

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246747	LPIO-10235	yes							
1246776	LPIO-10350	no	Need to work with local communities and ensure any new developments include local shops, libraries, cultural and community centres, and green spaces as well as schools and medical centres. Cultural activities extend beyond cinema, bingo and ten-pin bowling. Would Birkenhead need a multi-purpose theatre / performance building? The approach needs to include analysis of access to green and blue spaces which support communities. Licensing of fast-food outlets, or premises for sale or consumption of alcohol, or gambling shops, should be decreased, especially in the vicinity of schools. Recycling must be improved. Social infrastructure includes recycling facilities. Make manufacturers/ commercial businesses responsible for/pay for recycling of items they supply. Food-waste recycling along with reduction of frequency of waste-collections should be a priority. We need local capacity to simultaneously process garden and food waste. District and Local Centres: community cafés, growing spaces, community banks, and cultural centres need to be a big part of such places – not just conventional retail. Plan for schools, health, leisure, special needs going forward is inadequate given the scale of housebuilding requirements.						
1246724	LPIO-10555	yes							
1246782	LPIO-10560	yes	As highlighted in our response to Question 6.11, it must be ensured the plan contains policies which robustly protect community, cultural and social facilities which are valued by local people - such as community halls, cinemas, theatres/arts centres and pubs - and sets criteria by which proposals for loss will be assessed such as evidence of marketing through appropriate channels at a value reflective of condition and existing use without development potential, and that the facility is no longer required by the community and could not be used for alternative community use.						
1241337	LPIO-10751	yes							
1246242	LPIO-10988		Part of the Council's remit, is to review on a regular basis and improve existing social infrastructure when necessary. This must be used in a positive way and not the unnecessary building of more and more houses. Growth in businesses and industry is required first.						
1243890	LPIO-1134	yes							
1247196	LPIO-11610		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247214	LPIO-12440		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247492	LPIO-12539		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1240843	LPIO-12701		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247578	LPIO-12900		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247510	LPIO-13023		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246335	LPIO-13162		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.

1246853	LPIO-13415		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246852	LPIO-13539		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247746	LPIO-13695		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1242183	LPIO-14013		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247219	LPIO-14211		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247220	LPIO-14309		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247222	LPIO-14438		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247226	LPIO-14528		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247245	LPIO-14623		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246827	LPIO-14744		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1243700	LPIO-1478	no	The needs should be assessed before potential expansion or new provision is planned. What is the point in directing new developments to areas or settlements which can't cope with increasing numbers?						
1241412	LPIO-153	yes							
1247246	LPIO-15363		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247248	LPIO-15493		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1244901	LPIO-1552	yes							
1247251	LPIO-15586		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247252	LPIO-15673		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247274	LPIO-15776		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247275	LPIO-15917		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247936	LPIO-16045		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247287	LPIO-16239		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247344	LPIO-16327		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247349	LPIO-16414		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247353	LPIO-16502		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247354	LPIO-16596		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1244969	LPIO-1667	no	Not while there is a consideration for Green Belt release. The approach is correct for regeneration and recycling of derelict land						
1247434	LPIO-16693		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247436	LPIO-16804		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247437	LPIO-16987		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247441	LPIO-17101		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247960	LPIO-17222		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247962	LPIO-17309		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247971	LPIO-17519		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1241726	LPIO-17620		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247979	LPIO-17768		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247980	LPIO-17769		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1245502	LPIO-17909		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247541	LPIO-18008		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247539	LPIO-18115		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1247996	LPIO-18285		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1237857	LPIO-18338		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1245060	LPIO-1899	no	Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1237833	LPIO-19860		The HBF consider that the Council will need to ensure that they have the evidence to support this policy. The NPPF states that 'Plans should set out the contributions expected from development. This should include setting out the levels and types of affordable housing provision required, along with other infrastructure (such as that needed for education, health, transport, flood and water management, green and digital infrastructure). Such policies should not undermine the deliverability of the Plan'. The HBF consider that evidence should be able to determine the contributions expected in terms of need and viability, and that this should be clearly set out within the Plan. It will be important for the Council to ensure that the requirements of any policy requirements in relation to social infrastructure do not undermine the delivery of homes in the area.						
1246851	LPIO-21196		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246918	LPIO-21400		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246924	LPIO-21401		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246928	LPIO-21402		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246920	LPIO-21605		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246926	LPIO-21606		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1245112	LPIO-2181	yes							
1238379	LPIO-2256		Our social infrastructure should be reviewed and improved on a regular basis. However, the Council should be identifying realistic needs, not those based on an flawed estimation of future population growth.						
1242519	LPIO-2280	no	Council needs to improve existing social infrastructure not build more and more houses just to satisfy unnecessary targets.						
1241016	LPIO-229	yes							
1245100	LPIO-2319	no	We need to work with local communities to ensure any new developments include shops, libraries, cultural and community centres and green spaces as well as schools and medical centres. The approach needs to include an analysis of access to green and blue spaces which support communities. The licensing of fast-food outlets, or premises for the sale or consumption of alcohol or gambling should be decreased especially in the vicinity of schools. Recycling must be improved. Social infrastructure must include recycling facilities. Manufacturers should be made responsible for/pay for the recycling of items they supply. Food waste recycling should be a priority. District and local centres, community cafes, growing spaces, community banks and cultural centres need to be a big part of such spaces. - Not just conventional retail. The plan for schools, health, leisure and access and provision for those with special needs is inadequate given the scale of house building requirements.						
1242185	LPIO-23939	yes	Yes and to support climate change policies there should be some policy hooks so applicants should demonstrate how their proposals will support the Council's commitment to reducing greenhouse gas emissions.	https://wirral-consult.objective.co.uk/file/5659121	https://wirral-consult.objective.co.uk/file/5684263	https://wirral-consult.objective.co.uk/file/5657006			
1244826	LPIO-2462	yes	The council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for the unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1242697	LPIO-24711		Capacity assessments are important. For example, the Marine Lake Health Centre in West Kirby is overstretched now. Whatever evidence the local NHS trust has given, the patents are clear about the difficulty in securing GP appointments, waiting times, and the general business of the centre. Different health centres will have different issues; the elderly dominate West Kirby, for example. Importantly, there is a range of health centres in the eastern part of the borough. A modest increase in their capacities would add a substantial overall facility, to support development in the regeneration areas. The proximity to hospitals is also important.	https://wirral-consult.objective.co.uk/file/5659118	https://wirral-consult.objective.co.uk/file/5659119	https://wirral-consult.objective.co.uk/file/5659120	https://wirral-consult.objective.co.uk/file/5659121		
1248749	LPIO-24900		We agree with the approach. The approach to developer contributions should be set out in the Draft Local Plan and the requirements per site allocation should be identified in the final Infrastructure Development Plan. This needs to be given considerable thought and take account of the growth envisaged within the Plan and the results of the Viability Study. The Issues and Options report currently directs the largest growth within the Borough to brownfield land in the lowest value areas which are unviable. Very little growth is directed to greenfield land in the highest value areas, which are viable.	https://wirral-consult.objective.co.uk/file/5684847	https://wirral-consult.objective.co.uk/file/5684848	https://wirral-consult.objective.co.uk/file/5684845			
1248769	LPIO-25019		We agree with the approach. The approach to developer contributions should be set out in the Draft Local Plan and the requirements per site allocation should be identified in the final Infrastructure Development Plan. This needs to be given considerable thought and take account of the growth envisaged within the Plan and the results of the Viability Study. The Issues and Options report currently directs the largest growth within the Borough to brownfield land in the lowest value areas which are unviable. Very little growth is directed to greenfield land in the highest value areas, which are viable.	https://wirral-consult.objective.co.uk/file/5659045	https://wirral-consult.objective.co.uk/file/5684957	https://wirral-consult.objective.co.uk/file/5659039	https://wirral-consult.objective.co.uk/file/5659038	https://wirral-consult.objective.co.uk/file/5684956	

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1248823	LPIO-25123		We agree with the approach. The approach to developer contributions should be set out in the Draft Local Plan and the requirements per site allocation should be identified in the final Infrastructure Development Plan. This needs to be given considerable thought and take account of the growth envisaged within the Plan and the results of the Viability Study. The Issues and Options report currently directs the largest growth within the Borough to brownfield land in the lowest value areas which are unviable. Very little growth is directed to greenfield land in the highest value areas, which are viable.	https://wirral-consult.objective.co.uk/file/5674317	https://wirral-consult.objective.co.uk/file/5684865	https://wirral-consult.objective.co.uk/file/5684849			
1248832	LPIO-25233		We agree with the approach. The approach to developer contributions should be set out in the Draft Local Plan and the requirements per site allocation should be identified in the final Infrastructure Development Plan. This needs to be given considerable thought and take account of the growth envisaged within the Plan and the results of the Viability Study. The Issues and Options report currently directs the largest growth within the Borough to brownfield land in the lowest value areas which are unviable. Very little growth is directed to greenfield land in the highest value areas, which are viable.	https://wirral-consult.objective.co.uk/file/5684857	https://wirral-consult.objective.co.uk/file/5659562				
1248833	LPIO-25337		We agree with the approach. The approach to developer contributions should be set out in the Draft Local Plan and the requirements per site allocation should be identified in the final Infrastructure Development Plan. This needs to be given considerable thought and take account of the growth envisaged within the Plan and the results of the Viability Study. The Issues and Options report currently directs the largest growth within the Borough to brownfield land in the lowest value areas which are unviable. Very little growth is directed to greenfield land in the highest value areas, which are viable.	https://wirral-consult.objective.co.uk/file/5661125	https://wirral-consult.objective.co.uk/file/5661100	https://wirral-consult.objective.co.uk/file/5661124	https://wirral-consult.objective.co.uk/file/5661129		
1248956	LPIO-25415		Agree with the approach. The approach to developer contributions should be set out in the Draft Local Plan, and the requirements per site allocation identified in the final Infrastructure Delivery Plan. Clearly, this needs to be given considerable thought and take account of the growth envisaged within the plan and of the results of the 2018 Viability Study. The Issues and Options Consultation report currently directs the largest growth within the Borough to previously developed land in the lowest value areas which are unviable. Very little growth is directed to greenfield land in the highest value areas and which are viable.	https://wirral-consult.objective.co.uk/file/5677474	https://wirral-consult.objective.co.uk/file/5684859				
1248986	LPIO-25547		We agree with the approach. The approach to developer contributions should be set out in the Draft Local Plan and the requirements per site allocation should be identified in the final Infrastructure Development Plan. This needs to be given considerable thought and take account of the growth envisaged within the Plan and the results of the Viability Study. The Issues and Options report currently directs the largest growth within the Borough to brownfield land in the lowest value areas which are unviable. Very little growth is directed to greenfield land in the highest value areas, which are viable.	https://wirral-consult.objective.co.uk/file/5662723	https://wirral-consult.objective.co.uk/file/5662725	https://wirral-consult.objective.co.uk/file/5662770			
1249015	LPIO-25603	yes	Agree with the approach. The approach to developer contributions should be set out in the Draft Local Plan, and the requirements per site allocation identified in the final Infrastructure Delivery Plan. Clearly, this needs to be given considerable thought and take account of the growth envisaged within the plan and of the results of the 2018 Viability Study. The Issues and Options Consultation report currently directs the largest growth within the Borough to previously developed land in the lowest value areas which are unviable. Very little growth is directed to greenfield land in the highest value areas and which are viable.	https://wirral-consult.objective.co.uk/file/5684897					
1246458	LPIO-25800		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246459	LPIO-25801		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1242950	LPIO-2581	yes	We agree with the approach and work with partners to undertake capacity assessments of existing social infrastructure and identify clear needs arising from the growth. All too often such assessments are not undertaken albeit financial contributions are still sought.						
1242155	LPIO-25888	yes	Yes. In addition it should be noted that increased demand arising through growth can support the viability and growth of social infrastructure. On this basis option 2a proposing dispersed Green Belt release should be considered the preferred model as oppose to option 1a or 2b that will focus demand and opportunity in only a limited location hence benefits to wider communities will be limited.						

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1249116	LPIO-25939		Support working with partners to undertake capacity assessments of existing social infrastructure, which are necessary to understand what is existing and what is required and how future development can assist in improving social infrastructure would not support any policy requirement which would render developments unviable or undeliverable and reserve the right to comment when further detail is released at a later stage of the process.	https://wirral-consult.objective.co.uk/file/5674092	https://wirral-consult.objective.co.uk/file/5684836	https://wirral-consult.objective.co.uk/file/5674096	https://wirral-consult.objective.co.uk/file/5674095	https://wirral-consult.objective.co.uk/file/5674093	https://wirral-consult.objective.co.uk/file/5684833

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1249782	LPIO-26437		We fully support the approach to undertake capacity assessments of existing social infrastructure, which is an important consideration to inform the spatial strategy of the emerging Local Plan. Further work needs to be done to understand the viability considerations-i.e. whether this could lead to issues in housing delivery where viability issues are known (including the central commercial area). Such assessments, and indeed infrastructure overall, should be used to inform the spatial strategy and to confirm it can be achieved. We recommend that a dispersed approach to growth, located throughout the Borough, will be required to ensure that development and its associated infrastructure can be viably delivered.	https://wirral-consult.objective.co.uk/file/5683892					
1245180	LPIO-2755	no	Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1237546	LPIO-2875	yes	Development should be concentrated where there is already infrastructure to support it if possible. Individual proposals will have to be assessed by Wirral Wildlife on their environmental impacts as they come forward. In general, development in the urban area is less likely to require environmentally-damaging infrastructure works than in the countryside, so Options 1A/1B are most sustainable. Option 2B would require a particularly large amount of new infrastructure, and so is less sustainable in this regard than Option 2A. It would also generate much new car traffic, which is not sustainable.						
1245159	LPIO-3065	no	Developers should be required to make provision for infrastructure and social facilities in or around the developments through direct provision or financial contributions with a more robust approach taken by Wirral Council through the planning system.						
1245287	LPIO-3156	yes							
1241315	LPIO-3307	yes	Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1238835	LPIO-3391	no	In view of the definition of "social infrastructure" then Council should always seek to meet the needs of the population. This needs review on a regular basis. However, as growth in the borough is shown to be declining in real terms then I'm not sure what you hope to achieve by this statement. Your evidence suggests that we already have enough schools, GP's and leisure services to support Wirral residents currently. Therefore, this seems to confirm we have a stable population and do not need the 12000 housing units suggested. If this ever changed then consultation with your partners would be the least that I would expect.						
1237944	LPIO-3429	yes							
1245451	LPIO-3585	yes	It is important to fill gaps in park and playing field provision in the community especially as part of new developments.						
1245462	LPIO-3637	yes							
1237827	LPIO-3818	yes							
1245288	LPIO-3888	yes							
1245599	LPIO-4062	no	Assess and improve existing social infrastructure without building more homes on green belt.						
1240939	LPIO-4167	yes							
1245346	LPIO-4171	no	Need to work with local communities and ensure any new developments include local shops, libraries, cultural and community centres, and green spaces as well as schools and medical centres. Cultural activities extend beyond cinema, bingo and ten-pin bowling. Would Birkenhead need a multi-purpose theatre / performance building? The approach needs to include analysis of access to green and blue spaces which support communities. Licensing of fast-food outlets, or premises for sale or consumption of alcohol, or gambling shops, should be decreased, especially in the vicinity of schools. Recycling must be improved. Social infrastructure includes recycling facilities. Make manufacturers/ commercial businesses responsible for/pay for recycling of items they supply Food-waste recycling along with reduction of frequency of waste-collections should be a priority. We need local capacity to simultaneously process garden and food waste. District and Local Centres: community cafés, growing spaces, community banks, and cultural centres need to be a big part of such places – not just conventional retail. Plan for schools, health, leisure, special needs going forward is inadequate given the scale of housebuilding requirements.						
1245638	LPIO-4300	yes	Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.

1237667	LPIO-4584	yes							
1245416	LPIO-4651	yes							
1237696	LPIO-4733	yes							
1244629	LPIO-4791		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1243171	LPIO-4977	yes	As commented before, infrastructure should include adequate open (preferably green) space, for health and recreation of local communities.						
1245713	LPIO-5115	yes	Council should be improving existing Social infrastructure and constantly review. For future growth this should be used positively and not always for unnecessary building of more houses. We should encourage industry and business growth.						
1241065	LPIO-515	no	The council fails to realise that the best way to combat residents poor health and fitness is to provide safe, clean, peaceful corridors for them to walk, cycle, and run. Just look at the amount of people who uses the Wirral Way and New Brighton to Seacombe promenade. Indoor sports facilities are good, but specialised.						
1245496	LPIO-5238	yes	The council should be regularly reviewing existing social infrastructure To review and improve as necessary and where required. This does not include unnecessary buildings or houses where they are not required.						
1239571	LPIO-5278	yes							
1242372	LPIO-5344	yes							
1245954	LPIO-5525	yes							
1242541	LPIO-5688	no	<p>Need to work with local communities and ensure any new developments include local shops, libraries, cultural and community centres, and green spaces as well as schools and medical centres. Cultural activities extend beyond cinema, bingo and ten-pin bowling. Would Birkenhead need a multi-purpose theatre / performance building? The approach needs to include analysis of access to green and blue spaces which support communities</p> <ul style="list-style-type: none"> • Licensing of fast-food outlets, or premises for sale or consumption of alcohol, or gambling shops, should be decreased, especially in the vicinity of schools. • Recycling must be improved. Social infrastructure includes recycling facilities. Make manufacturers/ commercial businesses responsible for/pay for recycling of items they supply • Food-waste recycling along with reduction of frequency of waste-collections should be a priority. We need local capacity to simultaneously process garden and food waste. • District and Local Centres: community cafés, growing spaces, community banks, and cultural centres need to be a big part of such places – not just conventional retail • plan for schools, health, leisure, special needs going forward is inadequate given the scale of housebuilding requirements. 						
1245984	LPIO-5756	yes	Provided any new developments, schools, doctors, hospitals, early years centres, golf courses etc. are all sustainably developed and not built on green belt or green spaces. Development should be considered to produce a combination of libraries and hire shops that loan everyday items to the public but under Local Authority control. These would help reduce consumerism and reduce carbon footprints. A library of things operates in London. This site in Crystal Palace has saved 15,900 kg of waste from landfill.						
1244896	LPIO-5838	yes	Yes. The Council should be improving existing social (and other) infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough, then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome but properly catered for. Applications for sizeable developments should not be approved without the effects on all forms of infrastructure having been identified, independently verified and provided in advance of the developments coming on stream, employing legal agreements (106 agreements, etc.), financial deposits and penalties, and 'claw-back' as appropriate. And to support climate change policies there should be some policy 'hook's so applicants should demonstrate how their proposal will support the Council's commitment to reducing greenhouse gas emissions.						

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246310	LPIO-5965		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, Not for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1238310	LPIO-6183	no	The approach laid out in the document is not employed or reflected in the plan Site selections for greenbelt options have been made without proper consideration of available schools or health services 7.41 School place planning and implications for NHS services are a particularly important part of Infrastructure Delivery Plan (IDP) development. It is considered that there is capacity within existing schools and GP practices to accommodate the overall level of growth planned. Sites will however be considered on an individual and cumulative basis within the final IDP to identify any gaps, areas where there would be increased pressure on existing services, and if additional capacity is required. The greenbelt sites have already been chosen. The stage 1 IDP and Spatial Portrait report 2020 has already identified the schools in the option 2a area Irby are full without the capacity to expand. There is one dentist and no doctor. The Spatial Portrait report confirms Mott MacDonald's report that accessibility to schools doctors, food and employment centers is poor for Irby and Option 2a It also confirms for area 7 Irby Parks and gardens, natural and semi-natural greenspace and amenity greenspace each fall below the national guideline for provision. There is a shortage of facilities for children and young people and outdoor sports and a number of football teams travel to sites outside the Settlement Area for home fixtures The plan intends to put 1250 extra homes in Irby. WBC is not applying the information, evidences base or NPPF principles they have to form the plan. The final draft plan is only 3 months away. There is nothing in the plan to resolve the issues and not time to complete the necessary investigations. WBC need more time to complete the plan properly.						
1246161	LPIO-6248	yes	WUTH supports the approach to undertaking capacity assessments of existing social infrastructure, particularly any sports or activity related facilities and those linked to promoting healthy lifestyles.						
1242751	LPIO-638		Council should be improving existing social infrastructure and review it on a regular basis. If in the future there were to be any growth in our Borough then this should be used in a positive way, not always for unnecessary building of more and more houses. Growth in industry and business should always be welcome.						
1246402	LPIO-6470	yes							
1241661	LPIO-6828	no	Need to work with local communities and ensure any new developments include local shops, libraries, cultural and community centres, and green spaces as well as schools and medical centres. Cultural activities extend beyond cinema, bingo and ten-pin bowling. Would Birkenhead need a multi-purpose theatre / performance building? 1246202	LPIO-8869	yes							
1240653	LPIO-8907	no	The current agreements that the council has signed up to with these partners leaves the council in a very weak bargaining position, but with significant liabilities for the consequences of failure.						
1241770	LPIO-8917	no	The current agreements which the council have signed up to with these partners leaves the council in a very weak bargaining position but with significant liabilities with the consequences of failure i.e the current situation with 'walk -in centre' closures which the council (and thousands of residents) objected to but still went ahead as ordained by the CCG.						
1246631	LPIO-8941	yes							
1246598 (Hoylake Vision)	LPIO-9051	yes							
1240872	LPIO-9128	no	This needs to be centralised and not open to abuse by third parties with an invested interest.						
1239377	LPIO-9192	yes							

Person ID	ID	Question 7.5 - Do you agree with our approach to work with our partners to undertake capacity assessments of existing social infrastructure, identify needs arising from growth and the opportunity for potential expansion or new provision as appropriate?	Question 7.5a - If you answered No, what what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246651	LPIO-9202	no	The Council needs to work with local communities and ensure any new developments include local shops, libraries, cultural and community centres and green spaces, as well as schools and medical centres. Cultural activities extend beyond cinema, bingo and ten-pin bowling. Should Birkenhead have a multi-purpose theatre or performance building ? The approach needs to include analysis of access to green and blue spaces which support communities. Licensing of fast-food outlets or premises for the sale or consumption of alcohol or gambling shops should be decreased especially in the vicinity of schools. Recycling must be improved. Social infrastructure includes recycling facilities. Manufacturers and commercial businesses should be responsible for paying for recycling of items they supply. Food waste recycling along with reduction of frequency of waste collections should be a priority. We need local capacity to simultaneously process garden and food waste. District and local centres should have community cafes, growing spaces and community banks and cultural centres need to be a big part of such places not just conventional retail. The plan for schools, health, leisure and special needs going forward is inadequate given the scale of house building requirements.

1245289	LPIO-9322	yes							
1246678	LPIO-9376	yes							
1241495	LPIO-9456	yes	New development should be concentrated where there is already infrastructure in place to support it. Development in the urban area is less likely to require potentially environmentally-damaging infrastructure works than in the Green Belt. In this regard Options 1A/1B is the most sustainable. Option 2B would require a particularly large amount of new infrastructure, and so this would be less sustainable than Option 2A.						
1246624	LPIO-9457	yes							
1242554	LPIO-9698	no	This appears to be reactive rather than proactive. We believe that Wirral Council should not support development that 'just builds homes.' Development that builds communities (with accessible active and passive green spaces, walkable retail, walkable work places and relevant community facilities) should be supported by development policies.
