

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246747	LPIO-10245	yes	If there is a tree planting strategy, why is the council even considering building on greenbelt! I'm all in support of planting trees, but they should not be destroyed in the first place. Mature woodland is hundreds - sometimes thousands - of years old. No amount of tree planting will replace this land.						
1245044	LPIO-10291	yes	The Wirral Landscape Character Assessment notes within Cheshire West and Chester, adjacent to Wirral, the aspiration is to increase woodland cover to 10- 30%, through the creation of small woodlands. Wirral Council is not a contributing partner to the Mersey Forest. Is it possible for Wirral to consider increasing its ambitions on new woodland cover? There may be exciting opportunities being presented through the Northern Forest initiative. Encourage tree planting on grass verges, and on private properties. Implement a strategy, as they have done in other Local Authorities, that for every tree chopped down, 2 should be planted in their place. Take tree maintenance back into Council management - there is too much opportunity for private contractors to sell off chopped down trees for biomass						
1246544	LPIO-10397	yes	Follow Wirral Tree Strategy, as a minimum. Also the Woodland Trust Tree Strategy. 10% tree cover is not a sufficiently ambitious target It is vital to protect the trees we have as well as plant new ones. Pollarding should be minimised. Planting a couple of saplings in no way compensates for felling mature trees. Saplings should be planted wherever possible irrespective of how many mature trees are saved. Trees must be planted "right tree right place", using locally-sourced supply, and with a plan in place to look after them. Stop strimming every bit of urban greenery Promote the Council "Adopt a tree" scheme. Investigate the potential of Green Walls on new buildings Encourage schools to get children planting round the egde of their properties, particularly fruit and nut trees						
1241065	LPIO-10493	yes	Trees are able to self seed themselves and have been able to do this for millions of years. Set aside land for trees to grow natural. It also saves money and resources.						
1244412	LPIO-1055	yes	please see comments in 8.3 above. Also need to involve/harness young people in the planting process. Go via schools and out of school groups such as Guides. Act as a knowledge facilitator to raise awareness of ; how individuals and community groups can get involved in tree planting locally, what organisations/charities provide support for tree planting eg Woodlnad Trust, best place to buy trees from, best type of tree to select for your garden type etc etc						
1241337	LPIO-10559	yes	I totally support tree planting and would urge a higher target if at all possible. There are lots of organisations around the Wirral who would help with planting. It is important to proceed quickly with identification of sites for tree planting so that work can commence. Trees take time to grow to become useful as carbon capturers - two saplings in place of a felled mature oak will take a long time to be as useful.						
1246724	LPIO-10579	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1246242	LPIO-10993	yes	The Council are guilty of cutting down indiscriminately existing well established trees. In our local wood they have cut down well established Beech & Oak rather than removing damaged limbs. Therefore they need to plant and encourage the creation of forests, which again will improve the carbon footprint and in time to come create a pleasing area for the natural habitat to thrive and residents to enjoy.						
1243890	LPIO-1139	yes	Plant trees on 'weakly-performing' green belt						
1247196	LPIO-11615	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247359	LPIO-11649	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247015	LPIO-11861	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1247405	LPIO-12099	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247363	LPIO-12100	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247364	LPIO-12101	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247365	LPIO-12102	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247366	LPIO-12103	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247369	LPIO-12104	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247370	LPIO-12105	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247371	LPIO-12106	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247372	LPIO-12107	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247373	LPIO-12108	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247374	LPIO-12109	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247375	LPIO-12110	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247376	LPIO-12111	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247377	LPIO-12113	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247378	LPIO-12114	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247379	LPIO-12115	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247380	LPIO-12116	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247381	LPIO-12117	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247382	LPIO-12118	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247383	LPIO-12119	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247385	LPIO-12120	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247386	LPIO-12121	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247387	LPIO-12122	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247388	LPIO-12123	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247389	LPIO-12124	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247390	LPIO-12125	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247391	LPIO-12126	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247392	LPIO-12127	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247393	LPIO-12128	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247394	LPIO-12129	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247214	LPIO-12445	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247492	LPIO-12550	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1240843	LPIO-12706	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247578	LPIO-12905	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247510	LPIO-13029	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1246335	LPIO-13167	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1246853	LPIO-13420	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1246852	LPIO-13544	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247746	LPIO-13700	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247228	LPIO-13738	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247747	LPIO-13751	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1238192	LPIO-13816	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1247012	LPIO-13870	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1244681	LPIO-1388	yes	Follow the Wirral Tree Strategy. Ensure that local plan addresses the need to protect what is already here as well as planting new. The latest version of the Wirral Tree Strategy states 'WBC will apply suitable planning conditions to protect new and existing trees and enforce them'. Planning conditions should include ones to deter unnecessary pollarding/pruning (see also Wirral Council's Tree Risk Assessment Management tool which is used in making decisions about tree felling, pollarding, pruning and coppicing). <ul style="list-style-type: none"> • Trees should be included in development schemes. Schools could be encouraged to get children planting at the edge of their properties. • Planting a couple of saplings does not make up for felling a mature tree. There should be planting of saplings irrespective of how many mature trees are saved. • Stop strimming every bit of urban greenery. • Promote council adopt a tree scheme which is woefully underused • Where possible, fruit and nut trees should be planted. The possible option of planting evergreen hedges as a better way of improving air quality should be explored • Planting the right trees in the right places and people identified to be responsible for their care 						
1247014	LPIO-13924	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1242183	LPIO-14018	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247218	LPIO-14113	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247219	LPIO-14216	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247220	LPIO-14314	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247222	LPIO-14443	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247226	LPIO-14533	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247245	LPIO-14630	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247829	LPIO-14670	yes	I am in favour as long as the land is suitable for trees and well surveyed so that trees are not planted on Greenfields that have a high biodiversity value or farmland that harbours uncommon species, eg on wildflower fields / meadows which have become rare. Care must be taken not to damage but rather enhance the Greenbelt and urban Green Space. The chosen Tree species must be native to GB and suitable for the chosen land and its surroundings, in terms of ecology and the use by people. Planting must be well guided, supervised and followed up with aftercare, to achieve greatest possible success.						
1246827	LPIO-14749	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247016	LPIO-14860	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1247018	LPIO-14930	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1243700	LPIO-1508	yes	A Wirral forest should be linked to the Mersey forest initiative and involve a joint approach with Cheshire west and Chester Council. An annual target should be set for tree planting and new developments should contribute trees in excess of the annual target as part of the planning permission.						
1247864	LPIO-15197	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247865	LPIO-15213	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247866	LPIO-15229	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247867	LPIO-15242	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247868	LPIO-15255	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247873	LPIO-15272	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247869	LPIO-15295	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247246	LPIO-15369	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247870	LPIO-15399	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247871	LPIO-15431	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247872	LPIO-15479	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247248	LPIO-15499	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247251	LPIO-15591	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247252	LPIO-15678	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247274	LPIO-15782	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247275	LPIO-15936	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247936	LPIO-16050	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1241381	LPIO-161	yes	There is a good level of knowledge and reputation re: Wirral and Trees, there also seems to be an 'apparently dilatory' lack of urgency and getting info out to the public. Poster displays in Libraries' windows and display areas could be used to spell out value of trees, but also the occasional, but serious need to prune or fell. Planting, and replacement planting after felling trees has a cost implication so steps to raise funds may be required public subscription planting in memory of grants from variety of eco-charities eg Woodland Trust Could schools and churches be encouraged to plant on their land.						
1247287	LPIO-16244	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247344	LPIO-16332	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247349	LPIO-16419	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247353	LPIO-16507	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247354	LPIO-16602	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247434	LPIO-16700	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1244969	LPIO-1673	yes	Active Consultation must exist between WBC and Government to establish grants to residents with small parcels of land who can be encouraged into tree planting in appropriate settings and the correct densities. Controlled measures will result in widespread engagement across the Borough						
1247436	LPIO-16809	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247935	LPIO-16867	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner. WBC should massively improve its communication with local friends groups and local residents who know the area best and have already invested in ecological surveys and tree reports of their area.As this communication isn't working at the moment, Friends of groups have lost trust and motivation.						
1247437	LPIO-16996	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247439	LPIO-16997	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247441	LPIO-17106	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247960	LPIO-17227	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247962	LPIO-17316	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247965	LPIO-17349	yes	Tree Planting. NF is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247966	LPIO-17424	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247967	LPIO-17440	yes	Tree Planting. NF is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1247971	LPIO-17525	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1241726	LPIO-17625	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247980	LPIO-17784	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1245502	LPIO-17915	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247541	LPIO-18019	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1247539	LPIO-18125	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1238043	LPIO-1825	yes	Without knowing the actual figures, local press reports suggest that the cost to Wirral of planting new trees is about £200 per tree. This seems very high, and I think WBC should be more cost conscious and more ambitious in getting more new trees for our buck.						
1247996	LPIO-18294	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1237857	LPIO-18343	yes	There is of course potential for more trees on the Wirral and protecting our existing wooded areas by not allowing them to be removed in order to build houses. I do not believe Wirral is the place to create new forests however.						
1247021	LPIO-18411	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1247022	LPIO-18465	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1247023	LPIO-18520	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.

1247174	LPIO-23092	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1241016	LPIO-231	yes	There is a real opportunity to help reduce global warming and add to the beauty of the Wirral through tree planting. There are many areas where trees could be planted and more protection could be given to protecting the exiting trees. The council could be more ambitious in its plan for tree planting in terms of the speed and number of trees. It is an area where volunteers would be keen to help.						
1247175	LPIO-23200	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1247176	LPIO-23201	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.

1247179	LPIO-23357	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1245146	LPIO-2358	yes	Support this initiative						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1241770	LPIO-23649	yes	Tree coverage needs to be increased significantly from Wirral's current 10%. Existing green spaces should be used to plant more trees and the apparent destruction of mature trees needs to be stopped. The tree strategy needs to be firmly adhered to and brought under control of local council rather than outsourced to companies such as Mancoed.						
1246762	LPIO-23690	yes	New developments must not involve wanton destruction of mature trees, hedgerows and thus the area's biodiversity. They should be seen as an opportunity to increase the green coverage of the Wirral by converting brownfield sites to high quality housing with green pockets, tree lined roads, significant green spaces both managed (ie public parks) and wild (ie wooded areas left to grow). The tree strategy should be managed and must be the responsibility of the local council, not outsourced to for-profit companies.						
1242185	LPIO-23944	yes	The emerging Wirral Tree Strategy sets out the ambitions and overarching strategic guidance of how to manage trees in the Borough up to 2030 in accordance with the Government's long-term ambition for achieving an average of 12% tree cover across England by 2060 and the 25 year Environmental Plan (December 2018).	https://wirral-consult.objective.co.uk/file/5659121	https://wirral-consult.objective.co.uk/file/5684263	https://wirral-consult.objective.co.uk/file/5657006			
1248152	LPIO-24112	yes	Mark Rake - site of former 'Archers' public house - The ancient trees on the margin of this site are subject to Tree Preservation Order No. 347 confirmed by the Council on the 18th October 2012. Generally, such ancient trees as these can live for a considerable number of centuries and can provide both shelter and food for around 500 species of wildlife. This year, 2020, is dedicated, nationally, as 'The Year of the Tree' and ambitious planting is taking place widely in the UK. The unfortunate close proximity of the adjacent new block to these ancient trees severely compromises them and their future. We wrote to the Council expressing our concerns about the plan and our opposition to it at the time. Trees like this should be better protected.						
1248152	LPIO-24115	yes	OS216 - Knockaloe - an early Victorian house in Bridle Road dating from about 1851. Currently the future of this property is uncertain. A former member club the grounds include playing fields and other amenities. It seems to be yet another potential development site. Local residents are rightly concerned for its future. A tree survey has been undertaken and we await details. The future of trees in Wirral is now the subject of a new and emerging Council policy as agreed with Wirral Tree Wardens. It is essential that trees on this site are protected by a TPO as soon as possible.						
1248557 (Environment Agency)	LPIO-24460	yes	The [EA] generally support tree planting and the preservation of ancient woodlands for both biodiversity and recreational reasons as well as the wider environmental benefits they bring. However it is important the selection of tree species should be based on native local provenance to ensure appropriateness for the location and to preserve local natural character. Tree planting should be encouraged with a view to the multitude of benefits it provides if done correctly and not seen as a simple planning requirement as is often the case.						
1244826	LPIO-2470	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and good for our environment and planet.						
1242697	LPIO-24715	yes	The Council spends so much money in the east that it has nothing for the more rural areas in west and mid Wirral. A change of priority is needed. While new regeneration should involve tree-scapes, existing woodland needs enhancing. An example is Stabledon Wood (near SP013, SHLAA 4056), and land at SHLAA 3095. If the Council really had trees at the heart of its policies and priorities for its resident to enjoy, then it would direct these two sites for tree planting. The Council could purchase a site and plant trees for people to enjoy in a min-park. That would show leadership and a real intention on trees.	https://wirral-consult.objective.co.uk/file/5659118	https://wirral-consult.objective.co.uk/file/5659119	https://wirral-consult.objective.co.uk/file/5659120	https://wirral-consult.objective.co.uk/file/5659121		
1246458	LPIO-25810	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good						
1246459	LPIO-25811	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good						
1237870	LPIO-2604	yes	We need trees - this is a FACT. Trees could be planted along all main routes. Residents could be encouraged to plant trees outside their properties within the grass verge. Large patches of land could be allocated as woodland. We do not have enough trees - especially on East Wirral.						
1243721	LPIO-2616	yes	As part of landscaping of new or replacement developments,						
1249219	LPIO-26485	yes	We support the new Wirral tree strategy and trees should be part of the landscaping plans of any new development.	https://wirral-consult.objective.co.uk/file/5677529	https://wirral-consult.objective.co.uk/file/5677528				
1240932	LPIO-26629	yes	We support the Council's ambition to raise woodland cover in the Borough by working constructively with individuals and groups to deliver its vision, though we note that the Council's Tree Strategy is still being developed. We also wish to highlight to the Council the importance of securing the active management and ongoing stewardship of any new woodland in its tree planting programme to ensure the longevity of the new woodland both as carbon sinks and recreational assets.	https://wirral-consult.objective.co.uk/file/5683689	https://wirral-consult.objective.co.uk/file/5682697	https://wirral-consult.objective.co.uk/file/5682701			
1248223	LPIO-26710	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.

1237899	LPIO-27144	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1248212	LPIO-27145	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1248208	LPIO-27159	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1248176	LPIO-27176	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1248178	LPIO-27196	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250049	LPIO-27210	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250048	LPIO-27211	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1248180	LPIO-27221	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1248181	LPIO-27240	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250054	LPIO-27262	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1248213	LPIO-27269	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250059	LPIO-27296	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250053	LPIO-27297	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250055	LPIO-27299	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250058	LPIO-27330	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1250057	LPIO-27332	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250062	LPIO-27339	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250063	LPIO-27360	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250065	LPIO-27373	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1250067	LPIO-27386	yes	Noctorum Field (OS140) is covered by Tree Preservation Order BK 0030A001, and this should be used to protect and further enhance tree coverage in the area.						
1245180	LPIO-2769	yes	There are many roads that had trees on the grass verges. Many have died, or been killed. In just 3 roads adjacent to me you could plant nearly 100 trees to fill in the gaps. Then there would be less resistance to cutting down overgrown trees that damage pavements and phone cables. Roadsides are the perfect location for trees to absorb greenhouse gasses.						
1245100	LPIO-2791	yes	Follow the Wirral Tree Strategy, once it has been finalised. Ensure that the local plan addresses the need to protect existing trees as well as planting new. If a Wirral Green Infrastructure Plan were commissioned, and developed by an appropriate professional, eg a Landscape Architect, as well as providing a coherent plan for the development of wildlife corridors, it could also identify the most appropriate sites for tree planting and name the best tree species for that site. (The right tree in the right place) Wherever new saplings/trees are planted members of the local community or neighbourhood must be identified to take care and ownership of these newly planted saplings/trees. The latest version of The Tree Strategy states, "WBC will apply suitable planning conditions to protect new and existing trees and enforce them." Planning conditions should include ones to deter unnecessary FELLING, pollarding or pruning of trees. Appropriate trees should be included in new developments. Schools could be encouraged to get pupils involved in tree planting if only to improve the air quality around their schools. Evergreen hedges are useful to improve air quality. On the other hand, edible hedges demonstrate to school children where some of our food comes from. Stop strimming urban greenery. This will enable wildlife corridors to develop and wild flowers to flourish, thereby encouraging pollinators. Where possible, when planting trees, fruit and nut trees, as well as edible hedges should be explored.						
1248546 (Wirral Wildlife)	LPIO-2880	yes	Wirral Wildlife is one of the authors of the Wirral Tree Strategy: the full Strategy needs to be applied, with action plans regularly updated. Key points: # Tree retention is more important than new planting. Trees take decades or centuries to grow large; mature trees have far more value to carbon fixation, air quality improvement and other ecosystem services than young ones. So existing trees must be kept wherever possible, including in new development. # Natural regeneration is better for wildlife (and much cheaper) than planting, and should be encouraged wherever possible. # Local communities must be involved in planting plans. Not everyone likes trees, and there is much public and Council officer education needed. # Plantings must be designed, not trees planted without thought to the future appearance, tree health and public use. # "Right tree in the right place" – species and planting methods have to be chosen carefully. Trees must not be planted where they would do harm e.g. marshland, heathland, species-rich grassland. Management of new plantings/natural regeneration must be arranged beforehand. # Biosecurity: planted stock must be UK propagated and grown, to help avoid more diseases and pests. Use natural regeneration rather than planting wherever possible. Encourage local tree nurseries including volunteer-led ones. # TPOs, Conservation Area orders and planning conditions affecting trees must be monitored and enforced. Mitigation and compensation for loss of trees needs to be calculated using the DEFRA metric and any funds kept strictly for furthering tree cover. Technical note: we currently do not have an accurate measure of Wirral's total tree cover. In the meantime the Vision in the final adopted Strategy will need to be quoted (it has changed).						
1245159	LPIO-3074	yes	Urban parks should be respected and not subject to unplanned wholesale tree replanting - should be retained as managed urban parks with mixed uses rather than developed as forests. A selected farm that is struggling for viability should be selected for "wilding" to allow the farm to go wild and develop naturally with minimal human intervention. See the book "Wilding" by Isabella Tree. This will allow nature to re-colonise and provide habitat for flowers, shrubs, trees, mammals and birds some of which have been excluded by modern intensive farming methods. The tree strategy has been written to ensure planting of trees for trees sake rather than trees in the landscape. The historic landscape of Wirral should not be destroyed by an uncontrolled frenzy of tree planting.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1245287	LPIO-3170	yes	It could support the Wirral Tree Strategy, and stop the felling of sound street trees without recourse to advice. Use of good ecological and forestry advice should be taken to make woodland planting the norm, using small inexpensive plants rather than large specimens that need staking.						
1238645	LPIO-3188	yes	Follow the new Tree strategy						
1239492	LPIO-327	yes	Keep as much of the established trees as possible, as they are often the best to take up CO2 (due to their physical size). Avoid cutting them down in all but the most necessary situations. Ensure that building work, especially residential, maintains as much of the trees already in place as possible - and enforce this with the builders strongly. We have seen too many situations where contractors have removed trees "by mistake" and apologised afterwards (with no real come-back) - they will continue to do so unless they are suffer real consequences. Where trees have to be removed due to building/disease, plant new trees that fit with the environment - and are as large as is affordable/grow as quickly as possible.						
1241315	LPIO-3312	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner						
1238835	LPIO-3437	yes	With the exception of those trees deemed to be unstable and dangerous, stop removing existing trees altogether. On the one hand, you sign up to a climate change emergency and then you go and eliminate one of the greatest weapons that you have in your armoury to achieve this. It is sheer madness. The residents of the borough need as much tree cover as possible for environmental and health protection. Plant as many as possible.						
1242519	LPIO-3487	yes	Not building on greenbelt to protect hedgerows, copses and other small woodland areas.						
1245437	LPIO-3529	yes	Create a large forested area similar to Delamere forest for tourist reasons.						
1245451	LPIO-3584	yes	Urban parks should be respected and not subject to unplanned wholesale tree replanting - should be retained as managed urban parks with mixed uses rather than developed as forests. The tree strategy has been written to ensure planting of trees for trees sake rather than trees in the landscape. The historic landscape of Wirral should not be destroyed by an uncontrolled frenzy of tree planting.						
1237827	LPIO-3824	yes	Probably best to promote through local schools. Today's kids need to be part of building tomorrow's environment.						
1245288	LPIO-3893	yes	Offer resident the choice to adopt trees when planted in their communities and training of how to look after the trees.						
1240939	LPIO-4173	no							
1245346	LPIO-4240	yes	Follow the Wirral Tree Strategy. Ensure that local plan addresses the need to protect what is already here as well as planting new. The latest version of the Wirral Tree Strategy states 'WBC will apply suitable planning conditions to protect new and existing trees and enforce them'. Planning conditions should include ones to deter unnecessary pollarding/pruning (see also Wirral Council's Tree Risk Assessment Management tool which is used in making decisions about tree felling, pollarding, pruning and coppicing). <ul style="list-style-type: none"> • Trees should be included in development schemes. Schools could be encouraged to get children planting at the edge of their properties. • Planting a couple of saplings does not make up for felling a mature tree. There should be planting of saplings irrespective of how many mature trees are saved. • Stop strimming every bit of urban greenery. • Promote council adopt a tree scheme which is underused • Where possible, fruit and nut trees should be planted. The possible option of planting evergreen hedges as a better way of improving air quality should be explored • Planting the right trees in the right places and people identified to be responsible for their care 						
1245638	LPIO-4307	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner. All those owners of Agricultural Land that wish to sell, purchase the land at AGRICULTURAL PRICES to create the Wirral forest.						
1237667	LPIO-4586	yes	There has been a great deal of tree loss over recent years. Trees contribute to the environment and general appearance of an area and should be encouraged.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1244720	LPIO-4725	yes	Increase the level of tree planting from the suggested 12% over 15 years, to 10% increase year on year. A 1% yearly increase in tree planting is not sufficient to mitigate the effects of climate change, particularly if mature trees such as willow are felled thus reducing the ability of Wirral to prevent flooding. Each willow takes up 50 gallons of water a day. Numerous fully matured willow have been felled on flood areas such as Green Lane in Leasowe and Park Road and Park Lane in Meols. Trees are currently being felled in other flood prone areas in Manor Road and Meols areas. Saplings are a great start but lets do more to protect the mature trees we already have. Some private individuals are copying the Council in felling and coppicing - all to the detriment of our climate resilience. There are numerous areas in urban districts which could support trees, including in Prenton, Liscard and Wallasey. Plantings: Lollipops are not proper trees and do not provide the canopy required to do the job of carbon capture, nor do they provide habitat for invertebrates or birds.						
1237696	LPIO-4735	yes	As much as possible please!						
1244629	LPIO-4797	yes	Listen to the experts, it is not all about tree planting to improve air quality.						
1245713	LPIO-5120	yes	Replace trees and create increased woodland not just on greenbelt but in brownfield development sites.						
1245501	LPIO-5150	yes	Tree planting has been identified as a productive measure to help reduce carbon in our atmosphere at a global level. Your plan indicates 'working towards a greater provision of trees, whether on our highways or in the parks and countryside'. Additionally you state you 'seek to share the benefit of trees across Wirral' and to 'ensure that we create a positive future legacy for trees in Wirral whilst also effectively and safely managing trees in the present.' Therefore, your priority should be first, to secure and sustain the age, variety and number of existing trees, in every corner of the Wirral, on areas managed by the Council. If you really believed in a 'positive future legacy for trees in Wirral' this would be at the core value and belief, with a priority above potential for development of green areas. Planting of new trees on council managed areas, even a 'net 2' for every established/old tree removed or cut down, may balance a carbon deficit, but not deliver on quality of habitat nor sustain a varied biodiversity of wildlife. Something that the council is keen to promote as a USP of the Wirral Peninsula.						
1244215	LPIO-5223	yes	Support local groups to develop planting and sustainable maintenance of trees in public spaces.						
1245496	LPIO-5240	yes	I believe Wirral Council should plant more trees in parks and woodland areas and also in rural areas.						
1246006	LPIO-5349	yes	Follow the Wirral Tree Strategy. Ensure that local plan addresses the need to protect what is already here as well as planting new. The latest version of the Wirral Tree Strategy states 'WBC will apply suitable planning conditions to protect new and existing trees and enforce them'. Planning conditions should include ones to deter unnecessary pollarding/pruning (see also Wirral Council's Tree Risk Assessment Management tool which is used in making decisions about tree felling, pollarding, pruning and coppicing). Trees should be included in development schemes. Schools could be encouraged to get children planting at the edge of their properties. Planting a couple of saplings does not make up for felling a mature tree. There should be planting of saplings irrespective of how many mature trees are saved. Stop strimming every bit of urban greenery. Promote council adopt a tree scheme which is woefully underused Where possible, fruit and nut trees should be planted. The possible option of planting evergreen hedges as a better way of improving air quality should be explored Planting the right trees in the right places and people identified to be responsible for their care						
1240383	LPIO-5449	yes	Large new developments should include tree planting as part of the landscaping plan, at the application stage with guarantees of establishment. It is important that the right tree grows in the right place.						
1241800	LPIO-5599	yes	Trees should be included in development schemes. Schools could be encouraged to get children planting at the edge of their properties. Assumption should be that as a rule trees do not need "managing", which is all too often used simply as an excuse to fell. Planting a couple of saplings does not make up for felling a mature tree. There should be planting of saplings irrespective of how many mature trees are saved. Plenty of private individuals would plant trees, if the Council would stop strimming every bit of urban greenery.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1242541	LPIO-5683	yes	<p>Engage citizens to support a survey to ensure clear what tree stock Wirral currently has (e.g, use of iTree or similar) Follow the Wirral Tree Strategy. Ensure that local plan addresses the need to protect what is already here as well as planting new. The latest version of the Wirral Tree Strategy states 'WBC will apply suitable planning conditions to protect new and existing trees and enforce them'. Planning conditions should include ones to deter unnecessary pollarding/pruning (see also Wirral Council's Tree Risk Assessment Management tool which is used in making decisions about tree felling, pollarding, pruning and coppicing).</p> <ul style="list-style-type: none"> • Trees should be included in development schemes. Schools could be encouraged to get children planting at the edge of their properties. • Planting a couple of saplings does not make up for felling a mature tree. There should be planting of saplings irrespective of how many mature trees are saved. • Stop strimming every bit of urban greenery. • Promote council adopt a tree scheme which is woefully underused • Where possible, fruit and nut trees should be planted. The possible option of planting evergreen hedges as a better way of improving air quality should be explored • Planting the right trees in the right places and people identified to be responsible for their care 						
1245984	LPIO-5762	yes	<p>Tree planting within the Borough should be a priority in order to reduce the effects of carbon emissions. Tree planting could be considered in areas such as on the edge of open space, and recreation land such as football pitches. Tree planting should be included wherever possible on new developments. This should also include a condition on developers to either maintain the tree planting with a management scheme or to pass tree maintenance on to the Borough Council so that they can be maintained by the Council's team. Checks should be made to ensure maintenance of tree planting if the management remains in private control. We agree with the council strategy of planting two more saplings for every tree felled on the Wirral. It is essential however, that any tree planting is maintained with a robust management strategy, to ensure that trees are cared for in the first few years and that older trees are checked regularly for signs of disease so they can be replaced as necessary.</p>						
1244896	LPIO-5886	yes	<p>Increased woodland would attract tourists, expand the local economy, help address air pollution and Climate Change, and improve well-being. The emerging 'Wirral Tree Strategy' (WTS) outlines ambitions and overarching guidance on how to manage trees in accordance with Government's long-term ambition of 12% tree-cover across England by 2060 and the 25-year Environmental Plan. Wirral Wildlife (WGSA Member) is co-author of the Strategy, which should be applied in full, with action plans regularly updated. Key points: Tree retention is more important than new planting. Trees take decades or centuries to grow large; mature trees have far more value to carbon fixation, air quality and other ecosystem services than young ones. Existing trees must be kept wherever possible, including in new development. Natural regeneration is better for wildlife (and much cheaper) than planting, and should be encouraged wherever possible. Local communities must be involved in planting plans. Not everyone likes trees, so there's much public and Council officer education needed. Tree plantings must be designed with thought to future appearance, health and public use. "Right tree in the right place" – species and planting methods must be chosen carefully and not planted where they would do harm e.g. marshland, heathland, species-rich grassland. Management of new plantings/natural regeneration must be pre-planned. Biosecurity: planted stock must be UK propagated/grown to help avoid diseases and pests. Encourage local tree nurseries including volunteer-led ones. TPOs, Conservation Area orders and planning conditions affecting trees must be monitored and enforced. Mitigation and compensation for loss of trees needs to be calculated using the DEFRA metric and any funds kept strictly for furthering tree cover. As there is no accurate measure of Wirral's total tree cover, the Vision in the final adopted Strategy should be quoted.</p>						
1246310	LPIO-5970	yes	Wirral Forest on hundreds of acres of land????.						
1245767	LPIO-6043	yes	I would support the Council's Preferred Approach.						
1246339	LPIO-6180	yes	<ol style="list-style-type: none"> 1. Residential developers should be required to plant 2 trees for every house that they build . Trees may be in gardens or on the street . These should be in addition to any that are planted in new recreational provision. 2.Commerical and industrial developers should provide 1 tree per car parking space in addition to any boundary or structure planting needed. 3. All developers should provide two trees for each tree that they fell 4. Wirral should join the Mersey Forest initiative to help increase tree planting within the Borough. 5. Wirral should support residential tree planting schemes for existing communities . 						
1238310	LPIO-6189	yes	Let nature help. Do not use greenbelt land. Remove option 2a and 2b and nature would continue promoting its own tree planting by natural propagation at no cost to WBC.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246161	LPIO-6254	yes	Tree planting will be a key facet of the promotion of green spaces within the Wirral and supports the aspiration to increase woodland cover by at least 10% through the planning period.						
1246389	LPIO-6313	yes	Trees could be planted in school grounds, not just as single specimens but in clumps.						
1246339	LPIO-6349	yes	Developers should have obligations to plant trees - 2 trees per house in addition to those in any open space and structure planting provided as part of development 2 trees per car parking space in commercial retail and industrial development in addition to structural planting Local residential tree planting initiative to be launched to replace lost and overaged street trees Wirral should join the Mersey Forest initiative . i can never understand why the other Merseyside Boroughs have been so active in this and have recieved funding for woodland and trees and Wirral has failed to engage.						
1242751	LPIO-643	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1246402	LPIO-6475	yes	Where possible trees should be introduced or incorporated into any development. I also think that the planting of trees along the miserable long concrete promenade in new Brighton would greatly improve the look and character.						
1241800	LPIO-6817	yes	I would like to see some areas of re-wilding on the Wirral. As I understand it, this is where nature is left to itself to reclaim the land with naturally colonising species and thus generates natural woodlands. This is advantageous because is encourages biodiversity and gives a self regulating natural habitat for our native plant, animals and birds. I would also like to see areas of coppice used by local communities. This could promote the knowledge of an ancient way of working with woodlands and provide materials for natural crafts such as basket weavers, carpenters and various makers. To promote tree planting I would have thought that engaging school children in planting areas would enable them to want to look after that environment. Also, as through the forest schools programme, giving children contact with nature can help promote tree planting.						
1241868	LPIO-6818	yes	Garden centres are having to send trees and plants to landfill due to reduction in sales as a result of Covid19. The Council could support these centres by buying some of their stock.						
1241661	LPIO-6836	yes	Follow the Wirral Tree Strategy. Ensure that local plan addresses the need to protect what is already here as well as planting new. The latest version of the Wirral Tree Strategy states 'WBC will apply suitable planning conditions to protect new and existing trees and enforce them'. Planning conditions should include ones to deter unnecessary pollarding/pruning (see also Wirral Council's Tree Risk Assessment Management tool which is used in making decisions about tree felling, pollarding, pruning and coppicing). <ul style="list-style-type: none"> • Trees should be included in development schemes. Schools could be encouraged to get children planting at the edge of their properties. • Planting a couple of saplings does not make up for felling a mature tree. There should be planting of saplings irrespective of how many mature trees are saved. • Stop strimming every bit of urban greenery. • Promote council adopt a tree scheme which is underused • Where possible, fruit and nut trees should be planted. The possible option of planting evergreen hedges as a better way of improving air quality should be explored • Planting the right trees in the right places and people identified to be responsible for their care 						
1241723	LPIO-6936	yes	I like the current Tree strategy but feel more could be done to ensure unneeded pollarding/pruning of trees is not carried out. The promote council adopt a tree scheme which is woefully underused Where possible, fruit and nut trees should be planted. The possible option of planting evergreen hedges as a better way of improving air quality should be explored Planting the right trees in the right places and people identified to be responsible for their care. We should ensure all trees / saplings planted are 'produced in the UK.' Imported items carry disease!						
1245086	LPIO-6960	yes	I agree with a proposal to create a Wirral Forest. This would be a huge step in the right direction for improving our carbon imprint; it would be a major tourist attraction & a tremendous habitat for wildlife. I would like to see woodland cover on the Wirral raised by more than 10%.						
1237647	LPIO-711	yes	Some fraction of the trees should be planted as copses furnished with picnic tables to enhance the leisure amenities available to the various communities. Those parts of the Green Belt deemed appropriate for building, but unused as such, should be considered for re-forestation. Particular attention should be paid to including trees alongside roads, leisure parks, and public buildings in the urban areas of Birkenhead and the Water Front.						
1246488	LPIO-7276	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246348	LPIO-7351	yes	For a start stop knocking down mature trees. Developers and others have been allowed to chop down trees including in the centre of Heswall. Trees zap up carbon monocide and provide shade and homes for wild life and make towns look so attractive. The council itself have chopped down trees so what's going on? By all means plant more - in towns, around field edges, maybe create more woodland.						
1240932	LPIO-7628	yes	Yes, we have views. Our Client supports the Council's ambition to raise woodland cover in the Borough by working constructively with individuals and groups to deliver its vision, though Our Client notes that the Council's Tree Strategy is still being developed. As previously outlined in these representations, as the major landowner in the Borough, Our Client looks forward to working constructively with the Council on this matter. Our Client also wishes to highlight to the Council the importance of securing the active management and ongoing stewardship of any new woodland in its tree planting programme to ensure the longevity of the new woodland both as carbon sinks and recreational assets. As a professionally managed landholding with a 130-year history, Our Client has the resources as well as the land area to secure this important legacy for the Borough.	https://wirral-consult.objective.co.uk/file/5683689	https://wirral-consult.objective.co.uk/file/5682697	https://wirral-consult.objective.co.uk/file/5682701			
1246592	LPIO-7822	yes	I work in Birkenhead and there are many streets with no trees at all or the ones that are there are damaged by vehicles/vandalised. Trees should be planted on every street and properly maintained/protected.						
1246594	LPIO-7951	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good						
1240903	LPIO-8011	yes	Do not allow trees to be needlessly cut down. Try and return Wirral to its roots ie create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner. This is also good for the residents in physical and mental health.						
1246596	LPIO-8082	yes	I support new Wirral tree strategy and trees should be part of the landscaping plans of any new development.						
1246605	LPIO-8188	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner						
1241770	LPIO-8315	yes	A more stringent and transparent tree strategy needs to be developed. Too many mature trees appear to be being felled unnecessarily. This work should not be outsourced but carried out by people who are experienced and knowledgeable in their field of work. This work also needs to be overseen and monitored strictly by the council. The public need to be aware of tree planting which is taking place as all we currently see and hear about is how Wirral's trees are being destroyed by Mancoed contractors. The aim of 10% tree coverage seems very low, Wirral needs to be much more ambitious than this if residents are to believe the council are treating the climate crisis as such. New developers must be made to offset property building/concreting of our environment with a minimum requirement eg. inclusion of trees in communal spaces, size of gardens, green roofs on utility buildings, shops.						
1246612	LPIO-8390	yes	Identify an area of green belt and plant a new wood or forest. It would be a great way of offsetting the carbon of the rest of the plan and if planned well with was an cycle paths could be a tourist attraction as well						
1239410	LPIO-842	yes	I would suggest that for each new dwelling constructed, the developer should plant one suitable tree in the curtilage of the dwelling or pay a fee to the Council (similar to S106) to cover the cost of a tree planted. I also think the 1 tree felled, replaced with 2 figure is too low. I would suggest fell 1, replant 3. Some other Council's even go up to 4.						
1237882	LPIO-8462	yes	Yes, plant trees and promote wildlife corridors on areas of greenbelt such as Parcel 6.15 rather than suggesting they be released for building. Promote use these areas to promote wellbeing and outdoor activity. Be visionary with this approach so that benefits can be obtained for now and for future generations. In areas of regeneration such as Birkenhead plan and build areas of greenbelt and promote tree planting to follow up-to-date visionary cities that are greening urban space e.g. Singapore...Birkenhead Park is an Victorian example of this...but new methods worldwide are also including smaller pockets or green space in all areas e.g. Oslo.						
1237832	LPIO-8623	yes	Tree planting itself may be necessary in some places. But as a general rule, leaving natural sites alone to regenerate would produce the right habitat. Stop managing.						
1245472	LPIO-8747	yes	For tree planting to be successful there will need to be a supporting management policy in place. Trees grow and it will not be sufficient to just plant trees with no vision for how they will look or impact on their neighbourhood. Careful thought needs to be given to the type of tree to ensure that it suits the location eg woodland, parks or adjacent to the public highways. There should be a Council accreditation scheme for all practising Tree Surgeons in the Borough so that the required policies can be disseminated, understood and complied with.						
1246631	LPIO-8955	no							
1245034	LPIO-9077	no							
1240872	LPIO-9146	yes	Tree planting rates need to be increased, any tree cut down must be replaced with trees that give an equivalent carbon capture rate.						
1239377	LPIO-9201	yes	Stop cutting down our existing trees, as seems to be the policy from 2019 to the present day. The creation of a new woodlands would also be of great benefit, particularly as an attraction for nature tourism.						

Person ID	ID	Question 8.5 - Do you have any views as to how the Local Plan should promote tree planting?	Question 8.5a - If Yes, What are your views / ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246651	LPIO-9251	yes	<p>Follow the Wirral Tree Strategy. Ensure that local plan addresses the need to protect what is already here as well as planting new. The latest version of the Wirral Tree Strategy states 'WBC will apply suitable planning conditions to protect new and existing trees and enforce them'. Planning conditions should include ones to deter unnecessary pollarding/pruning (see also Wirral Council's Tree Risk Assessment Management tool which is used in making decisions about tree felling, pollarding, pruning and coppicing).</p> <ul style="list-style-type: none"> • Trees should be included in development schemes. Schools could be encouraged to get children planting at the edge of their properties. • Planting a couple of saplings does not make up for felling a mature tree. There should be planting of saplings irrespective of how many mature trees are saved. • Stop strimming every bit of urban greenery. • Promote council adopt a tree scheme which is underused • Where possible, fruit and nut trees should be planted. The possible option of planting evergreen hedges as a better way of improving air quality should be explored • Planting the right trees in the right places and people identified to be responsible for their care 						
1246678	LPIO-9385	yes	If you don't destroy existing trees and green belt there is not the requirement to tree plant. I would propose for every tree destroyed during building on Brown Belt, one is planted in an alternative area in Brown Belt to preserve the natural environment.						
1246624	LPIO-9473	yes	it should be a condition of development that trees are planted in urban greenspaces I would like evidence that felled trees have been replaced by new planting						
1243448	LPIO-957	yes	developers should be required to plant a specified number of trees within each development, even in urban areas. a percentage of these trees should be fruit trees.						
1245833	LPIO-9606	yes	We suggest that the council work in partnership with Woodland Trust, Wirral Wildlife Trust and National Trust to identify broad locations and assess the suitability of land for woodland creation.	https://wirral-consult.objective.co.uk/file/5656466					
1237807	LPIO-9688	yes	Tress are hugly important to some conservation areas such as Mountwood and Eastham. Enforcement for the frequent breaches of policy is a must. We should also like to see the proper maintenance of trees in private ownership. For example the trees in the gardensof Eastham House (designed by Paxton or possibly Kemp) have been neglected for decades by Riverside Housing. They are probably looking at the gardens for development and it might suit them to say the trees are dangerous - omitting to mention that it was through their neglect.						
1242554	LPIO-9724	yes	We support 'the right tree for the right place'.						
1246693	LPIO-9874	yes	Be ambitious and plant a forest like Delemare existing nature reserves could be expanded and activities could be included within the forests.
