land on Grange Drive, Thornton Hough	Amber	Amber	Amber	Green	Green	Amber	Environmental constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Phase I Desk Study required prior to allocation. Ecology and archaeological issues to be addressed at planning application stage.
1965	SHLAA 1965 North of 8 to 45 Farndon Drive, West Kirby	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- Non breeding bird survey to inform allocation of site in Local Plan. Archaeology issues to be addressed at planning application stage.
1967	SHLAA 1967 Land at Wittering Lane, Heswall	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes if to be progressed further.
1968	SHLAA 1968 South of Riverbank Road, Heswall	Red	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes if to be progressed further.
1969	SHLAA 1969 Land at Red Hill Road, Storeton	Green	Amber - SP037	Amber	Green	Red	Red	Significant deliverability constraint. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Information would be required prior to allocation on existing Household Waste Recycling Centre and proposed development to ensure compatibility. Ecology, archaeology and land contamination issues to be addressed at planning application stage.
1970	SHLAA 1970 Land at Pear Tree Farm, Raby Road	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1971	SHLAA 1971 35 Private Drive, Barnston	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
1973	SHLAA 1973 Plot 1 at Westward Ho, Broad Lane, Heswall	Red	Green	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non-breeding bird survey to inform allocation of site in the Local Plan.
1976	SHLAA 1976 Land at Cleveley Road, Meols	Red	Green	Green	Amber	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes- if to be progressed further.
1977	SHLAA 1977 North of Barn Hey Crescent, Meols	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1979	SHLAA 1979 Land east of 5 to 21 South Hey Road, Irby	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	
1980	SHLAA 1980 South of Townshend Avenue, Irby	Red	Amber	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non breeding bird survey required to inform allocation of site in Local Plan. Archaeological issues to be addressed at planning application stage.
1981	SHLAA 1981 Land at Downham Road North, Heswall	Green	Amber	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecological and archaeological issues to be addressed at planning application stage.
1982	SHLAA 1982 Land Rear of Greenheys Cottages, Barnston Road, Heswall	Green	Green	Amber	Amber	Green	Amber	Environmental constraints. Further assessment and evidence gathering needed to resolve deliverability prior to both allocation and planning application stage.	Yes - Phase I Desk Study and Minerals assessment required prior to allocation.
1983	SHLAA 1983 North of East Farm Mews, Caldy	Amber	Green	Green	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology issues to be addressed at planning application stage.
1984	SHLAA 1984 South of Old Clatterbridge Road, Spital	Amber	Red	Green	Green	Green	Red	Significant deliverability constraint. Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Desk Based Assessment/ Site Evaluation required prior to allocation. Ecology issues to be addressed through the planning process.
2050	SHLAA 2050 Vacant Land at Clatterbridge Hospital	Amber	Amber	Amber	Green	Green	Amber	Environmental constraints capable of being addressed through the normal planning process.	No. Ecology, land contamination and archaeological issues to be addressed at planning application stage.

Further assessment and evidence gathering highly unlikely to resolve deliverability at either allocation or planning application stage. Recommend do not progress.	Yes - Non-breeding bird and amphibian surveys in order to inform the allocation of the site in the Local Plan.
3046	SHLAA 3046 South of Gayton Parkway	Green	Green	Green	Green	Green	Green	No significant environmental constraints (in relation to Ecology, Archaeology, Land Contamination, Minerals and Waste) to deliverability of potential allocation. Normal planning process	

Submitted Green Belt Sites						
Environmental Constraint: Ecology						
SHLAA Ref	Description	X	Y	Ecology Issues	Further Information Required	Ecology RAG Rating
511	SHLAA 0511 Raby Hall Autistic Centre, Raby	333217	380668	Site comprises areas of woodland Priority Habitat, several buildings and amenity grassland. Northern boundary lies immediately adjacent to the Raby Mere LWS.	PEA required at the planning stage, along with tree and woodland protection measures.	Amber
526	SHLAA 0526 Land at Upton Waste Water Treatment Works	327607	389100	Site comprises predominantly scrub, tall ruderal vegetation and rank grasses of negligible ecological value.	PEA at the planning application stage.	Green
537	SHLAA 0537 South off Park Lane, Meols	324613	390491	Site comprises horse-grazed pasture and menage with associated buildings. Site is situated between the Meols Meadows SSSI to the south and the Meols Fields LWS to the north. Site is within the Meols and Leasowe Lighthouse Fields WeBS Core Count Area.	Non-breeding bird survey and PEA required to inform allocation of the site in the Local Plan.	Red
538	SHLAA 0538 Land off Lingham Lane, Moreton	324968	390732	Site is situated within the Meols and Leasowe Lighthouse Fields WeBS Core Count Area and is therefore within an area of known importance for waterbirds associated with the Dee Estuary.	Non-breeding bird survey in order to inform the allocation of the site in the Local Plan.	Red
627	SHLAA 0627 East of George Road, Hoylake	322343	388721	Site falls partly within the Gilroy Pond and Hoylake Langfields WeBS Core Area which is of known importance for qualifying bird species of the Dee Estuary European Sites.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
632	SHLAA 0632 Thornton Hough WWTW, Raby Road	330757	380549	In addition to sewage work structures, site contains rank grassland and scrub vegetation.	PEA at the planning application stage.	Green
637	SHLAA 0637 North of Oakmere Close, Leasowe	326235	391701	Site is located approximately 125m to the south of the Dee Estuary SAC, Mersey Estuary SPA and Ramsar sites and the North Wirral Foreshore SSSI. Site also in close proximity to the Leasowe Bay and Islands WeBS Core Count Area. Site itself comprises rank grassland and scrub and appears sub-optimal for non-breeding birds. However, given proximity of site to the above designations and potential functionally linked land impacts on qualifying bird species cannot be discounted.	Non-breeding bird surveys in order to inform allocation of the site in the Local Plan.	Red
638	SHLAA 0638 Garden Hey Nursery, Saughall Massie	325086	388913	Planning application on the site in 2017 (LPA ref: OUT/17/00598) revealed the presence of a bat roost on the site. Also, great crested newt breeding pond within a 100m radius of the site.	PEA, bat and amphibian surveys at the planning application stage.	Amber
639	SHLAA 0639 Rear of Meadowbrook Road Moreton	325531	389256	Strip of land adjacent to Arrowe Brook, consisting of scrub and rank grassland. Water vole have been recorded in the vicinity of the site.	PEA and water vole survey at the planning application stage. Also, any future development would need to leave a 5m no-development buffer from top of brook bank in order to ensure riparian habitat was adequately protected.	Amber
641	SHLAA 0641 North of White House, Broad Lane, Heswall	324781	382280	Site lies approximately 140m from the Dee Estuary SAC, SPA, Ramsar and SSSI and falls within the Thurstaston Fields WeBS Core Count Area. Area of woodland Priority Habitat lies immediately adjacent to the site and the field is bounded by hedgerows.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
642	SHLAA 0642 North of Ferns Close, Heswall	325245	382409	Site forms part of the Piper's Lane, Heswall LWS (designated to the presence and value to breeding birds) and is near to the Thurstaston Fields WeBS Core Count Area which is an area of known importance for non-breeding birds associated with the Dee Estuary European sites.	Any development of the site would be significantly constrained. PEA and non-breeding bird surveys required in order to inform allocation of site in Local Plan.	Red
643	SHLAA 0643 West of Latchgate, Broad Lane, Heswall	325371	381767	Small area of rank unmanaged grassland which is enclosed by woodland and residential development. Site likely to be sub-optimal for qualifying bird species due to size and enclosed nature.	PEA at the planning application stage.	Green
644	SHLAA 0644 Rear of Sandymount, Broad Lane	325439	381739	Site predominantly grassland, enclosed by residential development to the east and west, an area of woodland to the south and road to the north. Due to the nature of the site it is likely to be sub-optimal for qualifying bird species. The woodland on the site is Priority Habitat.	PEA at the planning application stage along with details of how harm to the woodland Priority Habitat will be avoided.	Amber
648	SHLAA 0648 West of Raby Hall, Raby Mere	333050	380572	Site comprises entirely of improved grassland. North western corner of site lies near to the Raby Mere LWS and an area of woodland Priority Habitat lies adjacent to the south western part of the site.	PEA at the planning application stage	Green
649	SHLAA 0649 Land East of Raby Hall, Raby Mere	333349	380708	Raby Mere LWS lies immediately adjacent to the northern site boundary. A strip of woodland Priority Habitat is present on site along the southern boundary and also off-site adjacent to the western site boundary. The site comprises predominantly improved grassland and falls within the Dibbinsdale, Raby Mere and Eastham Country Park NIA.	PEA at the planning application stage along with details of how both designated and Priority Habitats will be protected during any development works.	Green
650	SHLAA 0650 Opposite 192 to 204 Eastham Rake	334707	379180	Triangular parcel of land comprising entirely woodland Priority Habitat	N/A	Red
738	SHLAA 0738 Land at Bidston Station Approach	328275	390645	The northern part of the site falls within the Bidston Marsh LWS which is county importance for non-breeding birds and has high botanical diversity. Due to it's overgrown and undisturbed nature, the site is likely to be of importance for breeding birds. Site falls within the River Birket Corridor Nature Improvement Area (NIA).	NVC botanical survey and breeding bird survey would be required to inform allocation of the site in Local Plan.	Red
740	SHLAA 0740 North of 137 Garden Hey Road, Saughall Massie	325280	388828	A pond is present on the site which was found to support a small population of GCN following amphibian surveys undertaken in support of application OUT/17/00598. Aside from pond, site comprises improved grassland bounded by hedgerow. Area of disturbed ground present in south-eastern corner of the site.	PEA and amphibian surveys at the planning application stage.	Amber
741	SHLAA 0741 South of 106 Garden Hey Road, Saughall Massie	325165	388772	Site comprises two fields bounded by hedgerow which appear to be used for horse grazing. Confirmed great crested newt breeding pond is present in field adjacent to the site to the north.	PEA and amphibians surveys at the planning application stage.	Amber

In some cases, information on the location of protected species and their related survey requirements has been withheld due to their sensitivity to disturbance and persecution

Further info can be obtained on a confidential basis from MEAS

SHLAA Ref	Description	X	Y	Ecology Issues	Further Information Required	Ecology RAG Rating
742	SHLAA 0742 Opposite 5 to 27 Heron Road, Meols	323832	389319	Site partly falls within the Gilroy Pond and Hoylake Langfields WeBS Count Core area. However, site has become overgrown by scrub and tall ruderal vegetation and lies adjacent to area of woodland. Site is therefore likely to be unattractive to waterbirds associated with the Dee Estuary European sites.	PEA at the planning application stage.	Green
856	Former SHLAA 0856 Landican Village, North of Landican Road	328265	385623	Site predominantly comprises hardstanding and agricultural buildings.	PEA at the planning application stage.	Green
858	Former SHLAA 0858 Rear of Hulme Cottages, Thornton Hough	330583	380687	Site predominantly improved grassland bounded by hedgerow.	PEA at the planning application stage.	Green
860	SHLAA 0860 East of Hill Top Farm, Thornton Hough	330583	381253	Site comprises predominantly arable land bounded by hedgerow, some of which are species-rich and are Priority Habitat.	PEA at the planning application stage which must consider brown hare. Details of how species-rich hedgerows would be protected also required.	Amber
861	SHLAA 0861 South of Home Farm, Landican	328333	385560	Pasture bounded by hedgerow and mature trees.	PEA at the planning application stage.	Green
862	SHLAA 0862 North of Green Bank, Brimstage	330330	382863	Site comprises pasture and arable land bounded by hedgerows. Site also encompasses residential dwellings and agricultural buildings.	PEA at the planning application stage.	Green
863	SHLAA 0863 Home Farm, Brimstage	330603	382871	Site comprises predominantly farmhouse and complex of agricultural buildings.	PEA at the planning application stage.	Green
864	SHLAA 0864 South of Brook Cottage, Brimstage	330262	382651	Complex of former agricultural buildings which are now commercial premises and improved grassland.	PEA at the planning application stage.	Green
865	SHLAA 0865 North and West of Clatterbridge Hospital	331560	382264	Site comprises fields bounded by hedgerows which are predominantly under arable cultivation. Several ponds are present on the site and in adjacent fields. There are no great crested newt records from these ponds, although their potential presence cannot be discounted.	PEA and amphibian surveys at the planning application stage.	Amber
866	Former SHLAA 0866 West of Clatterbridge Waste Reception Centre, Mount Road	331895	383104	Site comprises entirely improved grassland. However, site is bounded by woodland Priority Habitat to the north.	PEA at the planning application stage. Tree and woodland protection measures also required.	Green
870	SHLAA 0870 Land at Bank Farm, Barnston Village	328145	383300	Complex of agricultural buildings with arable land and pasture. Several ponds present in adjacent fields and there are records of great crested newts from the vicinity of the site.	PEA and amphibian surveys at the planning application stage.	Amber
871	SHLAA 0871 North of Banager, Storeton Lane	328121	383538	Site predominantly arable land. However, northern boundary of site lies directly adjacent to Barnston Dale LWS which is irreplaceable ancient woodland habitat.	If site developed a 'no development' buffer of at least 15m required along boundary with LWS to ensure that irreplaceable ancient woodland habitat is adequately protected in the event of any future development. PEA required at the planning application stage.	Amber
874	SHLAA 0874 Land at White House Farm, Raby	331013	379924	Two small agricultural fields.	PEA required at the planning application stage.	Green
877	SHLAA 0877 North of Milner Road, Heswall	327920	382174	Site comprises almost entirely of arable land. Site bounded by a ditch to the north.	PEA at the planning application stage.	Green
878	SHLAA 0878 Bridges House Farm, Heswall	328534	380873	Site comprises improved agricultural grassland and several agricultural buildings. Site bounded by strip of woodland Priority Habitat to the east.	PEA required at the planning application stage, along with details of how adjacent woodland Priority Habitat would be protected.	Green
879	Former SHLAA 0879 East of Rigby Drive, Greasby	325851	386944	Site comprises farm complex, arable land with hedgerows and an area of woodland which forms the Greasby Copse and Ponds LWS. Amphibian populations have previously been recorded here including common toad, a Priority Species.	PEA and amphibian surveys at the planning application stage.	Amber
881	SHLAA 0881 West of Gills Lane Farm, Barnston	327897	383910	Site predominantly arable land of limited value. However, wooded copse with ponds in present in the north western corner of the site which is Priority Habitat. There are also ponds located off-site and great crested newts have previously been recorded in the vicinity.	PEA and amphibian surveys at the planning application stage. Details of how woodland Priority Habitat will be protected would also be required.	Amber
882	SHLAA 0882 East of Thorncroft Drive, Gills Lane, Barnston	327685	383937	Three small fields used for grazing bounded by hedgerows. Ponds are located off-site in adjacent fields and there are records of great crested newt from the vicinity.	PEA and amphibian surveys at the planning application stage.	Amber
883	SHLAA 0883 West of Thorncroft Drive, Gills Lane, Barnston	327503	383976	Site predominantly arable land of negligible ecological value. However, pond is present along western site boundary and site is linked via hedgerows to other ponds located off-site. Great crested newts have previously been recorded in the vicinity of the site.	PEA and amphibian surveys at the planning application stage.	Amber
884	SHLAA 0884 Land East of Marfield Lane, Gills Lane, Barnston	327638	383702	Site predominantly arable land of negligible ecological value. However, site is bounded to the south by the Barnston Dale LWS which is irreplaceable ancient woodland habitat.	If site developed a no-development buffer of at least 15m required along boundary with LWS to ensure that irreplaceable ancient woodland habitat is adequately protected in the event of any future development. PEA required at the planning application stage.	Amber
891	SHLAA 0891 South of Pickmere Drive, Eastham	335757	379261	Site predominantly arable land, although block of woodland with ponds is present on western boundary which is Priority Habitat and would therefore be a material consideration during the planning process.	PEA at the planning application stage. Woodland Priority Habitat would require protection and this could be achieved through a no-development buffer alongside woodland edge. Details of woodland protection would be required at the planning application stage.	Amber
892	SHLAA 0892 East of Harrock Wood, Irby	326474	384629	Harrock Wood LWS is present along western site boundary. Pond also present within the site which is predominantly grassland used for grazing horses. There are records of great crested newt from the vicinity of the site.	PEA and amphibian surveys required at the planning application stage. Protection of woodland LWS would be required through the provision of a no-development buffer along the woodland edge.	Amber
895	SHLAA 0895 Rear of Irby Farm, Irby	325724	384416	Site appears to be used predominantly for grazing horses.	PEA at the planning application stage.	Green

In some cases, information on the location of protected species and their related survey requirements has been withheld due to their sensitivity to disturbance and persecution

SHLAA Ref	Description	X	Y	Ecology Issues	Further Information Required	Ecology RAG Rating
896	SHLAA 0896 West of 52 to 54 Stanley Lane, Eastham	335944	379961	Grassland site with mature trees also present.	PEA at the planning application stage.	Green
902	SHLAA 0902 South of Freshways, Boathouse Lane, Heswall	328369	380299	Small wooded site, part of woodland is Priority Habitat.	PEA at the planning application stage along with details of how harm to woodland Priority Habitat will be avoided, mitigated or compensated if harm cannot be avoided.	Amber
904	SHLAA 0904 Land at Birch Road/Rycroft Road, Meols	323230	389530	Entire site woodland identified as woodland Priority Habitat. Woodland and scrub habitats likely to be of high value to breeding birds.	N/A	Red
907	SHLAA 0907 East of 117 to 121 Pipers Lane, Heswall	325245	382409	Site forms part of the Piper's Lane, Heswall LWS (designated to the presence and value to breeding birds) and is directly adjacent to the Thurston Fields WeBS Core Count Area which is an area of known importance for non-breeding birds associated with the Dee Estuary. Site, which forms northern half of the LWS, appears to be comprised predominantly of improved grassland. Southern half of LWS contains stands of gorse and would appear to be of greater ecological interest.	Range of ecological surveys would be required, including PEA and non-breeding bird survey in order to support allocation of site in Local Plan. Mitigation of recreational pressure would also need to consider increased recreational pressure within the adjacent WeBS Core Count Area.	Red
918	SHLAA 0918 West of 94 Garden Hey Road, Saughall Massie	325107	388945	Part of former nursery site comprising overgrown bramble scrub. Small population of great crested newt present in pond located 140m to the south east of the site and the site contains potentially suitable terrestrial habitat.	PEA and amphibian surveys required at the planning application stage.	Amber
920	SHLAA 0920 West of Fender View Road, Moreton	327401	389986	Improved agricultural grassland situated within the Bidston and Fender Fields WeBS Core Count Area. Two ponds are present within the site and common toad, a Priority Species, has been recorded in proximity to the site.	Non-breeding bird surveys in order to inform the allocation of the site in the Local Plan.	Red
921	SHLAA 0921 South of Fender Lane, Moreton	327520	389917	Site forms part of the Bidston and Fender Fields WeBS Core Count Area and is of known importance for waterbirds associated with European sites.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
922	SHLAA 0922 East of Bullrush Drive, Moreton	327491	390626	Agricultural land situated within the Bidston and Fender Fields WeBS Core Count Area which is an area of importance for waterbirds. The Fender forms the eastern boundary of the site.	Non-breeding bird surveys in order to inform the allocation of the site in the Local Plan.	Red
923	SHLAA 0923 East of Claremont School, Fender Lane, Moreton	327496	390432	Site predominantly agricultural land which is situated within the Bidston and Fender Fields WeBS Core Count Area. A pond is present on the western boundary and another pond is present off-site adjacent to this.	Non-breeding bird surveys in order to inform the allocation of the site in the Local Plan.	Red
924	SHLAA 0924 North of Fender Lane, Moreton	327790	390563	Agricultural land situated within the Bidston and Fender Fields WeBS Core Count Area which is an area of importance for waterbirds. The Fender forms the western boundary of the site.	Non-breeding bird surveys in order to inform the allocation of the site in the Local Plan.	Red
925	SHLAA 0925 North of Diamond Farm, Saughall Massie	325434	389016	Site mixture of arable land and pasture. Eastern boundary of the site is formed by Arrowe Brook. Site forms part of the River Birket Corridor NIA.	PEA at the planning application stage.	Green
927	SHLAA 0927 East of 1 to 21 Newton Park Road, Frankby	323646	386465	The site forms part of the Caldby Fields WeBS Core Count Area and is of known importance for waterbirds associated with the Dee Estuary European Sites. There is pre-existing survey information (e.g. Natural England, 2015) which shows that roosts of several bird species (e.g. lapwing, oystercatcher, black-tailed godwit and curlew) have been recorded in close proximity to the site.	Non-breeding bird surveys in order to inform the allocation of the site in the Local Plan.	Red
928	SHLAA 0928 South of 218 Ferry Road, Eastham	336534	380858	Area of scrub, tall ruderal vegetation and rank grassland.	PEA at the planning application stage.	Green
929	SHLAA 0929 West of 15 Acres Road, Meols	323601	389187	Site partly falls within the Gilroy Pond and Hoylake Langfields WeBS Core area. However, site has become overgrown by scrub and tall ruderal vegetation and lies adjacent to area of woodland. Site is therefore likely to be unattractive to waterbirds associated with the Dee Estuary European sites.	PEA at the planning application stage.	Green
930	SHLAA 0930 South of Kingsley Avenue, Eastham	335502	379046	Site comprises predominantly arable land, although site is bounded to the west by Lowfields, Eastham LWS and by an area of woodland Priority Habitat to the east.	PEA at the planning application stage.	Green
931	SHLAA 0931 Opposite 124 and 126 Barnston Road, Thingwall	328087	384525	Site comprises predominantly improved grassland which appears to be used for grazing / or keeping horses	PEA at the planning application stage.	Green
932	SHLAA 0932 South of Crosshill Reservoir, Thingwall	327885	384146		PEA at the planning application stage.	Amber
938	SHLAA 0938 Rear of 67 to 77 Barnston Road, Thingwall	328008	384933	Grassland site which appears to be used infrequently for horse grazing. There are ponds present in adjacent fields and records of great crested newt from within a 500m radius.	PEA and amphibian survey at the planning application stage	Amber
943	SHLAA 0943 East of Regency Lodge, Broad Lane, Heswall	325516	381856	Site is enclosed by residential development and a care home. Site is unmanaged and overgrown comprising predominantly rank grassland and scrub. The Wirral Way (Caldy to Heswall) LWS lies adjacent to the site's northern boundary.	PEA at the planning application stage.	Green
945	SHLAA 0945 South of Wessex, Thornton Hough	330468	381170	Disturbed area within farm complex which appears to be used for storage.	PEA at the planning application stage.	Green
947	SHLAA 0947 East of The Crossway, Raby	331064	379811	Arable fields with hedgerow.	PEA at the planning application stage.	Green
1489	SHLAA 1489 Adjacent 14 Private Drive, Barnston	328685	384086	Strip of land situated between residential properties which has mature trees present.	PEA at the planning application stage.	Green

In some cases, information on the location of protected species and their related survey requirements has been withheld due to their sensitivity to disturbance and persecution

SHLAA Ref	Description	X	Y	Ecology Issues	Further Information Required	Ecology RAG Rating
1546	SHLAA 1546 West of 210 Irby Road, Pensby	326013	383855	Site predominantly comprises improved grassland.	PEA at the planning application stage.	Green
1549	SHLAA 1549 Rear of Foxmere Cottage, Chester Road, Heswall	328367	380830	Site predominantly arable land with hedgerow and hedgerow trees. Two ponds are present on the site and there are records of great crested newt from the vicinity of the site.	PEA and amphibian survey at the planning application stage.	Amber
1551	SHLAA 1551 South of Burnbrae, Lever Causeway, Storeton	330492	384668	Small plot of land situated between two residential dwellings. Site has become overgrown and contains scrub and trees.	PEA at the planning application stage.	Green
1588	SHLAA 1588 Land at Mayfield Drive, Eastham	336565	380768	Area of rank grassland adjacent to existing residential development. Site largely screened from QEII Dock by mound and trees.	PEA at the planning application stage.	Green
1760	SHLAA 1760 West of Lilac Cottage, Mill Hill Road, Irby	325330	385970	Arable field bounded by residential dwellings and roads.	PEA at the planning application stage.	Green
1761	SHLAA 1761 East of Willow Cottage, Sandy Lane North, Irby	325282	385805	Site lies near to the Thurstaston Common SSSI and LNR (300m west of site). Site predominantly arable land which lies adjacent to an area of woodland Priority Habitat to the south. Site is relatively enclosed by woodland and trees and is unlikely to be attractive to non-breeding birds.	PEA at the planning application stage. Also, package of mitigation measures would be required for recreational pressure effects on the adjacent SSSI and LNR.	Amber
1762	SHLAA 1762 East of Farm End, Sandy Lane North, Irby	325210	385753	The entire site comprises woodland Priority Habitat which would be a material consideration during the determination of any future planning application.	N/A	Red
1763	SHLAA 1763 East of Sandy Lane North, Irby	325156	385444	Site is situated in close proximity to the Thurstaston Common LNR and SSSI. Site comprises entirely arable land, although is relatively enclosed by adjacent trees and woodland and is outside of any known areas of importance for non-breeding bird associated with the Dee Estuary. It is therefore considered unlikely that non-breeding birds would place any constraint upon any potential development of the site.	PEA at the planning application stage. Also, package of mitigation measures would be required for recreational pressure effects on the adjacent SSSI and LNR.	Amber
1764	SHLAA 1764 59 Thurstaston Road, Irby	325193	384628	Site comprises dwelling and associated outbuildings, small field and several trees.	PEA at the planning application stage.	Green
1765	SHLAA 1765 41 Thurstaston Road, Irby	325242	384597	Overgrown, unmanaged site comprising scrub and tall ruderal vegetation with several mature trees. Greasby Brook forms the southern site boundary.	PEA at the planning application stage.	Green
1766	SHLAA 1766 61 Thurstaston Road, Irby	325153	384652	Site comprises several agricultural buildings, small fields with sections of hedgerow and several mature trees.	PEA at the planning application stage.	Green
1767	SHLAA 1767 Land at Deepfield, Chester Road, Heswall	328297	381085	Unmanaged grassland and scrub bounded by hedgerow and tree lines	PEA at the planning application stage	Green
1768	SHLAA 1768 Rear of 1 to 35 Mostyn Avenue, Heswall	325569	381637	Site is relatively enclosed by woodland and residential development. Site comprises predominantly grassland, areas of which appear to be unmanaged. Informal footpaths are present through grassland suggesting that site is well used by local residents. Due to likely disturbance and nature of the site, site is likely to be unattractive to qualifying bird species.	PEA at the planning application stage, along with details of how woodland Priority Habitat is to be protected.	Amber
1769	SHLAA 1769 South of 1408 New Chester Road, Bromborough	335929	379075	Redundant agricultural field adjacent to M53 which is bounded by hedgerow.	PEA at the planning application stage.	Green
1771	SHLAA 1771 33 Whitehouse Lane, Barnston	328612	382360	Site comprises entirely arable land, site not within or adjacent to area of known importance for qualifying bird species. Woodland present on northern boundary which is Priority Habitat.	PEA at the planning application stage.	Green
1772	SHLAA 1772 Former Deeside Caravan Park, Heswall	325339	381659	Site located in proximity to the River Dee, although site is former unmanaged caravan park comprising hardstanding and rank vegetation and is unlikely to be functionally linked.	PEA at the planning application stage.	Green
1773	SHLAA 1773 Rear of Bren Aud, Banks Road, Heswall	325413	381563	Site comprises predominantly rank unmanaged grassland which is enclosed by housing and residential habitat and is unlikely to be functionally linked.	PEA at the planning application stage.	Green
1774	SHLAA 1774 North of Heathbank Estate, Mill Hill Road, Irby	325605	385337	Site comprises predominantly arable land of negligible ecological value. However, several ponds are present along with woodland copses which are Priority Habitats.	PEA and amphibian survey required at the planning application stage.	Green
1775	SHLAA 1775 Land at Irby Hall, Irby	325480	384313	The potential development site falls within the Backford Road Ponds Local Wildlife Site (LWS) and is near to The Rectory, Thurstaston LWS. The Backford Road Ponds LWS was designated due to the presence of great crested newts and their presence on the site is therefore considered to be reasonably likely. The site also falls within the Thurstaston Fields Wetland Bird Survey WeBS Core Count Area, which is an area of importance for non-breeding birds associated with the Dee Estuary.	PEA, non-breeding bird and amphibian survey in order to inform allocation of site in the Local Plan.	Red
1776	SHLAA 1776 North of Thorstone Drive, Mill Hill Road, Irby	325202	385325	Large arable field bounded by hedgerow. Site is adjacent to Thurstaston Common SSSI and LNR.	PEA at the planning application stage. In addition to recreational pressure on European sites, assessment and mitigation of recreational pressure effects on Thurstaston Common SSSI and LNR will also be required.	Amber
1777	SHLAA 1777 South of Woodend Cottage, Higher Bebington	331422	385223	Storeton Woods, Higher Bebington LWS and LGS lies immediately adjacent to the site.	PEA at the planning application stage, along with details of how designated habitats will be protected in the event of any development.	Amber
1778	SHLAA 1778 West of Sandy Lane, Irby	325007	385054	Site appears to be used for horse grazing. Western boundary of site formed by Greasby Brook. Directly adjacent to Thurstaston Common SSSI and LNR	PEA at the planning application stage. In addition to recreational pressure on European sites, assessment and mitigation of recreational pressure effects on Thurstaston Common SSSI and LNR will also be required.	Amber
1779	SHLAA 1779 Land off Marsh Lane, Higher Bebington	331352	385344	Site comprises pasture and arable land of low ecological value.	PEA at the planning application stage.	Green

In some cases, information on the location of protected species and their related survey requirements has been withheld due to their sensitivity to disturbance and persecution

Further info can be obtained on a confidential basis from MEAS

SHLAA Ref	Description	X	Y	Ecology Issues	Further Information Required	Ecology RAG Rating
1780	SHLAA 1780 Storeton Hall Farm, Red Hill Road, Storeton	330620	384424	Site comprises hardstanding, modern agricultural buildings, bare ground, scrub and amenity grassland.	Bat roost potential and breeding bird survey at the planning application stage.	Green
1781	SHLAA 1781 South of Thorns Drive, Greasby	325094	386332	Site comprises predominantly agricultural land, with hedgerows, several ponds and woodland copses (Priority Habitat) also present.	PEA and amphibian survey at the planning application stage. Details also required regarding retention and protection of Priority Habitats on the site.	Amber
1782	SHLAA 1782 North of 365 to 375 Leasowe Road, Leasowe	327487	392001	Garden centre site located in close proximity (350m) to the Dee Estuary SAC, Mersey Narrows and North Wirral Foreshore SPA and Ramsar site and North Wirral Foreshore SSSI.	PEA at the planning application stage. Impacts of recreational pressure upon designated sites would be the main issue any residential proposal on this site.	Amber
1783	SHLAA 1783 North of the Rectory, Telegraph Road	325042	384228	Arable fields which partly fall within the Thurstaston Fields WeBS Core Count Area.	Non-breeding bird survey required in order to inform allocation of the site in the Local Plan.	Red
1784	SHLAA 1784 Land at Telegraph Road, Thurstaston	325287	383746	Site predominantly arable land within the Thurstaston Fields WeBS Core Count Area which is of importance for waterbirds associated with the Dee Estuary European Sites.	Non-breeding bird survey in order to inform the allocation of the site in the Local Plan.	Red
1785	SHLAA 1785 North of Rivacre Road, Eastham	336679	379619	Triangular area of land situated 372m from the Mersey Estuary SPA, Ramsar and SSSI. Majority of site, comprises arable land. Within this, a pond and wooded copse are Priority Habitat. Site is not a known area of importance for non-breeding birds associated with the Mersey Estuary. Use of adjacent site to the south for go-karting may deter non-breeding birds from the site.	PEA at the planning application stage. Pond, hedgerow and copse should be retained and protected during any future development of the site.	Green
1786	SHLAA 1786 East of Warehouse, Hooton Park	337123	379448	There are unlikely to be any important ecological features present on the site. The site currently includes a go-karting track, hardstanding, two arable fields and residential and commercial development.	PEA at the planning application stage.	Green
1787	SHLAA 1787 South of Hooton Park Circuit, West Road	337211	379584	Arable field situated between go-karting track and hardstanding.	PEA at the planning application stage.	Green
1788	SHLAA 1788 New Hall Nurseries, Chester Road, Gayton	328841	380382	Site contains woodland Priority Habitat which extends across eastern site boundary. Ponds also present within, and adjacent to, the site.	PEA and amphibian survey at the planning application stage, along with details of tree and woodland protection measures.	Amber
1790	SHLAA 1790 East of Hazeldene, Sandy Lane North, Irby	325133	385720	Site comprises entirely woodland Priority Habitat.	N/A	Red
1815	SHLAA 1815 Adjacent 6 Wittering Way, Heswall	326028	381390	Site lies adjacent to the Whittering Lane Fields WeBS Core Count Area. However, site is small and is screened from the surrounding area by trees and neighbouring residential development. The site is therefore unsuitable to support qualifying bird species.	PEA at the planning application stage.	Green
1816	SHLAA 1816 Between 6 and 14 Ford Lane, Upton	327823	388329	Site comprises rank grassland and scrub habitats.	PEA at the planning application stage.	Green
1817	SHLAA 1817 Toll Bar Cottage, Chester Road, Gayton	328213	380904	Site comprises improved grassland bounded by tree lines and hedgerow.	PEA at the planning application stage.	Green
1818	SHLAA 1818 West of 195 Birkenhead Road, Meols	323966	389518	Improved grassland used for horse-grazing with area of scrub present at north of site.	PEA at the planning application stage.	Green
1819	SHLAA 1819 South of Mountwood, Lever Causeway, Bebington	331140	385529	Site comprises arable land of negligible ecological value.	PEA at the planning application stage.	Green
1821	SHLAA 1821 Rear of 101 to 105 Barnston Road, Lower Thingwall Lane	328083	384738	Woodland, which is Priority Habitat, covers approximately 40% of the site area.	PEA at the planning application stage. Details of how harm to woodland Priority Habitat would be avoided and mitigated would also be required.	Amber
1855	SHLAA 1855 Land off Fender Lane, Moreton	327396	390199	Agricultural land which falls within the Bidston and Fender Fields WeBS Core Count Areas.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
1880	SHLAA 1880 Land at Roman Road, Prenton	330248	385775	Fields bounded by hedgerows adjacent to golf course which do not appear to be under intensive agricultural management.	PEA at the planning application stage.	Green
1882	SHLAA 1882 Rear New Hall Centre, Chester Road, Heswall	328907	380469	Site comprises improved grassland, bounded by woodland, treelines and hedgerow. Three ponds are present adjacent to the site.	PEA and amphibian survey at the planning application stage. Details also required regarding retention and protection of Priority Habitats on the site.	Amber
1925	Former SHLAA 1925 Landican Village, South of Landican Road	328206	385555	Two blocks of woodland Priority Habitat are present on the site. In addition to this dwelling, agricultural buildings and improved grassland also present.	PEA at the planning application stage, along with details of tree and woodland protection measures.	Amber
1927	SHLAA 1927 Land off Lower Thingwall Lane	328317	384838	Sites comprises predominantly rank grassland and hardstanding of negligible ecological.	PEA at the planning application stage.	Green
1928	SHLAA 1928 South of Seaview Avenue, Eastham	336658	380637	Area of improved grassland, set back from QEII Dock	PEA at the planning application stage	Green
1929	SHLAA 1929 South of 112 Ferry Road, Eastham	336518	380498	Small site comprising predominantly woodland Priority Habitat.	N/A	Red
1930	SHLAA 1930 Land at Vineyard Farm, Bebington	333482	382014	Site predominantly arable land. However, site lies immediately adjacent to Dibbinsdale SSSI and Brotherton Park and Dibbinsdale LNR.	Mitigation would be required for both construction phase and operational phase impacts (i.e. increased recreational pressure) on the Dibbinsdale LNR and SSSI.	Amber
1932	SHLAA 1932 Land at Irby Farm, Thingwall Road	326001	384470	Site divided into two parcels. Northern parcel comprises predominantly arable land, whereas southern parcel appears to be pasture. Eastern boundary of northern parcel lies immediately adjacent to Harrock Wood, Irby LWS which also forms part of the West Wirral Heathlands and Arrowe Park Nature Improvement Area (NIA)	PEA at the planning application stage	Green

In some cases, information on the location of protected species and their related survey requirements has been withheld due to their sensitivity to disturbance and persecution

SHLAA Ref	Description	X	Y	Ecology Issues	Further Information Required	Ecology RAG Rating
1933	SHLAA 1933 Rear of The Ridgeway, Meols	323288	389078	Gilroy Pond and Hoylake Langfields WeBS Core Count Area falls within the site. Area is therefore of known importance for qualifying bird species associated with the Dee Estuary European Sites. The Birket forms the northern boundary of the site which predominantly comprises pasture. Records of various protected and notable species present in the vicinity of the site including common lizard, barn owl, water vole, otter, bats, skylark and grey partridge	Non-breeding bird survey and PEA required to inform allocation of site in Local Plan. At planning application stage assessment and mitigation of recreational pressure effects would also need to consider effects on adjacent WeBS Core Count Area.	Red
1934	SHLAA 1934 Paddock at Fornalls Green Lane, Meols	323254	389224	Site relatively enclosed by Fornalls Green Lane to the south, built development to the east and west and by hedgerow to north. Site therefore unlikely to be of value to qualifying bird species of the Dee Estuary European Sites. Site comprises predominantly improved grassland, although the Birket and hedgerow form the boundary features which have greater ecological value.	PEA at the planning application stage, along with details of how the Birket and site's boundary features would be protected during any future construction works.	Green
1935	SHLAA 1935 Stables at Fornalls Green Lane, Meols	323172	389193	Site comprises caravan storage compound with associated buildings and stables with paddock. Site unlikely to support qualifying bird species and is largely screened from the WeBS Core Count Area to the south by the Birket and hedgerow.	PEA at the planning application stage, along with details of how the Birket would be protected during any future construction works.	Green
1936	SHLAA 1936 Land at Meols	322998	389049	Gilroy Pond and Hoylake Langfields WeBS Core Count Area falls within the site which comprises predominantly arable land a stretch of the Birket. Area is therefore of known importance for qualifying bird species associated with the Dee Estuary European Sites. Site may also be of value for breeding birds, records of birds from the vicinity of the site include those for reed bunting, skylark, linnet, grey partridge and tree sparrow. There is also a record for hen harrier in proximity to the site.	Non breeding bird survey, breeding bird survey and PEA required in order to inform allocation of site in the Local Plan. At planning application stage assessment and mitigation of recreational pressure effects would also need to consider effects on adjacent WeBS Core Count Area.	Red
1937	SHLAA 1937 Adjacent Hoylake Rugby Club	322398	388978	Site comprises three fields, one is bounded by woodland and consists predominantly of amenity grassland. Remainder of the site comprises arable land, although this is relatively enclosed and is unlikely to provide optimum habitat for qualifying bird species.	Non-breeding bird survey and PEA at the planning application stage.	Amber
1938	SHLAA 1938 West of Wittering Lane, Heswall	325676	381442	Large arable field, with several woodland copses, which is situated immediately adjacent to the Dee Estuary SAC, SPA, Ramsar and SSSI. Site is situated within the Wittering Lane fields WeBS Core Count Area and is therefore of known importance for waterbirds associated with the Dee Estuary.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
1939	SHLAA 1939 South of Seabank Road, Heswall	326345	380701	Large arable field which is situated immediately adjacent to the Dee Estuary SAC, SPA, Ramsar and SSSI. Site is situated within the Wittering Lane fields WeBS Core Count Area and is therefore of known importance for waterbirds associated with the Dee Estuary.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
1940	SHLAA 1940 South of Park West, Heswall	326117	381030	Large arable field which is situated immediately adjacent to the Dee Estuary SAC, SPA, Ramsar and SSSI. Site is situated within the Wittering Lane fields WeBS Core Count Area and is therefore of known importance for waterbirds associated with the Dee Estuary.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
1941	SHLAA 1941 Rear of Hilbre Avenue, Heswall	326094	380859	Arable field which is situated immediately adjacent to the Dee Estuary SAC, SPA, Ramsar and SSSI. Site is situated within the Wittering Lane fields WeBS Core Count Area and is therefore of known importance for waterbirds associated with the Dee Estuary.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
1942	SHLAA 1942 South of Brimstage Road, Bebington	332378	382783	Site comprises arable fields, with hedgerows, several ponds, mature trees and woodland copses. Site falls within the Dibbinsdale, Raby Mere and Eastham Country Park Nature Improvement Area (NIA).	PEA at the planning application stage, surveys for amphibians, breeding birds and bats also likely to be required.	Amber
1943	SHLAA 1943 North of 35 to 51 Gilroy Road, West Kirby	322754	387777	Site forms part of the Gilroy Ponds and Hoylake Langfields WeBS Core Count Area. The site is of known importance to waterbirds associated with the Dee Estuary. Site also forms part of the River Birket Corridor NIA.	Non-breeding bird survey required in order to inform allocation of the site in the Local Plan.	Red
1944	SHLAA 1944 West of Column Road, West Kirby	323313	385657	Site is immediately adjacent to Stapledon Wood LWS. Woodland Priority Habitat is also present in the north eastern corner of the site.	PEA at the planning application stage and surveys for amphibians also likely to be required. If site allocated proposals will need to ensure that suitable no-development buffer is maintained between the development and the LWS. Any proposals should also seek to ensure that woodland Priority Habitat is retained and protected.	Amber
1945	SHLAA 1945 North of Landican	328584	386155	Site comprises arable land and improved grassland. No Priority Habitats present within the site.	PEA at the planning application stage	Green
1946	SHLAA 1946 West of Barnston	327320	383033	Agricultural fields bounded by hedgerows. Part of Barnston Dale LWS, which is ancient woodland, falls within northern boundary of site.	Alteration of the site boundary to avoid the ancient woodland could reduce the RAG rating to Amber. If site allocated any future development would need to ensure that an adequate no development buffer (e.g. 15m width) is put in place between the development and the ancient woodland LWS. PEA at the planning application stage.	Red
1947	SHLAA 1947 West of Raby Mere	332946	380955	Northern part of site is immediately adjacent to the Dibbinsdale SSSI which is ancient woodland. The southern part of the site includes the Raby Mere LWS and the southern boundary lies immediately adjacent to the Raby Mere WeBS Core Count Area. Raby Mere is known to be of value to waterbirds and ducks in particular. According to the LWS citation, the woodland supports four species of bat. In addition to bats, notable and protected species recorded locally include common toad and kingfisher. There are other areas of woodland on the site, which is outside the designated boundaries, but is still Priority Habitat. In addition to Raby Mere and woodland habitats, the site also includes improved / amenity grassland.	N/A	Red
1949	SHLAA 1949 South of Prenton Dell Road, Prenton	329353	385847	The majority of the site falls within the Prenton Dell and Claypits LWS which contains a mosaic of habitats including ponds. A large population of great crested newt have been recorded on the site.	N/A	Red
1950	SHLAA 1950 Land at Carr Lane Brickworks, Moreton	324319	389846	Majority of the site falls within the Moreton Brick Pits WeBS Core Count Area and is of known importance for waterbirds. Mosaic of habitats are present on the site, amongst which are wetland Priority Habitats. Northern section of site falls within the River Birket Corridor NIA.	Non-breeding bird surveys and PEA in order to inform allocation of site in the Local Plan.	Red
1951	SHLAA 1951 South of Thornton Hough	330456	380582	Site comprises predominantly arable with hedgerows. Several small copses are present which are woodland Priority Habitat. There is a pond on the site and several waterbodies within adjacent fields.	PEA at the planning application stage	Green
1952	SHLAA 1952 West of Limbo Lane, Irby	326561	385138	Site contains the Limbo Lane Pond, Irby LWS which has been found to support a considerable plant and animal diversity. Arrowe Park LWS lies immediately adjacent to the eastern boundary of the site. The site comprises predominantly arable land, with several ponds and a strip of woodland which is Priority Habitat.	PEA and amphibian surveys at the planning application stage. Also, details at the planning stage of how the LWSs and Priority Habitat are to be protected during the course of the development.	Amber
1953	SHLAA 1953 South of Willowbrow Road, Raby	331176	379702	Complex of modern agricultural buildings, with area of improved grassland, trees and hedgerow	PEA at the planning application stage	Green

In some cases, information on the location of protected species and their related survey requirements has been withheld due to their sensitivity to disturbance and persecution

SHLAA Ref	Description	X	Y	Ecology Issues	Further Information Required	Ecology RAG Rating
1954	SHLAA 1954 South of Woodchurch Road, Landican	328199	386256	Site predominantly arable land bisected by hedgerows. Brown hare, a Priority Species, are known to be present in the vicinity of the site.	PEA at the planning application stage	Green
1955	SHLAA 1955 Beech Farm, Barnston	328009	383111	Northern boundary of site lies adjacent to the Barnston Dale LWS, which is ancient woodland habitat. There are ponds on the site and records of great crested newt from the vicinity of the site.	A no-development buffer of 15m would be required along woodland edge in order to protect ancient woodland habitat. Alteration of the site boundary to avoid ancient woodland could reduce the RAG rating to Amber. PEA and amphibian surveys at the planning application stage.	Red
1956	SHLAA 1956 North of Whitfield Lane, Barnston	327920	382174	Site comprises predominantly arable land. A ditch forms the northern site boundary.	PEA at the planning application stage.	Green
1958	SHLAA 1958 North of Murrayfield Hospital, Thingwall	328649	384535	Northern boundary of site encroaches into Lower Heath Wood LWS, which is ancient woodland habitat. South-eastern boundary of site runs immediately adjacent to LWS boundary. A copse is present on site which is woodland Priority Habitat. Several ponds are present on the site (great crested newts have previously been recorded in the area) and the agricultural fields are bisected by hedgerows.	A no-development buffer of 15m would be required along woodland edge in order to protect ancient woodland habitat. Alteration of the site boundary to avoid ancient woodland could reduce the RAG rating to Amber. PEA and amphibians surveys at the planning application stage.	Red
1959	SHLAA 1959 South of Greenhouse Farm, Greasby	325850	386944	Site comprises farm complex, arable land with hedgerows and an area of woodland which forms the Greasby Copse and Ponds LWS. Amphibian populations have previously been recorded here including common toad, a Priority Species.	PEA and amphibian surveys at the planning application stage.	Amber
1961	SHLAA 1961 Land at Lodge Farm, Thornton Hough	329923	380746	Site comprises of farm buildings, with pasture and a pond surrounded by trees and shrubs.	PEA and amphibian surveys at the planning application stage	Green
1962	SHLAA 1962 Land at Rest Hill Road, Storeton	330976	384241	The eastern part of the site comprises the Storeton Wood Higher Bebington LWS and LGS. Small wooded copse (which is woodland Priority Habitat) and hedgerows also present on the site. Several ponds are also present on the site. Eastern part of site falls within the East Wirral Heathlands NIA.	PEA and amphibian survey at the planning application stage, along with details of how the LWS and LGS will be protected during the course of any construction works (e.g. through a no development buffer). Consideration will also need to be given to foraging and commuting bats given the proximity of the site to the regionally important bat roosts at Storeton Hall Farm.	Amber
1963	SHLAA 1963 Land at Keepers Lane, Storeton	330685	383908	Two strips of woodland are present upon the site which are Priority Habitat. There are also two ponds on the site situated within improved grassland and various buildings.	PEA and amphibian survey at the planning application stage, along with details of how woodland Priority Habitat would be protected during the course of construction.	Amber
1964	SHLAA 1964 Land on Grange Drive, Thornton Hough	330514	381105	Bat surveys undertaken in relation to application APP/ 17/01389 recorded the presence of a maternity roost of brown long-eared bats in one of the buildings on the site. Day roosts of common and soprano pipistrelle bats were also present.	Updated bat and breeding bird surveys at the planning application stage. Detailed bat mitigation measures also likely to be required at this stage.	Amber
1965	SHLAA 1965 North of 8 to 45 Farndon Drive, West Kirby	323084	387439	Site falls within the Frankby Fields WeBS Core Count Area and is therefore of known importance for waterbirds associated with the Dee Estuary. A tributary of the River Birkett corridor flows through the site and this is within the River Birkett Corridor NIA.	Non-breeding bird surveys required in order to inform allocation of the site in the Local Plan.	Red
1967	SHLAA 1967 Land at Wittering Lane, Heswall	325850	381553	Site lies immediately adjacent to the Dee Estuary SAC, SPA, Ramsar and SSSI and is functionally linked to the nationally and internationally designated sites. The site falls within the Whittering Lane Fields WeBS Core Count Area.	N/A	Red
1968	SHLAA 1968 South of Riverbank Road, Heswall	326553	380619	Site lies approximately 225m from the Dee Estuary SAC, SPA, Ramsar and SSSI, although it is separated from the protected sites by existing development. Site is relatively enclosed by housing development and hedgerow, although given it's proximity to the Dee Estuary, the potential presence of foraging and/or roosting waterbirds cannot be discounted. The northern boundary of the site lies adjacent to the Whittering Lane Fields WeBS Core Count Area. Wirral Way (Heswall to Borough Boundary) LWS lies immediately adjacent to the eastern site boundary.	Non-breeding bird surveys to inform allocation of site in the Local Plan.	Red
1969	SHLAA 1969 Land at Red Hill Road, Storeton	331124	383651	Woodland compartment on the eastern boundary is Priority Habitat. The majority of the site is improved grassland. The site falls within the East Wirral Heathlands NIA.	PEA at the planning application stage.	Green
1970	SHLAA 1970 Land at Pear Tree Farm, Raby Road	331030	380020	Site comprises improved agricultural grassland of negligible ecological value.	PEA at the planning application stage.	Green
1971	SHLAA 1971 35 Private Drive, Barnston	328575	384148	Residential property and garden which is directly adjacent to the Murrayfield Hospital, Thingwall LWS which contains ancient woodland habitat.	PEA at the planning application stage along with tree and woodland protection measures. No development buffer required along edge of woodland to ensure its protection at both construction and operational phases.	Amber
1973	SHLAA 1973 Plot 1 at Westward Ho, Broad Lane, Heswall	325284	381701	The Dee Estuary SAC, SPA, Ramsar and SSSI are located approximately 75m to the west of the site. Site is located within the Thurstaston Fields WeBS Core Count Area and is therefore of known importance for waterbirds.	Non-breeding bird surveys required in order to inform allocation of the site in the Local Plan.	Red
1976	SHLAA 1976 Land at Cleveley Road, Meols	323696	390058	Entire site falls within the Meols and Leasowe Lighthouse Fields WeBS Core Count Area and is therefore of known importance for waterbirds associated with the Dee Estuary European Sites.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
1977	SHLAA 1977 North of Barn Hey Crescent, Meols	323591	389727	The Birket passes through the site close to western boundary and the site falls within the River Birket Corridor NIA. Part of site appears to be used for horse grazing.	PEA at the planning application stage.	Green
1979	SHLAA 1979 Land east of 5 to 21 South Hey Road, Irby	325940	383893	Improved agricultural grassland with some hedgerow.	PEA at the planning application stage.	Green
1980	SHLAA 1980 South of Townshend Avenue, Irby	325742	383834	Site falls partly within, and lies adjacent to, the Thurstaston Fields WeBS Core Count Area. Site itself is overgrown and unmanaged and is therefore highly unlikely to provide opportunities for foraging and roosting waterbirds. However, adjacent areas are optimal (e.g. large, flat arable fields) and any development of the site could render these areas unsuitable for qualifying species during both the construction and operational phases.	Non-breeding bird survey in order to inform allocation of the site in the Local Plan.	Red
1981	SHLAA 1981 Land at Downham Road North, Heswall	327383	382757	Site comprises improved agricultural grassland, bounded by hedgerow.	PEA at the planning application stage.	Green
1982	SHLAA 1982 Land Rear of Greenheys Cottages, Barnston Road, Heswall	328491	382528	Site comprises predominantly arable land, site not within or adjacent to area of known importance for qualifying bird species. Woodland present in northern part of site which is Priority Habitat.	PEA at the planning application stage.	Green

In some cases, information on the location of protected species and their related survey requirements has been withheld due to their sensitivity to disturbance and persecution

1983	SHLAA 1983 North of East Farm Mews, Caldby	323564	385681	Strip of woodland present along the northern site boundary . Remainder of site comprises predominantly rank unmanaged grassland.	PEA at the planning application stage along with details of how harm to the woodland Priority Habitat will be avoided.	Amber
1984	SHLAA 1984 South of Old Clatterbridge Road, Spital	332848	382278	Majority of site arable with hedgerows. However, there are woodland parcels on the site outside of the designation which are Priority Habitat. Several ponds are also present.	PEA at the planning application stage along with details of how harm to the woodland Priority Habitat will be avoided.	Amber
2050	SHLAA 2050 Vacant Land at Clatterbridge Hospital	332029	382184	Western part of site contains Clatter Brook and area of woodland Priority Habitat. Remainder of site comprises hardstanding, rank grassland, scrub and tall ruderal vegetation.	PEA required at the planning application stage. Details of measures that would be undertaken to protect watercourse and woodland Priority Habitat also required at that stage.	Amber
2073	SHLAA 2073 Three Ways Garage, Clatterbridge	332215	382346	Existing car dealership and petrol station, with building, amenity grassland and hardstanding present.	Bat roost potential survey required at the planning application stage.	Green
3002	SHLAA 3002 Eastham Nurseries, 1392 New Chester Road	335954	379225	Nursery site which includes several buildings and structures, bare ground, ephemeral vegetation, hedgerow, trees and improved grassland.	PEA required at the planning stage.	Green
3003	SHLAA 3003 North of Greasby, Saughall Massie Road	352120	388105	Majority of the site falls within the Frankby Fields WeBS Core Count Area and is therefore of known importance for waterbirds associated with the Dee Estuary European sites. Several ponds present within the site and there are records of great crested newt from the area. Both Greasby Brook and Arrove Brook flow through the site, which may provide suitable habitat for riparian mammals. Site falls within the River Birket Corridor Nature Improvement Area (NIA).	Non-breeding bird survey, Preliminary Ecological Appraisal and amphibian survey in order to inform allocation of site in the Local Plan.	Red
3004	SHLAA 3004 South of Pear Tree Farm, Willaston Road	331948	380807	Site comprises predominantly football pitches of negligible ecological value. An area of woodland Priority Habitat is present within the site and runs parallel with the southern boundary. This woodland links to the Dibbinsdale SSSI which lies approximately 175m to the east of the site.	PEA at the planning application stage. Details also required as to how woodland Priority Habitat on-site will be protected during development (e.g. through a no-development buffer zone).	Amber
3007	SHLAA 3007 Diamond Farm, Saughall Massie	325415	388741	Complex of farm buildings.	Bat and breeding bird surveys at the planning application stage.	Green
3027	SHLAA 3027 Rear of Willow Bank House, Barnston	328717	381561	Site comprises building, garden and trees with pond also present. Other ponds are present off-site and there are records of great crested newt in the vicinity of the site.	PEA and amphibian surveys required at the planning application stage.	Amber
3028	SHLAA 3028 Autosave, 69 Eastham Village Road	336085	380288	Site comprises predominantly buildings and hardstanding.	Bat roost potential of buildings and any affected trees at planning application stage.	Green
3044	SHLAA 3044 Rear of Latchgate, Broad Lane, Heswall	325351	381767	Small enclosed area of scrub vegetation.	PEA at the planning application stage.	Green
3045	SHLAA 3045 Lot 1 at Westward Ho, Broad Lane, Heswall	325242	381793	Site is 110m E of Dee Estuary SAC, SPA, Ramsar and SSSI and is within the Thurston Fields WeBS Core Count Area which is of known importance to qualifying bird species. A pond is present on the site and there a network of ponds present immediately adjacent to it.	Non-breeding bird and amphibian surveys in order to inform the allocation of the site in the Local Plan.	Red
3046	SHLAA 3046 South of Gayton Parkway	328029	380226	Site comprises predominantly improved grassland.	PEA at the planning application stage.	Green

Submitted Green Belt Sites						
Environmental Constraint: Contaminated Land						
SHLAA Ref	Description	X	Y	Contaminated Land Issues	Further Information Required	Contaminated Land RAG Rating
511	SHLAA 0511 Raby Hall Autistic Centre, Raby	333217	380667.5	Historic maps show the presence of Raby Hall, converted for use by Wirral Autistic Society.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
526	SHLAA 0526 Land at Upton Waste Water Treatment V	327607	389100	Historic and current land use fields/scrubland. Adjacent to storm water tank.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
537	SHLAA 0537 South off Park Lane, Meols	324613	390491	Historic and current use as sewage works. Potential for contamination.	Phase I Desk Study required at planning application stage.	Amber
538	SHLAA 0538 Land off Lingham Lane, Moreton	324968	390732	Site immediately adjacent to a sewage pumping station on historic maps. The site is approx. 250m to an historic landfill (infilled clay pits) although tipping appears to have taken place within 30m of the site. The pumping station appears to be present in the current land use. The site itself appears to be undergoing some earthworks.	Phase I Desk Study required prior to allocation , depending upon the sensitivity of the proposed end use.	Amber
627	SHLAA 0627 East of George Road, Hoylake	322343	388721	Historic maps show site as a cricket ground and Ellerman Lines sports fields, including tennis court and pavilions. Land is currently vacant with some tipping present. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber
632	SHLAA 0632 Thornton Hough WWTW, Raby Road	330757	380548.6	Sewage works and associated tanks	Phase I Desk Study required at planning application stage.	Amber
637	SHLAA 0637 North of Oakmere Close, Leasowe	326235	391701	Historic use of the site for fields, an aircraft radio beacon, small buildings/sheds. The site is currently overgrown with disused sheds and possible areas of fly tipping. Mineral maps show site partially covered by made ground (possibly relating to the construction of the embankment).	Phase I Desk Study required at planning application stage.	Amber
638	SHLAA 0638 Garden Hey Nursery, Saughall Massie	325086	388913	Large pond (20m) present on the oldest historical maps. Nursery and associated greenhouses.	Phase I Desk Study required at planning application stage.	Amber
639	SHLAA 0639 Rear of Meadowbrook Road Moreton	325531	389256	Historically Arrowe Brook has run through the site. It appears to have altered its course over the years. The site is currently grassed and used as garden extension in some places.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
641	SHLAA 0641 North of White House, Broad Lane, Heswall	324781	382280	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
642	SHLAA 0642 North of Ferns Close, Heswall	325245	382409	Historical maps show the site as fields. Current land use is open space. No noted former contaminative use.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
643	SHLAA 0643 West of Latchgate, Broad Lane, Heswall	325371	381767	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
644	SHLAA 0644 Rear of Sandymount, Broad Lane	325439	381739	Historic and current land use fields across majority of the site. There is a property in the northern part of the site, number of sheds and waste material within the curtilage of this property.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
648	SHLAA 0648 West of Raby Hall, Raby Mere	333050	380572	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green

1933	SHLAA 1933 Rear of The Ridgeway, Meols	323288	389078	Historic maps and current land use show site as fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1934	SHLAA 1934 Paddock at Fornalls Green Lane, Meols	323254	389224	Historic land use show presence of nursery and large greenhouse. Currently a field with the storage of caravans along the western boundary. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber
1935	SHLAA 1935 Stables at Fornalls Green Lane, Meols	323172	389193	Historic land use shows the presence of four large ponds which appear to have been infilled. There was a nursery and greenhouses on site. The current land use includes, farm buildings, caravan storage, horse menage and piles of waste material. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber
1936	SHLAA 1936 Land at Meols	322998	389049	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1937	SHLAA 1937 Adjacent Hoylake Rugby Club	322398	388978	Previous land use includes fields, market gardens, sports ground. Potential for limited localised contamination.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1938	SHLAA 1938 West of Wittering Lane, Heswall	325676	381442	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1939	SHLAA 1939 South of Seabank Road, Heswall	326345	380701	Historical maps show Heswall railway station on the northern part of the site. Site currently fields, electricity substation adjacent to northern boundary and sewage pumping to south.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1940	SHLAA 1940 South of Park West, Heswall	326117	381030	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1941	SHLAA 1941 Rear of Hilbre Avenue, Heswall	326094	380859	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1942	SHLAA 1942 South of Brimstage Road, Bebington	332378	382783	Historic and current land use is agricultural fields. Two infilled ponds on the western boundary of the site.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1943	SHLAA 1943 North of 35 to 51 Gilroy Road, West Kirby	322754	387777	Historic and current land use fields. Site immediately adjacent to former landfill site.	Phase I Desk Study required prior to allocation .	Amber
1944	SHLAA 1944 West of Column Road, West Kirby	323313	385657	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1945	SHLAA 1945 North of Landican	328584	386155	Historic and current land use fields. There is a small Gas valve compound in the northern part of the site.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1946	SHLAA 1946 West of Barnston	327320	383033	Historical maps show the site as fields and open space. Current land use is open space. No noted former contaminative use.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1947	SHLAA 1947 West of Raby Mere	332946	380955	Raby (flour) Mill present on northern boundary of site. Current land use includes woodland, Raby Mere. Potential for localised contamination associated with the mill.	Phase I Desk Study required at planning application stage.	Amber
1948	SHLAA 1948 West of Plymyard Dale, Bromborough	333760	379930	Historic maps and current land use indicate the northern part of the site is part of Bromborough Golf Course. The central and southern areas are Hargravehouse Farm, farm buildings and agricultural fields. There were numerous ponds shown on the historic maps which appear to have been infilled. The creation of golf courses can involve the importation of material, therefore there is potential for limited contamination.	Phase I Desk Study required at planning application stage.	Amber
1949	SHLAA 1949 South of Prenton Dell Road, Prenton	329353	385847	Historic maps show the site as fields and then part of a sports ground. A large clay pit was located to the north of the site, which has been infilled and a large electricity sub station constructed. Potential for landfill gas from the infilled clay pit and localised contamination from the creation of the sports grounds.	Phase I Desk Study required at planning application stage.	Amber

SHLAA Ref	Description	X	Y	Contaminated Land Issues	Further Information Required	Contaminated Land RAG Rating
1950	SHLAA 1950 Land at Carr Lane Brickworks, Moreton	324319	389846	The site is immediately adjacent to a brickworks and curves around a large clay pit which has been infilled. There has been excavation on the site itself where large ponds have now formed. There are potential landfill gas issues associated with the infilled land.	Phase I Desk Study required prior to allocation .	Red
1951	SHLAA 1951 South of Thornton Hough	330456	380582	Both the historic maps and current land use show the site as fields with allotment gardens in the north. Potential for localised contamination associated with the allotments.	Phase I Desk Study required at planning application stage.	Amber
1952	SHLAA 1952 West of Limbo Lane, Irby	326561	385138	Historic and current land use fields. Western link power cable runs the length of the site.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1953	SHLAA 1953 South of Willowbrow Road, Raby	331176	379702	Historic maps show site as field. Current land use is large farming buildings and tank. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber
1954	SHLAA 1954 South of Woodchurch Road, Landican	328199	386256	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1955	SHLAA 1955 Beech Farm, Barnston	328009	383111	Historical maps show the site as fields and open space. Current land use is open space. No noted former contaminative use.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1956	SHLAA 1956 North of Whitfield Lane, Barnston	327920	382174	Historical maps show the site as fields and open space. Current land use is open space. No noted former contaminative use.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1958	SHLAA 1958 North of Murrayfield Hospital, Thingwall	328649	384535	Historical maps show the site as fields and open space. Current land use is grazing fields with stables and menage. No noted former contaminative use.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1959	SHLAA 1959 South of Greenhouse Farm, Greasby	325850	386944	Historic and current land use for agriculture. Fields and farm buildings included within site boundary. Potential for localised contamination. Western Link Power Cable may run within the southern boundary.	Phase I Desk Study required at planning application stage.	Amber
1961	SHLAA 1961 Land at Lodge Farm, Thornton Hough	329923	380746	Farm buildings and field shown on historic maps and current land use. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber
1962	SHLAA 1962 Land at Rest Hill Road, Storeton	330976	384241	Historic maps show fields. Current land use is agricultural with a number of buildings present in the south west of the site. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber
1963	SHLAA 1963 Land at Keepers Lane, Storeton	330685	383908	Historic maps indicate the presence of a nursery with associated greenhouses in the north of the site, kennels in the central area and poultry houses in the southern part of the site. The current land use includes a farm shop, grazing land and an area for storage of farm equipment and large machinery. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber
1964	SHLAA 1964 Land on Grange Drive, Thornton Hough	330514	381104.6	Historic maps show the presence of a Quarry in the northwest corner of the site. Hilltop Farm and associated tanks and silos shown on the historic and current maps.	Phase I Desk Study required prior to allocation .	Amber
1965	SHLAA 1965 North of 8 to 45 Farndon Drive, West Kir	323084	387439	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1967	SHLAA 1967 Land at Wittering Lane, Heswall	325850	381553	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1968	SHLAA 1968 South of Riverbank Road, Heswall	326553	380619	Historic and current land use fields. Historic maps show an unknown structure in the northwest corner of the site (possible garages)	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1969	SHLAA 1969 Land at Red Hill Road, Storeton	331124	383651	Motorway Maintenance Depot in the southern part of the site. Historical maps show buildings possibly associated with the kennels in the western part of the site. Clatterbridge Household Waste Recycling Centre in the south east of the site. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber

SHLAA Ref	Description	X	Y	Contaminated Land Issues	Further Information Required	Contaminated Land RAG Rating
1970	SHLAA 1970 Land at Pear Tree Farm, Raby Road	331030	380020	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1971	SHLAA 1971 35 Private Drive, Barnston	328575	384148	Residential garden	No	Green
1973	SHLAA 1973 Plot 1 at Westward Ho, Broad Lane, Heswall	325284	381701	Historic and current land use fields/scrubland. Large stable building on the western boundary.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1976	SHLAA 1976 Land at Cleveley Road, Meols	323696	390058	Historic and current use as fields. Western Link Power Cable runs through southwest corner of the site.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1977	SHLAA 1977 North of Barn Hey Crescent, Meols	323591	389727	Historic maps show site as fields. Current land use is grazing with stables.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1979	SHLAA 1979 Land east of 5 to 21 South Hey Road, Irby	325940	383893	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1980	SHLAA 1980 South of Townshend Avenue, Irby	325742	383834	Historic mapping shows the site as a field. Current land use is scrubland, with some grazing and sheds. Some piles of waste material present.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1981	SHLAA 1981 Land at Downham Road North, Heswall	327383	382757	Historical maps show the site as fields and open space. Current land use is open space. No noted former contaminative use.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1982	SHLAA 1982 Land Rear of Greenheys Cottages, Barnston Road, Heswall	328491	382528	Barnston Brick and Tile Works. Brickworks pit shown on historic maps. Potential for contamination from infilling of the pit.	Phase I Desk Study required prior to allocation .	Amber
1983	SHLAA 1983 North of East Farm Mews, Caldy	323564	385681	Historic and current land use fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
1984	SHLAA 1984 South of Old Clatterbridge Road, Spital	332848	382278	Historic and current land use is agricultural fields.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
2050	SHLAA 2050 Vacant Land at Clatterbridge Hospital	332029	382183.8	Historic maps show a workhouse and sewage works, which was replaced by Clatterbridge Hospital in the north and TA centre in the southwest. Numerous buildings covering entire site. Since demolished and site is currently grassed and hardstanding carparking. Potential for contamination associated with demolition of buildings.	Phase I Desk Study and Phase II Site Investigation required at planning application stage.	Amber
2073	SHLAA 2073 Three Ways Garage, Clatterbridge	332215	382345.5	Historic maps show layout indicative of possible petrol filling station on part of the site. Current land use is a car sales garage	Phase I Desk Study required at prior to allocation .	Amber
3002	SHLAA 3002 Eastham Nurseries, 1392 New Chester Road	335954	379224.9	Historic maps show the presence of Eastham Windmill, Mill Farm and Mill Nursery on site. Approx. 30m to infilled pit to the south of the site. Currently the site is a nursery and Urban Farm. Potential for localised contamination.	Phase I Desk Study required at planning application stage.	Amber
3003	SHLAA 3003 North of Greasby, Saughall Massie Road	352120	388105	Site is fields and Greasby Equestrian Centre	Phase I Desk Study required at planning application stage.	Amber
3004	SHLAA 3004 South of Pear Tree Farm, Willaston Road	331948	380807	Historical maps show the site as fields before it is marked as playing fields with pavilion. Current land use is sports pitches and pavilion.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
3007	SHLAA 3007 Diamond Farm, Saughall Massie	325415	388741	Historic and current land use farm buildings.	Phase I Desk Study required at planning application stage. Potential for localised contamination.	Amber
3027	SHLAA 3027 Rear of Willow Bank House, Barnston	328717	381560.6	Majority of the site is covered by a large pond. Stables in the north.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
3028	SHLAA 3028 Autosave, 69 Eastham Village Road	336085	380287.5	Previous land uses include a builders yard and car garage. Potential for contamination.	Phase I Desk Study and Phase II Site Investigation required at planning application stage.	Amber
3044	SHLAA 3044 Rear of Latchgate, Broad Lane, Heswall	325351	381767	Historic and current land use fields/scrubland.	A proportionate level of site investigation may be required at planning application stage depending on the sensitivity of proposed end use.	Green
