

Person ID	ID	Question 8.20 - Do you agree with our preferred approach for planning for waste within Wirral as part of a wider City Region partnership?	Question 8.20a - If you answered No, what would you change and why? Do you have an alternative approach? If Yes, you can comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246724	LPIO-10620	no	Wirral should work with the City Region partnership but should protect Wirral's environment.						
1241065	LPIO-10651	no	There is nothing saying how poorly waste management in Wirral is and how much better everyone should be doing.						
1241337	LPIO-10724	yes	Yes this is a good idea as long as Wirral's environment is protected. I am very disheartened by Wirral's lack of effective recycling. why can other parts of the country get far better recycling facilities and recycling commitment. It is awful that we can't even recycle yogurt pots and plastic trays - half of my general waste comprises plastics that could be recycled if I lived in London!						
1246544	LPIO-10756	yes	The Council needs to plan for reducing, reusing, and recycling in any development. Local facilities are needed to process garden and food waste together to facilitate collection of food waste						
1246242	LPIO-11009		We need to protect the Wirral environment whilst working with the City Region partnership.						
1243890	LPIO-1154	yes							
1247196	LPIO-11630		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247214	LPIO-12463		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247492	LPIO-12566		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1240843	LPIO-12721		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247578	LPIO-12922		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247510	LPIO-13045		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1246335	LPIO-13183		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1246853	LPIO-13436		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1246852	LPIO-13562		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247746	LPIO-13717		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247015	LPIO-13780		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1238192	LPIO-13835		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247012	LPIO-13889		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247014	LPIO-13944		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1244681	LPIO-1400	yes	Plan for reduce, reuse and recycle in any development. We need local facilities to simultaneously process garden and food waste to facilitate the easy collection of food waste.						
1242183	LPIO-14036		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247218	LPIO-14129		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247219	LPIO-14235		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247220	LPIO-14330		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247222	LPIO-14458		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247226	LPIO-14548		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247245	LPIO-14646		Wirral should work with the City Region partnership but should protect Wirral's environment.						

Person ID	ID	Question 8.20 - Do you agree with our preferred approach for planning for waste within Wirral as part of a wider City Region partnership?	Question 8.20a - If you answered No, what would you change and why? Do you have an alternative approach? If Yes, you can comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247829	LPIO-14676		Waste management. I fully agree that Wirral, especially as it is a rather small Local Authority, should work together with other authorities within a City Region partnership, to plan resource allocation for the collection and management of waste. I am very disappointed that the amount of recycling has dropped and expect the Council to improve on this aspect of waste management, indeed to encourage people to reduce waste by re-using goods as much as possible, then recycle them before throwing them out. (An absolute necessity in the fight against Climate change!)						
1246827	LPIO-14764		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247016	LPIO-14881		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247018	LPIO-14949		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247246	LPIO-15384		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1243700	LPIO-1540	yes	More effort can be made in the recycling of waste. The public should be made more aware of what can be recycled. Fast food outlets and other retail establishments (including supermarkets) should be financially incentivized to produce less waste						
1247248	LPIO-15514		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1241412	LPIO-156	no	All authorities should recycle as much household waste as is possible. Some areas can recycle things that Wirral can't. A one recycle strategy for the combined authority would be extremely useful for all residents. If Wirral don't recycle one thing but Sefton does why can't we in Wirral still put it in our recycle bin and it is separated and then taken to the facility which does in the combined region.						
1247251	LPIO-15606		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247252	LPIO-15693		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247274	LPIO-15797		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247275	LPIO-15951		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247936	LPIO-16065		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247287	LPIO-16259		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247344	LPIO-16347		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247349	LPIO-16434		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247353	LPIO-16523		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247354	LPIO-16617		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247434	LPIO-16721		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247436	LPIO-16825		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247935	LPIO-16964		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247437	LPIO-17026		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247439	LPIO-17027		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247441	LPIO-17121		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247960	LPIO-17242		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247962	LPIO-17334		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247966	LPIO-17444		Wirral should work with the City Region partnership but should protect Wirral's environment.						

Person ID	ID	Question 8.20 - Do you agree with our preferred approach for planning for waste within Wirral as part of a wider City Region partnership?	Question 8.20a - If you answered No, what what would you change and why? Do you have an alternative approach? If Yes, you can comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247971	LPIO-17540		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1244969	LPIO-1756	yes							
1241726	LPIO-17640		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247979	LPIO-17819		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247980	LPIO-17820		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1242966	LPIO-17839		Merseyside Waste Authority, needs to fundamentally improve its waste recycling ability and needs to make a more concerted effort and develop greater target for waste reduction and recycling. This will in turn reduce the demand for waste facilities. Wirral is behind many nearby authorities in the ability to recycle household waste. Overall the emerging plan needs to strengthen its ambitions for a sustainable plan, that preserves and enhances both the historic and green environment. there is very little reference to the built heritage of the Borough. the east of the borough has already witnessed an erosion to the quality of its environment as result of over engineered road infrastructure and a concerted effort led by the emerging development plan for the Borough needs to set out a clear framework for repairing and improving this environment. I should be grateful if you would take the above comments into consideration as you further develop the draft plan.						
1245502	LPIO-17932		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247541	LPIO-18037		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247539	LPIO-18143		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247996	LPIO-18323		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1237857	LPIO-18358		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247021	LPIO-18430		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247022	LPIO-18484		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247023	LPIO-18539		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247025	LPIO-18713		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247038	LPIO-18714		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247039	LPIO-18825		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247040	LPIO-18826		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247041	LPIO-18887		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1247042	LPIO-18952		Wirral should work with the City Region partnership but should protect Wirral's environment.

1247179	LPIO-23414		Wirral should work with the City Region partnership but should protect Wirral's environment.						

Person ID	ID	Question 8.20 - Do you agree with our preferred approach for planning for waste within Wirral as part of a wider City Region partnership?	Question 8.20a - If you answered No, what what would you change and why? Do you have an alternative approach? If Yes, you can comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1242185	LPIO-23959		We acknowledge the role of the Joint Waste Local Plan for Merseyside and Halton. It does, however, recommend that Local Plan policies support sustainable development based on the waste hierarchy to avoid, reuse and recycle waste, to avoid landfilling, which is ultimately an unsustainable land use. The previous approach of sending our waste overseas is no longer an option, and plastic is causing serious harm to our marine and land environments. Consequently, the Council should ensure that effective policies aimed at waste reduction at the design, delivery and operation phases of development are included in the Local Plan. Good waste management policies should not be an afterthought, or it will lead to potentially high costs to the environment and to Council and to residents and businesses through Council Tax and Business Tax.	https://wirral-consult.objective.co.uk/file/5659121	https://wirral-consult.objective.co.uk/file/5684263	https://wirral-consult.objective.co.uk/file/5657006			
1248571 (Cheshire West and Chester Council)	LPIO-24551		Waste: Cheshire West and Chester Council notes that preferred approach to deliver policy objectives for Wirral is through the Joint Waste Local Plan for Merseyside and Halton. It is further noted that the Joint Waste Local Plan expires in 2027, and that a high-level, 5-year review, will be undertaken, following completion of the 5th AMR 2018/19. It would be helpful to clarify how/ when a full review would be undertaken, if the high-level review identifies areas that are ineffective or out of date, To be able to take the Local Plan forward, it will be important to be able to demonstrate that there is sufficient waste management provision within the area. Therefore, it may also be helpful to include information such as, whether the Joint Waste Local Plan provides sufficient capacity to meet the current waste needs assessment, or when the most recent waste needs assessment was prepared.						
1244826	LPIO-2488	yes	Wirral should work with the City Region partnership but should protect Wirral's environment.

1249219	LPIO-26494		Wirral should work with the City Region partnership but should protect Wirral's environment.	https://wirral-consult.objective.co.uk/file/5677529	https://wirral-consult.objective.co.uk/file/5677528				
1245180	LPIO-2799	no	Wirral should work with the City Region partnership but should protect Wirral's environment.						
1245100	LPIO-2823	no	The council needs to plan for Reducing, Repairing, Re-use and Recycling in any development. The council needs local facilities to simultaneously process garden and food waste. The council needs to facilitate the easy collection of garden waste.						
1237870	LPIO-2848	yes	Yes - To a point. Wirral should work with the City Regional Partnership BUT NOT at the expense of our GREEN SPACES.						

Person ID	ID	Question 8.20 - Do you agree with our preferred approach for planning for waste within Wirral as part of a wider City Region partnership?	Question 8.20a - If you answered No, what would you change and why? Do you have an alternative approach? If Yes, you can comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1248546 (Wirral Wildlife)	LPIO-2890	no	Wirral Wildlife consider that the review of the Waste Local Plan should consider ways of reducing waste production at source. We are concerned that the recycling rate has fallen again and is below 40%, well below other local councils. To achieve climate mitigation, we need as a society to consume less, waste less and recycle more to achieve a "circular economy". The Waste Local Plan review should also consider the possibility of one or more composting or digestion facilities in Wirral for organic matter, which would make it easier to manage wildflower-rich grasslands. These need the long grass to be removed after cutting, and especially in urban areas there is a serious problem of what to do with the arisings.						
1245159	LPIO-3107	yes	Need to promote a wider of materials recycled. Better enforcement on business and households to recycle.						
1238645	LPIO-3195	no	Plan for reduce, reuse and recycle in any development. We need local facilities to simultaneously process garden and food waste to facilitate the easy collection of food waste.						
1241315	LPIO-3327	yes	Wirral should work with the City Region partnership but should protect Wirral's environment.						
1237944	LPIO-3478	yes	The use of Eurobins, rather than the smaller, individual, wheelie bins, should be used in high density residential Heritage developments. This is to reduce the proliferation of wheelie bins within heritage areas (e.g. Hamilton Square/Hamilton Park)						
1245451	LPIO-3596	yes	No attempt to recycle waste from parks. Lack of composting facilities in parks is poor and chippings should be retained and used locally.						
1245462	LPIO-3652	no	Scope and range of recycling of items is too limited - need to widen range of recycling. Enforcement on households and industry needs to be strengthened. No attempt to recycle waste from parks. Lack of composting facilities in parks is poor and chippings should be retained and used locally.						
1237827	LPIO-3839	yes							
1245288	LPIO-3908	yes							
1238835	LPIO-4052	yes	Our priority issue in this matter is the protection of our own environment. We should explore the LCR partnership, in order to explore whether or not there are any waste opportunities that we could exploit. In general, it is probably not appropriate to comment on this issue until 2027.						
1240939	LPIO-4188	yes							
1245346	LPIO-4282	no	Plan for reduce, reuse and recycle in any development. We need local facilities to simultaneously process garden and food waste to facilitate the easy collection of food waste.						
1245638	LPIO-4328		Wirral should work with the City Region partnership but should protect Wirral's environment. Perhaps a waste to energy plant could be built similar to the one recently commissioned in Dublin. The Dublin plant generates clean energy from waste which is not able to be recycled.						
1244720	LPIO-4778	yes	WBC should not allow biomass energy plant in Wirral due to its high carbon release nature it will prevent us from addressing climate change						
1244629	LPIO-4991		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1245713	LPIO-5137	yes	Wirral should work with City Region partnership but should protect Wirral's environment						
1245501	LPIO-5179	no	Further investment is required in the retrieval and re-allocation of potentially recyclable materials. Currently certain plastics are not sorted and collected mixed with compost-able food waste. Greater efficiency and higher retrieval rates will effectively reduce volumes direct to landfill.						
1239571	LPIO-5289	yes	I would, however, like to see a more comprehensive scheme for collection of household waste such as in Cheshire, and in our previous home area of Somerset, especially separate provision for collection of kitchen food waste.						
1246006	LPIO-5360		Plan for reduce, reuse and recycle in any development. We need local facilities to simultaneously process garden and food waste to facilitate the easy collection of food waste.						

Person ID	ID	Question 8.20 - Do you agree with our preferred approach for planning for waste within Wirral as part of a wider City Region partnership?	Question 8.20a - If you answered No, what would you change and why? Do you have an alternative approach? If Yes, you can comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1240383	LPIO-5462	yes	Waste planning should continue as a City Region partnership with specific regard to protection of the environment						
1242541	LPIO-5673		This Council needs to explicitly plan for reduce, reuse and recycle in any developments. We need local facilities to simultaneously process garden and food waste and/or to facilitate the easy collection of food waste. Residents should have designated spaces for waste/recycling collections. Developments should include share shed facilities. Repair services should be actively encouraged.						
1245984	LPIO-5777		Wirral has a poor reputation within the wider area on waste management. Engagement with the wider City Region should be encouraged if it improves standards i.e. better recycling facilities including plastics and household bins for waste food that can then be sent for composting. This would help reduce carbon emissions and be in line with Wirral's stated aim of planning for the climate emergency.						
1246310	LPIO-5984		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1246402	LPIO-6494	yes							
1242751	LPIO-657	yes	Wirral should work with the City Region partnership but should protect Wirral's environment.						
1244896	LPIO-6588	no	Wirral should work with LCR but protect Wirral's environment. Improved recycling is only part of the solution. The problem is increasing waste: e.g. if waste increases by 25% and Wirral's 40% recycling rate also goes up by 25%, the net effect is over 4% increase in unrecycled waste plus what cannot be recycled later!! The review of the Waste Local Plan should consider ways of reducing waste production at source. We are concerned the recycling rate has fallen to below 40%, well below other councils. To achieve Climate Mitigation, we need to consume less, waste less and recycle more to achieve a "circular economy". The Waste Local Plan review should also consider one or more composting or digestion facilities on Wirral for organic matter, which would (for instance) make it easier to manage wildflower-rich grasslands. These need long grass to be removed after cutting. Especially in urban areas there is a serious problem of what to do with the arisings. ITPAS acknowledges the role of the Joint Waste Local Plan for Merseyside and Halton, but recommends that LP policies support sustainable development based on the waste hierarchy: to avoid, reuse and recycle waste, to move away from landfilling which is an unsustainable land use. The previous approach (sending waste overseas) is no longer an option, and plastic is causing serious harm to marine and land environments and wildlife. WBC should ensure effective policies, aimed at waste reduction at the design, delivery and operation phases of development, are included in the Local Plan. Good waste management policies should not be an afterthought, or it will lead to high costs to the environment and to the Council as well as to residents and businesses through higher Council Tax and Business Rates.						
1241800	LPIO-6845	yes	It looks as though the plan for waste is run at a larger regional level. I would only say that I advocate the "reduce, reuse and recycle" approach and think that not enough recycling is being done locally at present. I hate to send rubbish to landfill. The sooner our consumption becomes more sustainable and the better. In the light of SARS-Covid 19 it does give us an opportunity to pause and think about things like our actual needs -security, food, utilities, waste collection etc and maybe make a few changes in our less necessary habits.						
1241661	LPIO-6849		We need local facilities to simultaneously process garden and food waste to facilitate the easy collection of food waste.						
1241723	LPIO-6951	yes	However we should plan for reduce, reuse and recycle in any development. We need local facilities to simultaneously process garden and food waste to facilitate the easy collection of food waste.						
1245086	LPIO-6990	yes	However we should be recycling far more - the fact that recycling rate has dropped is very disappointing. The recycling centres seem to do a good job but more things need to be accepted in the kerbside waste collections. Items such as tetrapacks & non-bottle plastic can be readily recycled but it can often be hard to find where to take them.						

Person ID	ID	Question 8.20 - Do you agree with our preferred approach for planning for waste within Wirral as part of a wider City Region partnership?	Question 8.20a - If you answered No, what what would you change and why? Do you have an alternative approach? If Yes, you can comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1237769	LPIO-7132	no	In my view Local Councils throughout the UK have the wrong Waste Collection Strategy. The Wheelie Bins that have been distributed at vast expense are themselves a major eyesore, cluttering our streets, gardens and the environment. These should be speedily replaced by well speced out collection compounds/areas for all types of waste, emptied daily. this would mean householders walking up to 200 yards but would remove the horrible clutter of Wheelie bins off our streets. Wheelie bins are themselves an eye-sore.						
1237647	LPIO-724	no	WBC should be far more imaginative and could learn from the Swedish approach to recycling and waste management. The aim must be to reduce drastically the fraction of waste products going to landfill.						
1246488	LPIO-7324		Wirral should work with the City Region partnership but should protect Wirral's environment.						
1246348	LPIO-7379	yes	We have more waste that ever before so I suppose some concerted effort must be made to increase the efficiency of disposing of waste but not at the cost of Wirral's environment.						
1246594	LPIO-8020		Wirral should work with the City Region partnership but should protect Wirral's environment						
1240903	LPIO-8047	yes	Wirral should work with the City Region partnership but should protect Wirral's environment.						
1246605	LPIO-8214	no	Wirral should work with the City Region partnership but should protect Wirral's environment.						
1237882	LPIO-8479	yes	Wirral should work with the City Region partnership but should protect Wirral's environment.						
1240653	LPIO-8822	no	The current levels of landfill rather than recycling, that are supported by the policy are unsustainable and require urgent attention to resolve, not to wait another 7 years to see what happens.						
1241770	LPIO-8823	no	Wirral has a woefully inadequate recycling rate and with the current waste management plan running until 2027 there is no scope for improvement.						
1246631	LPIO-8988	yes							
1239377	LPIO-9235	yes							
1245034	LPIO-9243	yes							
1246651	LPIO-9289	yes	There needs to be a robust plan for reduce reuse and recycle in any development. We need local facilities to simultaneously process garden and food waste by facilitating the easy collection of both.						
1245289	LPIO-9328	yes							
1246678	LPIO-9401	no							
1241495	LPIO-9477	yes	We need to reduce waste and recycle more. I am aware that Wirral's recycling falls below that of many other authorities including its neighbour Cheshire West and Chester. Improvements are needed for recycling food & other organic waste.						
1246624	LPIO-9495	yes	I do not believe that we are encouraged to recycle enough. There needs to be more clarity as to what items are recyclable						
1246693	LPIO-9916	yes	Wirral should work with the City Region partnership however we should not been seen as a junior partner to Liverpool and we should be fighting to protect Wirral's environment first and foremost
