1238582	LPIO-10643	ves								
1248825	LPIO-10657	yes			Do not disagree that careful consideration of the future of inner Wirral and the potential of strategics ites to deliver change is maximised. However, it is essential that the approach is enshrined in the WLP or another development plan document, with sound policies dealing with the regeneration of the Birkenhead area. This would ensure that the status and role of such policies is clearly understood. At present it is unclear precisely what relationship the BRF would have with the WLP. Proper co-ordination of development across the BRF area is essential in order to ensure the proper planning of supporting infrastructure and also to ensure compatibility between development proposals. This BRF needs to build on the Wirral Waters Vision Statement (2010), the Wirral Waters Design & Access Statement and the Birkenhead integrated Regeneration and the concept of 'repopulating Birkenhead' through a focus on the 'Partnership Neighbourhood Areas' that surround the Dock Estate, which are now included in the 'Left Bank Growth Point' area. The BRF has a critical role to play in demonstrating the overall deliverability of the Local Plan and therefore satisfying the tests of soundness. It must be aspirational and visionary, set out benchmarks in sustainability levels, smart technologies, on community creation and inclusive growth, on transport and mobility, in density, design quality and design execution as well as in measuring impacts on people. It also needs to set out the necessary commitments and benchmarks from the Council alongside delivery roles and responsibilities to fully realise the scale and type of development which the BRF needs to help deliver.	https://wirral- consult.objective.cc .uk/file/5684264	2

1242155	LPIO-13451	yes			Yes. The establishment of a dedicated delivery model will help support expedient, efficient ad quality delivery. However the creation of a dedicated delivery model should not be exclusive to Birkenhead and other models should be set up to support delivery elsewhere in the Borough by geography or theme (eg housing) as appropriate. Clear lessons should taken from previous delivery models.

1244898	LPIO-1641	yes			See earlier comments on the urgent need for a single-minded approach and concentration on Regeneration of Birkenhead, the Docklands, Waterfront, hinterland and surrounding urban areas. Make the Policy of "Urban Intensification" with defined limits and conditions known widely and then leave the Market to deliver in all other areas, as it is already doing well in this regard but has faced unnecessary resistance. Make it clear that development within Green Belt will not be tolerated (for a specified period, if necessary). Remember, the Head of Planning made clear the Green Belt Policy back in 2014 when stating that there was NO need to consider release or development of Wirral's Green Belt until at least 2028 at the earliest. With what has happened since, there can be no reason for not extending this statement to 2035 – the duration of the Local Plan (with a Review in or before 2025).

It is essential that the proposed regeneration is build around the the strongest possible criteria to establish Wirral as a regional hub for sustainable living consistent with The Climate Emergency. In line with the "Mini Holland " model, walking must be prioritised over car journeys. 1244896	LPIO-2593	yes			See earlier comments on the urgent need for a single-minded approach and concentration on Regeneration of Birkenhead, the Docklands, Waterfront, hinterland and surrounding urban areas. Make the Policy of 'Urban Intensification' with defined limits and conditions known widely and then leave the Market to deliver in all other areas, as it is already doing well in this regard but has faced unnecessary resistance. Make it clear that development within Green Belt will not be tolerated (for a specified period, if necessary). Remember, the Head of Planning made clear the Green Belt Policy back in 2014 when stating that there was NO need to consider release or development of Wirral's Green Belt until at least 2028 at the earliest. With what has happened since, there can be no reason for not extending this statement to 2035 – the duration of the Local Plan (with a Review in or before 2025).

1237944	LPIO-306	yes			The regeneration of Birkenhead should include the views of local residents directly, and not just the requirements of commercial property development. The Council appears to recognise this by including public consultation, but this should be enhanced by use of localised residential workshops to address local issues not previously identified by local Councilors & commercial corporate partners.

1240932	LPIO-7603	no	it would be too expensive; Other (please state)	Please refer to our attached representations.	No, we cannot support this as the delivery model for the regeneration of Birkenhead set out by the Council is neither deliverable nor viable. Our Client broadly supports the establishment of a dedicated delivery model for the appropriate regeneration of Birkenhead but is extremely concerned about the deliverability of the strategy outlined in the Issues and Options document. Whilst it is acknowledged that the Council recognises "the significant challenges to delivering the scale of regeneration required to meet our housing and employment needs within the existing urban area" (paragraph 2.106) and the Local Plan is only at Issues and Options stage, we have significant concerns that the Council's strategy to deliver growth through regeneration is not sufficiently robust for it to form the base of a deliverable and sound Local Plan in line with the requirements of national policy and guidance. This strategy, outlined at paragraph 2.106 of the Issues and Options document, mainly comprises aspirations and ambitions rather than guaranteed deliverables upon which Wirral can rely, for example: 1. Engaging proactively with bodies to provide additional resources; 2. Commissioning the BRF but with no reference to a delivery date; 3. "the BRF will also take account of the potentially significant funding for project delivery dhir may become available"; 4. "the BRF will explore the concepts"; 5. Submitting a bid to "seek funding to undertake works which could lead to the designation of Birkenhead and parts of Seacombe as an Urban Development Corporation"; and 6. Internal reorganisations within the Council. Moreover, the Council states at paragraph 2.107 that it is only "if all these actions come together" that the Council can adopt its preferred Urban Intensification Option and avoid the need to release Green Belt stites in the final draft Local Plan.	https://wirral- consult.objective.cc .uk/file/5683689	https://wirral- consult.objective.cc .uk/file/5682697	https://wirral- oconsult.objective.cc .uk/file/568271

1246598 (Hoylake Vision)	LPIO-8128	yes			Agree, however make cultural and employment linkages with smaller peripheral developments across the borough which are easily accessible by rail or road. Any successful city has its own 'village hubs'; London has Camden, Islington, Brixton; each with their own character and each self contained but all linking with the city centre. Don't view Birkenhead as an isolated project; it needs to have 'spokes' to other parts of the borough to ensure greater resilience.					
1246612	LPIO-8269	yes								
1237882	LPIO-8272	yes			I full support the regeneration of Birkenhead. This should be a co-ordinated and long term vision that ensures that ALL communities gain access to good housing, employment opportunities and that Wirral is seen as a strong and economically vibrant stakeholder in the LCR vision of economic growth in the next 100 yearsand not just a economically divide commuter borough that does not have the vision or confidence to re-imagine more for its population. Liverpool has been ambitious in its regeneration so why can't Wirralthis plan will be a key part of whether WBC only has the vision for short term fixes which favour developers or the long term vision that favours all.

1246544	LPIO-8739	yes			It is important that all development plans are well linked to provide a coherent regeneration. 246693	LPIO-9593	yes			I support the regeneration of Birkenhead. I disagree with definition of 'settlement' and the areas that are included in this I refer back to my response at 2.5. If you use this question/answer to include the areas classified with Birkenhead under 'Urban Conurbation (previously identified as Settlement Areas 1-4)' - then you are misleading me with the question. I do not support any release of greenbelt or open spaces for development.					
246691	LPIO-9624	yes								
238193	LPIO-9632	yes			Our Client supports the establishment of a dedicated delivery model for the Regeneration of Birkenhead, particularly where this will unlock the full potential of Hind Street. As stated previously in this submission document, and on the basis of this submission document and appended Vision Document, our Client believes that its involvement in any dedicated delivery model or mechanism is key to unlocking the full potential of Hind Street, particularly in its commitment to working in collaboration with the Council and its identified partners to prepare a regeneration and delivery strategy that is realistic and achievable and can therefore be embedded into the draft Final Local Plan. In its Local Plan Issues and Options document the Council has provided an indication of what this delivery model might look like, confirming that it is committed to working with key landowners and funding partners to establish an agreed approach to achieving in place by April/ May 2020. This will enable firm figures to be included in the draft Final Local Plan for higher levels of housing to be delivered in years 6 to 10 of the Local Plan, with a possibility of some delivery at the end of years 0 to 5 period. Furthermore, the Council has confirmed it has submitted an expression of interest to Government for funding in November 2019 to generate proposals for a new business-backed innovative delivery vehicle including a possible Urban Development Corporation model for Birkenhead. This recognises the scale of opportunities and the challenges that will be faced to maximise the development potential of Birkenhead, including Hind Street as a Strategic Kixed Site.
