

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246747	LPIO-10251	yes	It's quite simple - Do not build on greenbelt land, and ensure that as much land as possible is left available for tree planting/preservation.						
1245044	LPIO-10304	yes	Trees and wildflowers should be planted on all grass verges - this will save on grass verge maintenance costs						
1246559 (Wirral Wildlife Trust)	LPIO-10358	yes	We are extremely pleased to see the council has a tree planting strategy and we hope that planting the 'right tree in the right place' approach will be adopted. All significant Areas of tree planting must be informed by ecological advice. X is currently working on a tree planting opportunity map to highlight the best and least desirable places to plant trees in terms of the potential benefits or possible negative impacts on existing biodiversity. We would welcome the opportunity to work with Wirral Borough Council on this.	<a href="https://wirral-consult.objective.co.uk/file/5668196">https://wirral-consult.objective.co.uk/file/5668196</a>					
1246544	LPIO-10436	yes	Every development should contribute to the targets in the Wirral Tree Strategy, and the Climate Change Strategy for Wirral, Cool2. Any wide roadside verge could accommodate trees or at least dense hedging if the grass were not always being trimmed. School and other public grounds should have trees and hedges planted round them (reducing air-pollution in particularly vital places, among other benefits). Urban green spaces could be much improved by the planting of trees, with encouragement for the local community to get involved.						
1241065	LPIO-10502	yes	Turn some roads into open spaces for active travel and plant trees in the middle.						
1244412	LPIO-1056	yes	grass verges - make up a huge area. Around flood prone areas. Local parks. All schools and community centres designate a piece of land for new tree planting. New home developments - require all developers to plant one native tree in each new garden/public garden created for each dwelling built.						
1241337	LPIO-10578	yes	I have already submitted ideas as part of a previous consultation. Road verges seem obvious areas eg between Heswall and Thurstaston; along the Chester High Road; between Meols and Bidston.						
1246724	LPIO-10583	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246242	LPIO-10994	yes	Better management of Parks and existing woods with additional planting of deciduous trees and extending these areas along with enhancing urban areas, especially Birkenhead.						
1243890	LPIO-1140	yes	Plant the trees on weakly-performing green belt						
1247196	LPIO-11616	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247214	LPIO-12446	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247492	LPIO-12551	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1240843	LPIO-12707	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247578	LPIO-12906	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247510	LPIO-13030	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246335	LPIO-13168	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246853	LPIO-13421	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246852	LPIO-13546	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247746	LPIO-13701	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1244681	LPIO-1389	yes	Developments should always contribute to the targets and outcomes identified in the Wirral Tree Strategy and Cool 2, The Climate Change Strategy for Wirral						
1242183	LPIO-14019	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247218	LPIO-14114	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247219	LPIO-14217	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247220	LPIO-14315	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247222	LPIO-14444	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247226	LPIO-14534	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247245	LPIO-14631	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247829	LPIO-14671	yes	I have no concrete proposals for whole Forest plantations, can only say that there is not much free space in Wirral for the purpose of planting trees and that, wildflower meadows, marshland as well as some scrubland must be retained for their biodiversity value and because they store carbon themselves. Some Local Authority Parks would easily accommodate more trees and shrubs (including as hedges). Suitable and desirable places should be proposed, promoted and realised, where possible, by Community Groups, possibly also by schools and colleges. The long-term safety of the plantations must be considered, especially in term of the future size of trees.						
1246827	LPIO-14750	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1243700	LPIO-1510	yes	Anywhere that tree planting would be suitable, particularly in urban areas.						
1247246	LPIO-15370	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247248	LPIO-15500	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247251	LPIO-15592	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247252	LPIO-15679	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247274	LPIO-15783	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247275	LPIO-15937	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247936	LPIO-16051	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1241381	LPIO-162	yes	See also Ques 8.5 re: other bodies eg churches along/near edges of any green public space [don't take over open play space] Use small, but native trees eg crab apple on roundabouts where overall height and growth is slow; so reducing need for pruning Avoid small whips and saplings.... although cheaper, they are less well established than older plants, are less publically appreciated and more vulnerable to vandalism						

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247287	LPIO-16245	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247344	LPIO-16333	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247349	LPIO-16420	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247353	LPIO-16508	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247354	LPIO-16603	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247434	LPIO-16701	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1244969	LPIO-1677	yes	Offers of tree planting as a trade off for other Green Belt release by owners of Green Belt land, however, land owners should still be encouraged to plant in appropriate areas as described previously. Financial support is often a good incentive but should include responsibility. Wide road verges, appropriate additions to park land and introductions to recycled land are all important considerations.						
1247436	LPIO-16811	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247935	LPIO-16870	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead. As over 1000 trees have been felled recently, they need to be re planted partly at the same locations.						
1247437	LPIO-16998	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247439	LPIO-16999	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247441	LPIO-17107	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247960	LPIO-17228	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247962	LPIO-17317	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247966	LPIO-17425	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247971	LPIO-17526	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1241726	LPIO-17626	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247979	LPIO-17785	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247980	LPIO-17786	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1245502	LPIO-17916	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247541	LPIO-18020	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247539	LPIO-18126	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1247996	LPIO-18296	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1237857	LPIO-18344	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1245060	LPIO-1912	yes	I believe that Wirral should create a Wirral Forest on hundreds of acres of land. This would be a massive tourist attraction and a good revenue earner.						
1245105	LPIO-2110	yes	I understand that Prenton residents society would like trees planted along the shop fronts.						
1246851	LPIO-21202	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246918	LPIO-21421	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246924	LPIO-21422	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246928	LPIO-21423	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246920	LPIO-21617	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246926	LPIO-21618	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1245112	LPIO-2187	no							
1238379	LPIO-2272	yes	We should be consulting with experts to ensure that we are planting the right species of tree in the right place.						
1241016	LPIO-232	yes	Additional trees could be planted in the West Kirby Old Village Conservation area including the Rectory Road fields. This is the area described in question 8.9.						
1242185	LPIO-23945	yes	The Wirral Landscape Character Assessment notes within Cheshire West and Chester, adjacent to Wirral, the aspiration is to increase woodland cover to 10- 30%, through the creation of small woodlands. Wirral Council is not a contributing partner to the Mersey Forest. Is it possible for Wirral to consider increasing its ambitions on new woodland cover? There may be exciting opportunities being presented through the Northern Forest initiative.	<a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a>	<a href="https://wirral-consult.objective.co.uk/file/5684263">https://wirral-consult.objective.co.uk/file/5684263</a>	<a href="https://wirral-consult.objective.co.uk/file/5657006">https://wirral-consult.objective.co.uk/file/5657006</a>			
1246559(Wirral Wildlife Trust)	LPIO-24562	yes	We are extremely pleased to see the council has a tree planting strategy and we hope that planting the 'right tree in the right place' approach will be adopted. All significant areas of tree planting must be informed by ecological advice. We are currently working on a tree planting opportunity map to highlight the best and least desirable places to plant trees in terms of the potential benefits or possible negative impacts on existing biodiversity. We would welcome the opportunity to work with Wirral Borough Council on this.						
1246458	LPIO-25812	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246459	LPIO-25813	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1237870	LPIO-2605	yes	Instead of allocating GREENBELT for housing the Council should instead be planting trees on some strategically positioned plots. Existing parks could have more trees planted. Some of these "parks" are little more than bare ground with hardly a tree in sight.						

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1240932	LPIO-26630	yes	Yes, we take the view that the Council will have to release land from the Green Belt in the Local Plan in order to meet its housing and employment land needs and our land represents the best option to meet these needs within the Green Belt due not only to its location but also due to our ability to bring forward a wide range of compensatory enhancements. As part of this approach, there are significant parts of our landholding where appropriate tree planting could be undertaken alongside land release from the Green Belt for development as part of a coordinated collaborative approach towards meeting the Borough's needs in the emerging Local Plan.	<a href="https://wirral-consult.objective.co.uk/file/5683689">https://wirral-consult.objective.co.uk/file/5683689</a>	<a href="https://wirral-consult.objective.co.uk/file/5682697">https://wirral-consult.objective.co.uk/file/5682697</a>	<a href="https://wirral-consult.objective.co.uk/file/5682701">https://wirral-consult.objective.co.uk/file/5682701</a>			
1245180	LPIO-2771	yes	Invite residents to suggest where they would like trees planted.						
1245100	LPIO-2798	yes	New Developments. The production of a Green Infrastructure Master Plan for Wirral, drawn up by an appropriate professional, such as a Landscape Architect, would give a coherent overview of such infrastructure and, as well as identifying current and possible new wildlife corridors, could also identify the key areas for tree and hedgerow planting.						
1248546 (Wirral Wildlife)	LPIO-2881	yes	See supporting information and Wirral Tree strategy. Key areas are ; Parks and open spaces, in conjunction with communities Agricultural land depending on national policy and food supply Areas of least tree cover ie Wallasey and Birkenhead Hedges by sensitive air quality receptors eg schools Areas that could produce commercial wood products Buffer zones round all existing woods, by natural regeneration not planting Avoid sensitive habitats, LWS, Supporting Habitats to SPA and other places where trees would actually do harm.	<a href="https://wirral-consult.objective.co.uk/file/5676768">https://wirral-consult.objective.co.uk/file/5676768</a>					
1245159	LPIO-3076	yes	NOT in urban parks or on unsuitable habitats like heathland						
1245287	LPIO-3172	yes	Wherever they are needed, which will come out of the masterplan, but they should be used, with hedgerows to create shelter, to reduce the impact of Climate Change generated high winds.						
1241315	LPIO-3313	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1238835	LPIO-3443	yes	A programme of enhanced tree planting in our urban areas, ie the Wirral Waters project and Hind Street areas. More trees in our urban areas are desperately needed to extend parks and woodland. The newly regenerated Birkenhead town centre should be a prime target for tree planting, in order to provide as much open and green space, as possible.						
1237944	LPIO-3454	yes	Adding young trees in tubs, which can be placed on footways and in areas of plazas, or between parking spaces, would provide green, pollution reducing, environmentally supportive elements that can be relocated if a development proposal required the use of that particular section of land. The creation of such tubs, using recycled plastic, could be a new business employing local residents, and thus enhance the employment and financial viability of the local plan. This would also create the Councils desired aim of promoting a green Urban Town						
1245451	LPIO-3586	yes	Not in urban parks except to replace trees lost from felling.						
1237827	LPIO-3825	no							
1245288	LPIO-3894	yes	Along the promenades and anywhere justifiable.						
1240939	LPIO-4174	no							
1245346	LPIO-4242	yes	Developments should always contribute to the targets and outcomes identified in the Wirral Tree Strategy and Cool 2, The Climate Change Strategy for Wirral.						
1245638	LPIO-4310	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1237667	LPIO-4587	yes	There should be a general tree planting police covering all areas. Urban areas benefit from the presence of trees as much as rural areas.						
1237696	LPIO-4736	yes	As widely as possible please!						

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1244720	LPIO-4741	yes	I have loads of ideas and specific sites which I would be happy to share with the holder of the environment portfolio. Generally: <ul style="list-style-type: none"> <li>• there is huge potential for planting roadside.</li> <li>• There are numerous locations within housing estates in Rock Ferry and Prenton which could be considered.</li> <li>• Upgrading parks and open spaces such as Ashton Park, The Priory, Birkenhead Park, and Sandlea Park and Tower Grounds New Brighton.</li> <li>• Planting to the back of Kings Parade New Brighton</li> <li>• restoring the willows taken from Green Lane and Park Lane.</li> <li>• Hedging improvements and new planting to the Carr Lane fields.</li> <li>• Encouragement of hedge planting in any suitable locality.</li> <li>• Orchards in Primary schools and open spaces even within the urban areas of Birkenhead such as Ilchester Park would be beneficial</li> </ul>						
1243171	LPIO-4979	yes	WFPOSPS is happy to join with other bodies to suggest sites for additional trees. Our footpath Inspectors have a lot of local knowledge between them.						
1245713	LPIO-5121	yes	tree planting should be used to expand our parks and woodland as well as in urban areas on East side of Wirral to make it a more pleasant and healthier place to live.						
1245501	LPIO-5151	yes	As it seems that some private land owners are very happy at the prospect of selling plots of open space, green sites due to the potential of inflated land prices, encouraged by the proposition of residential development. The council should purchase these agricultural sites at the correct land prices for agricultural usage with a view to create large wooded areas, in particular areas subject to increased flooding or with especially poor drainage. Obviously, it then becomes apparent that if such areas were subject to natural events such as flooding and poor drainage, they would have been most unsuitable for residential development anyway.						
1245496	LPIO-5241	yes	Tree planting should in parks, woodland and rural areas creating a mini forests . Also further tree planting to take place in Urban areas such as Birkenhead.						
1246006	LPIO-5350	yes	Developments should always contribute to the targets and outcomes identified in the Wirral Tree Strategy and Cool 2, The Climate Change Strategy for Wirral						
1240383	LPIO-5450	yes	WBC should make approaches to the Mersey forest and Northern forest initiatives.						
1241800	LPIO-5600	yes	Trees should be included in development schemes. Schools could be encouraged to get children planting at the edge of their properties. Assumption should be that as a rule trees do not need "managing", which is all too often used simply as an excuse to fell. Planting a couple of saplings does not make up for felling a mature tree. There should be planting of saplings irrespective of how many mature trees are saved. Plenty of private individuals would plant trees, if the Council would stop strimming every bit of urban greenery.						
1242541	LPIO-5682	yes	<ul style="list-style-type: none"> <li>• Telegraph Road - from Gayton roundabout to Tescos. Replace trees that have been cut down and add new ones.</li> <li>• Pensby Road - from junction with Belmont Drive to Thingwell Road East. Replace the numerous trees that have been cut down and add new ones.</li> <li>• Many, many locations across the Woodchurch estate Junction of A5088 and B5145 - one of the most air polluted spots on the Wirral</li> <li>• All four sides of Liscard shopping centre, especially along the A551 where the school backs onto the road</li> <li>• All along A554 - Seabank Road, King Street and Brighton Street</li> <li>• Wheatland Lane</li> </ul>						
1245984	LPIO-5763	yes	There could be a tree planting scheme in the gardens of local residents as gardens are an under utilized resource. Tree planting could also take place on many roadside verges. There could be more tree planting in green spaces, local parks, cemeteries and alongside footpaths.						

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1244896	LPIO-5887	yes	Tree planting should be informed by the 'Wirral Tree Strategy'. See comments to Q8.5. Trees must NOT be planted where they would do harm: e.g. marshland, heathland, species-rich grassland. Avoid land functionally linked to European Sites, as wetland birds that use such Supporting Habitats need open spaces not trees. Also, not on land that is already a good carbon store. The Council should: examine its own parks and open spaces. Many urban parks need a fresh design and new tree areas to take over as existing trees age. This process must work closely with local communities, especially 'Friends' groups, and educate people about the benefits of trees, to accept more tree cover in amenity grassland areas, to benefit both wildlife and the wider environment. Small pockets of urban greenspace that are currently sterile mown grassland could benefit from small groups of trees e.g. Heygarth Road POS, Eastham; work with landowners, as agriculture has to change to meet Climate imperatives, to find suitable land for trees, whether planted or naturally regenerated. Such land can remain private, and should do so where sensitive wildlife may be involved. Much will depend on Government funding for agriculture; plant trees in places with low tree-cover, such as Birkenhead and Wallasey as an integral part of Regeneration; plant hedgerows where they will give maximum benefit to air quality at sensitive locations: e.g. along roads, by schools, hospitals; look for opportunities for production of timber and other economic benefits, and facilitate such opportunities when they arise; buffer existing woodland, preferably by natural regeneration, providing this does not encroach on other valuable habitats. Avoid new tree growth around habitats that need good light: e.g. ponds.						
1246310	LPIO-5971	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead where mature trees need to be gradually replaced						
1246339	LPIO-6188	yes	1. The M53 corridor 2. Residential streetside trees 3. Planting to main highway corridors linking settlements 4. Within existing parks and country parks to ensure a mixed age structure . 5. As part of commercial and industrial development						
1246339	LPIO-6350	yes	M53 corridor Main highway links between settlements residential roads within country and urban parks						
1242751	LPIO-644	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246402	LPIO-6476	yes	In all built up concrete areas. As suggested before some tree planting along the Promenade or edge of the dips in New Brighton would greatly improve the outlook.						
1241800	LPIO-6819	yes	I would love to see more pocket parks in urban areas. Near to where I live there are several areas of unused rough ground, such as on the corner of Westbourne Rd and Ridley St, between Craven St and Bentinck St and also on the old tennis courts next to the Edward Kemp Community Gardens. I think this old tennis court location, next to the Edward Kemp, is perfect for tree planting. Currently the heavy rains roll straight off the tar mac tennis courts and into the Kemp community garden, flooding it regularly throughout the year. I would love to see the tar mac taken up and some water loving trees planted - maybe willow? This could become a community resource were the willow to be harvested. Any trees planted here would help with water permeating into the ground and retain the soil, provide habitat etc.						
1241868	LPIO-6820	yes	More trees everywhere on Wirral, especially in urban areas.						
1241723	LPIO-6937	yes	Developments should always contribute to the targets and outcomes identified in the Wirral Tree Strategy and Cool 2, (The Climate Change Strategy for Wirral)						
1245086	LPIO-6961	yes	New trees could be planted in all suitable sites - e.g. parks, urban areas, to extend existing woodlands & as stated in the last answer to create a Wirral Forest.						
1237647	LPIO-712	yes	Please refer to answer to Q8.5						
1246488	LPIO-7280	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1246348	LPIO-7353	yes	See above but definitely plant appropriate trees in the centre of Birkenhead, New Ferry and other very urbanized areas. It would make a great difference to the residents.						

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1240932	LPIO-7630	yes	Yes, as demonstrated in these representations, Leverhulme takes the view that the Council will have to release land from the Green Belt in the Local Plan in order to meet its housing and employment land needs and Leverhulme land represents the best option to meet these needs within the Green Belt due not only to its location but also due to Leverhulme's ability to bring forward a wide range of compensatory enhancements. As part of this approach, there are significant parts of Leverhulme's Wirral Estate where tree planting could be undertaken alongside land release from the Green Belt for development as part of a coordinated collaborative approach towards meeting the Borough's needs in the emerging Local Plan. This would align with paragraph 138 of the Framework which states that "when drawing up or reviewing Green Belt boundaries, the need to promote sustainable patterns of development should be taken into account. Strategic policy making authorities should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary...[plans] should also set out ways in which the impact of removing land from the Green Belt can be offset through compensatory improvements to the environmental quality and accessibility of remaining Green Belt land". Policies should set out compensatory improvements to the environmental quality and accessibility of the residual Green Belt and this could include new or enhanced green infrastructure and woodland or appropriate planting. As such, Leverhulme welcomes the opportunity for early engagement with the Council to discuss development across the Estate including areas where new tree planting could be delivered and maintained for future generations as part of the holistic approach advocated in our Vision Document.	<a href="https://wirral-consult.objective.co.uk/file/5683689">https://wirral-consult.objective.co.uk/file/5683689</a>	<a href="https://wirral-consult.objective.co.uk/file/5682697">https://wirral-consult.objective.co.uk/file/5682697</a>	<a href="https://wirral-consult.objective.co.uk/file/5682701">https://wirral-consult.objective.co.uk/file/5682701</a>			
1246592	LPIO-7825	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead						
1246594	LPIO-7952	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1240903	LPIO-8015	yes	Ensure the parks and open spaces are well stocked and cared for with regards to trees and plants. Rejuvenate and loss of urban trees and plants.						
1246605	LPIO-8192	yes	Tree planting should be used to extend our parks and woodlands as well as more trees in the urban areas, in particular Birkenhead.						
1241770	LPIO-8318	yes	All developers must be made to comply with a strict tree planting policy and this should be advertised. Contracts should only be given to 'green' builders and developers. This information would then be in the public domain via developer's adverts and publications. Enter into more partnerships with highly respected independent groups eg wildlife trust, woodland trust, RSPB and advertise these joint ventures and use them to attract tourism.						
1239410	LPIO-843	yes	<ul style="list-style-type: none"> <li>The Abbots Grange Estate in Bebington had many of its trees felled some years ago. Any efforts to plant them here would be warmly received by residents.</li> <li>Further afield, I would prefer empty grass verges or "gapping up" where previous trees in verges were felled in residential areas.</li> <li>Main road corridors such as the A41 would be good too.</li> </ul>						
1237882	LPIO-8463	yes	Tree planting should be included in ALL parts of Wirral. Healthy living and benefits of green urban space should a right of all...but this might look different in different community...ask those communities what they would like and how and where their trees should be planted.						
1246598 (Hoylake Vision)	LPIO-8726	yes	Within the context of a new Wildfowl and Wetlands Centre						
1246637	LPIO-8883	yes	Wherever possible street tree planting should be promoted within existing and developed neighbourhoods. Specific guidance on appropriate species to deal with micro climates, prevailing winds, salt etc should be published. Detailed guidance on specific safeguarding measures to be adopted in the planting of trees in particular situations, including in vicinity of utilities/ wall etc. Appropriate establishment and maintenance programmes must also be considered. Urban Fringe new tree planting within country park and along key transport corridors.						
1246631	LPIO-8957	no							
1245034	LPIO-9080	no							
1240872	LPIO-9151	yes	around all existing greenbelt sites and the corridors which link greenbelt sites like SP043 to the wider countryside.						

Person ID	ID	Question 8.6 - Do you have any ideas as to where the Council should promote new tree planting as part of its Tree Planting strategy?	Question 8.6a - What are your ideas?	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1239377	LPIO-9204	yes	Birkenhead is crying out for more 'green lungs' in the form of trees. New planting can extend our parks and woodlands, encouraging much needed insects.						
1246651	LPIO-9253	yes	Developments should always contribute to the targets and outcomes identified in the Wirral Tree Strategy and Cool 2 the Climate Change Strategy for Wirral.						
1246678	LPIO-9386	no							
1246624	LPIO-9479	yes	<ul style="list-style-type: none"> <li>• Harrison Park,</li> <li>• Wallacre Field, Wallasey,</li> <li>• Coronation Park Greasby,</li> <li>• Behind Aldi Prenton</li> </ul>						
1245833	LPIO-9609	yes	Sites should be identified and agreed through discussions with relevant partners. Work should include an assessment of low grade agricultural land adjacent to existing woodland parcels to assess suitability for woodland creation. It will be important to ensure connectivity to existing woodland for the greatest benefit to wildlife. Site selection should also be informed by an understanding of local landscape character.	<a href="https://wirral-consultobjective.co.uk/file/5656467">https://wirral-consultobjective.co.uk/file/5656467</a>					
1242554	LPIO-9727	yes	If feasible, street trees should be planted where there are none.						
1246693	LPIO-9876	yes	As per my previous answer - plant a forest, replant and extend the current nature reserves. Parks should be developed and urban areas should have green areas to enjoy.
