If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)   | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here.   | Attachment 1 | Attachment 2 | Attachment 3 | Attachment 4 | Attachment 5 | Attachment 6 |
|------------------------------------|------------|---|--|--------------|--------------|--------------|--------------|--------------|--------------|
| 1245044                            | LPIO-10017 |   |  |              |              |              |              |              |              |
| 1246747                            | LPIO-10062 | I agree with all of these objectives, but I draw particular attention to Objectives 4, 5 and 6. No greenbelt should be built on - not least because this would contradict Objectives 4, 5 and 6.  | To protect all natural and rural habitats (including greenbelt land), in order to safeguard an environment in which wildlife can thrive, and Wirral residents can enjoy and interact with the peninsular's unique open and rural spaces.   |              |              |              |              |              |              |
| 1246760                            | LPIO-10102 | I agree with the regeneration of Brownfield sites to meet these objectives. I do not agree with the release of Green Belt to meet any of the objectives. Building on Green Belt is counter-productive to many of the objectives   |  |              |              |              |              |              |              |
| 1244412                            | LPIO-1020  | I agree with the brownfield first approach. I agree with Wirral Waters objectives. I do NOT agree to the release of greenbelt in any part of the borough  | Since agreeing to a Climate Crisis in Autumn 2019, the council must now embed the consideration in every decision presented to it on its impact on the climate. Building homes generates carbon and destroys carbon absorbing sites. Calculating a more realistic figure for future housing demand (which would stand at nearer 300 rather than 800 new homes per year) is a key first step in this respect. |              |              |              |              |              |              |
| 1241629                            | LPIO-10257 |   |  |              |              |              |              |              |              |
| 1246559<br>Cheshire Wildlife Trust | LPIO-10261 | Whilst we support Objective 5 the wording is outdated as it reflects that in the 2012 NPPF and not the revised 2018 NPPF. Specifically we refer to the inclusion of the caveat 'where possible' when describing biodiversity net gain. This caveat does not appear in the 2018 version and should be removed. The new guidance refers to securing measurable gains for biodiversity in three sections of the NPPF:<br><ul style="list-style-type: none"> <li>• Paragraph 174b) - identify and pursue opportunities for securing measurable net gains for biodiversity.</li> <li>• Paragraph 175 d) - development whose primary objective is to conserve or enhance biodiversity should be supported; while opportunities to incorporate biodiversity improvements in and around developments should be encouraged, especially where this can secure measurable net gains for biodiversity</li> <li>• Paragraph 170d) - minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures</li> </ul> We suggest this revised wording for Objective 5: Protect and improve the quality and accessibility of green space, green infrastructure and nature, whilst protecting and enhancing biodiversity and ensuring that development delivers MEASURABLE net gains FOR BIODIVERSITY. | Protect and improve the quality and accessibility of green space, green infrastructure and nature, whilst protecting and enhancing biodiversity and ensuring that development delivers MEASURABLE net gains FOR BIODIVERSITY.  |              |              |              |              |              |              |
| 1246772                            | LPIO-10342 |   |  |              |              |              |              |              |              |
| 1246731                            | LPIO-10398 | The objectives are admirable in their own right, but undeliverable because they do not include objectives that ensure a supply of deliverable and developable sites.  |  |              |              |              |              |              |              |
| 1246778                            | LPIO-10401 | Birkenhead vision can be housing and shopping. Needs to be far more extensive in nature. Focus has to be on increasing employment and employability of locals, so they have money to spend locally. Need to have strong job hubs, attraction strategy for industry, links to schools and apprenticeships etc. Birkenhead needs to focus on locals and their lifestyles and enhancing their life chances. This is not achieved by enhancing the physical attributes of the town / shopping alone. It is part of a far greater life enhancement investment, linked to jobs.   |  |              |              |              |              |              |              |
| 1240223                            | LPIO-10452 | We agree with Objective 11, but we do not feel that the proposed spatial strategy represents the best opportunity to achieve it. A number of sites have been identified as being Primarily Industrial Areas which we understand would lead to a presumption for B1/B2/B8 uses. Many of those sites are not entirely in B1/B2/B8 use and the Council's own evidence is clear that B1/B2/B8 uses are non-viable without subsidy. It must therefore be preferable to take reasonable opportunities for a more granular approach through which areas for "flexible commercial use" are identified which would represent a better and more pragmatic approach to managing opportunities for commercial development. As an example, this should include land at Prenton Way from the Total Fitness to the site now with planning permission for a McDonald's drive-through. This would represent retention and extension of the ELPS094 allocation identified through the previous round of consultation in late 2018.  |  |              |              |              |              |              |              |

| Person ID | ID         | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)  | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here.   | Attachment 1  | Attachment 2 | Attachment 3 | Attachment 4 | Attachment 5 | Attachment 6 |
|-----------|------------|--|--|---|--------------|--------------|--------------|--------------|--------------|
| 1248825   | LPIO-10661 |  | Specific reference to the potential contribution of Wirral Waters should be reflected in the supporting text of each SO, for example in SO10 and SO11, as Wirral Waters will undoubtedly play a major role in, respectively, tackling deprivation, skills development and providing a range of employment and mixed-use sites. | <a href="https://wirral-consult.objective.co.uk/file/5684264">https://wirral-consult.objective.co.uk/file/5684264</a> |              |              |              |              |              |
| 1238582   | LPIO-10682 |  |  |   |              |              |              |              |              |
| 1247073   | LPIO-10825 |  |  |   |              |              |              |              |              |
| 1237930   | LPIO-10839 | I agree with the Brownfield first approach. I do not agree with any Greenbelt release. I do agree with Wirral Waters objectives.   |  |   |              |              |              |              |              |
| 1247077   | LPIO-10855 | I agree with the Brownfield first approach. I do not agree with any Greenbelt release. I do agree with Wirral Waters objectives.   |  |   |              |              |              |              |              |
| 1247079   | LPIO-10872 | I agree on the brownfield first approach. I do not agree with including releasing any greenbelt land for housing development. I do agree with the Wirral Waters objectives.  |  |   |              |              |              |              |              |
| 1247087   | LPIO-10888 | The responsible use of land and sustainability should dictate that the Green Belt should be maintained in its entirety for future generations. For anything but small-scale development, some builders and environmental organisations are trailing the inclusion of green spaces planted with trees within blocks of new housing. The aim is to encourage corridors for wildlife as well as helping to improve air quality. We should be forward-thinking here. |  |   |              |              |              |              |              |
| 1243890   | LPIO-1090  | I don't believe the council should 'identify local housing needs and provide a choice of housing for people at all stages of life and incomes'. The council should provide housing for people on low incomes only.   |  |   |              |              |              |              |              |
| 1247097   | LPIO-10903 |  |  |   |              |              |              |              |              |
| 1247098   | LPIO-10918 | I agree with the brownfield first approach. I do NOT agree with including any greenbelt release. I do agree with Wirral Waters objectives.   |  |   |              |              |              |              |              |
| 1247103   | LPIO-10936 | I agree with the brownfield site first approach. I don't agree with including any greenbelt release. I do not agree with Wirral waters objectives.   |  |   |              |              |              |              |              |
| 1247120   | LPIO-10955 | I do not agree with use of green belt land for any development.  |  |   |              |              |              |              |              |
| 1247128   | LPIO-11022 | The objectives need to be focused around the Birkenhead dockland areas to promote a sustainable future outlook for employment housing and transport. A similar model to Salford Quays should be applied. Not to focus on the West side of the M53.   |  |   |              |              |              |              |              |
| 1247129   | LPIO-11038 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives  |  |   |              |              |              |              |              |
| 1247130   | LPIO-11051 | I agree on the brownfield first approach. I do not agree with including any greenbelt release. I agree with Wirral Waters objectives.  |  |   |              |              |              |              |              |
| 1247133   | LPIO-11086 | I agree on the brownfield first approach. I do not agree with including releasing any greenbelt land for housing development. I do agree with the Wirral Waters objectives.  |  |   |              |              |              |              |              |
| 1247135   | LPIO-11100 | Absolute protection of greenbelt land, parks and open spaces.  |  |   |              |              |              |              |              |
| 1245190   | LPIO-11121 |  |  |   |              |              |              |              |              |
| 1247144   | LPIO-11135 | I do not agree with the release of any greenbelt.  |  |   |              |              |              |              |              |
| 1247146   | LPIO-11152 | I agree with the brownfield first approach. I do not agree with including any green belt release and want this removed.  |  |   |              |              |              |              |              |
| 1246647   | LPIO-11166 |  |  |   |              |              |              |              |              |
| 1246545   | LPIO-11180 | I agree that more brownfield sites should be used, especially to redevelop Birkenhead and towns to make them more attractive for people to live and work. I also think if they were developed it would encourage people to use the facilities and shops. I completely disagree that Green Belt and farmland should be developed, it is vital for well being, food production and to protect ancient, rich farmland.  |  |   |              |              |              |              |              |
| 1247154   | LPIO-11189 | I agree with Brownfield first approach, but there must be no Greenbelt land released.  |  |   |              |              |              |              |              |

| Person ID | ID         | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)   | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here.   | Attachment 1 | Attachment 2 | Attachment 3 | Attachment 4 | Attachment 5 | Attachment 6 |
|-----------|------------|---|--|--------------|--------------|--------------|--------------|--------------|--------------|
| 1247288   | LPIO-11471 | The Council's summary of the proposed Local Plan states that it is 'The Vision for Wirral: A Healthy, Sustainable and Prosperous Borough'. Amongst the purposes which it states are to:- (a) protect our environmental and-heritage assets: -and (b) enable all people in Wirral to live longer and healthier lives. The Council's summary also states that the Plan will "help to tackle climate change". The Council's summary also states that the Plan will "help to tackle climate change". My comments concerning the points made above are as follows:- Heritage Assets. I am informed that Wirral Archaeology along with other interested parties have discovered significant evidence, which is still -being fully evaluated, that the -Battle of Brunanburh took place in the area covered by sites SP040 and 042 and possibly other adjacent sites. This is an enormously important battle in England's history and the site of it should be preserved as naturally as possible as a heritage asset for future generations to visit and enjoy. In addition, and just as importantly, if this area or parts of it were to be developed, the preservation of valuable artefacts relating to the Battle in their proper context would be lost for ever. |  |              |              |              |              |              |              |
| 1247196   | LPIO-11599 | I agree on the brownfield first approach. I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk. |              |              |              |              |              |              |
| 1247359   | LPIO-11646 | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.   |  |              |              |              |              |              |              |
| 1247015   | LPIO-11768 | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  |              |              |              |              |              |              |
| 1247405   | LPIO-12008 | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.   |  |              |              |              |              |              |              |
| 1247363   | LPIO-12009 | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.   |  |              |              |              |              |              |              |
| 1247364   | LPIO-12010 | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.   |  |              |              |              |              |              |              |

| Person ID | ID         | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)   | Question 3.2b - Would you like to suggest a new objective/s. If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)   | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here.   | Attachment 1 | Attachment 2 | Attachment 3 | Attachment 4 | Attachment 5 | Attachment 6 |
|-----------|----------------------|---|--|--------------|--------------|--------------|--------------|--------------|--------------|
| 1247829   | LPIO-14678<br>1 of 2 | In this context, there are some unachievable propositions in the plan such as: "Achieve biodiversity net gain through long-term enhancement and creation of ... habitats that are resilient to climate change". Natural habitat creation is extremely difficult to achieve, so the term should not feature in the plan. We must protect and carefully manage all the Greenfields we got so that net gains in biodiversity can be achieved, and also in new housing developments. I may also repeat here my concern about an omission in the Issues and Options document. This mostly failed to include the site designation "Local Wildlife Site" when referring to, eg, protected Green Belt parcels. This is an important, widely used albeit local, non-statutory designation but it affords some protection to such sites, often in connection with other attributes, eg Landscape value, Ancient Woodland. I expect this omission to be rectified in the final version of the Local Plan, including LWS to be listed together with, eg, BAP, SSSI, SPA etc.  |  |              |              |              |              |              |              |
| 1247829   | LPIO-14678<br>2 of 2 | Resilience measures to be introduced in new house and industrial / commercial buildings should include, at least, the following. - Green roofs must be promoted and encouraged through the planning system with all the necessary safety measures. Green roofs provide, in suitable positions, effective green plant surfaces which absorb carbon dioxide, thus contributing to the reduction of global warming. - Solar panels on all suitable roof surfaces. They have been developed numerous years ago, their costs have diminished and they have become, in the correct position and inclination, very productive in terms of warm water or electricity provision, depending on the type. Obviously, a balance is needed between the two roof functions as both require solar power! - SuDS must be applied to all new development so that rain is absorbed as much as possible in situ, in processes "that mimic natural drainage patterns" and minimise the run-off into roads, piazzas and eventually into rivers. This would reduce the danger that Wirral's rivers would swell and overflow, causing flooding especially in the Moreton and Leasowe area. |  |              |              |              |              |              |              |
| 1246827   | LPIO-14733           | I agree on the brownfield first approach. I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk. |              |              |              |              |              |              |
| 1242155   | LPIO-14778           | Strategic Objective 7 is strongly supported, proposing sufficient housing to meet need and provide choice of houses for people at all stages of life and incomes. The emphasis should be on 'local housing needs' throughout the Borough and 'choice; at all stages of life and incomes'. However it is unlikely the current approach set out in the issues and options paper will realise this objective due to the disproportionate location of proposed housing supply across the Borough, heavily weighted to east of the M53 and Birkenhead in particular. Locations for affordable homes, as well as higher value, larger and aspirational homes should all form legitimate parts of the plan. The current Green Belt methodology does not give this recognition.   |  |              |              |              |              |              |              |
| 1247016   | LPIO-14834           | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  |              |              |              |              |              |              |
| 1247018   | LPIO-14895           | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  |              |              |              |              |              |              |
| 1247864   | LPIO-15193           | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.   |  |              |              |              |              |              |              |

| 1247349   | LPIO-16403 | I agree on the brownfield first approach. I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk. |              |              |              |              |              |              |
| 1247353   | LPIO-16491 | I agree on the brownfield first approach. I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk. |              |              |              |              |              |              |

| Person ID | ID         | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)  | Question 3.2b - Would you like to suggest a new objective/s. | 1247083   | LPIO-19680 | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'   |  |              |              |              |              |              |              |
| 1247084   | LPIO-19735 | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'   |  |              |              |              |              |              |              |
| 1237833   | LPIO-19759 | The HBF supports Strategic Objective 7 which seeks to provide sufficient housing to meet identified local housing needs and provide a choice of housing for people at all stages of life and incomes. However, whilst the HBF generally support the Council in providing a sub-objective in relation to managing the release of sufficient housing land to meet the Borough's locally assessed housing needs, it should be noted that the housing requirement may mean that a higher housing land provision is required. | Strategic Spatial Options The HBF would expect the spatial distribution of sites to follow a logical hierarchy, provide an appropriate development pattern & support sustainable development within all market areas. It is, however, important that all the sites contained within the plan are deliverable over the plan period & planned to an appropriate strategy. The HBF are keen that the Council produces a plan which can deliver against its housing requirement. To do this it is important that a strategy is put in place which provides a sufficient range of sites to provide enough sales outlets to enable delivery to be maintained at the required levels throughout the plan period. The HBF & our members can provide valuable advice on issues of housing delivery & would be keen to work proactively with the Council on this issue. The Council's overall housing land supply (HLS) should include a short & long-term supply of sites by the identification of allocations for residential development. Housing delivery is optimised where a wide mix of sites is provided, with a range of sites in terms of both size & market location are provided so that small, medium & large housebuilding companies have access to suitable land to offer the widest possible range of products. A diversified portfolio of housing sites offers the widest possible range of products to households to access different types of dwellings to meet their housing needs. Housing delivery is maximised where a wide mix of sites provides choice for consumers, allows places to grow in sustainable ways & creates opportunities to diversify the construction sector. The HLS should meet the housing requirement, ensure the maintenance of a 5 Year Housing Land Supply (5YHLS) & achieve Housing Delivery Test (HDT) performance measurements. |              |              |              |              |              |              |

|-----------|------------|---|--|--------------|--------------|--------------|--------------|--------------|--------------|
| 1247118   | LPIO-21676 | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  |              |              |              |              |              |              |
| 1238835   | LPIO-2178  | I agree with a brownfield only policy. I do not agree with building on our Greenbelt whatsoever. I agree with the Wirral Waters project.  | I wholeheartedly agree with the BRP plan, as stated earlier. However, the proposed number of properties makes no sense to me. I believe that the correct number per annum is somewhere between 250-400 units only. Council need to consider their own climate change emergency statement. Building 800 house per annum is not going to solve anything. To begin with, we don't have the demand (population) to meet this number and secondly, all council is proposing to do is to increase the pollution which only serves to have a detrimental affect on all our health and well-being. |              |              |              |              |              |              |
| 1247145   | LPIO-21783 | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  |              |              |              |              |              |              |
| 1247147   | LPIO-21784 | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  |              |              |              |              |              |              |

| 1237944   | LPIO-2284  | Regarding paragraph 2.20: building on top of a brownfield site, rather than removing the material and contaminated material, is likely to reduce development costs. Providing a list of problems/toxic issues on each brownfield site for developers would be helpful (referred to Wirral Councils Environmental Health Register). Conversion of empty office for residential use has been used to provide additional residential provision. This would be valuable in areas such as Woodside and Birkenhead Town Centre. (Allowed under current National Planning Policy Rules) Remove the current Policy local business levy on small businesses to encourage new local entrepreneurial businesses to provide local employment and improve visitor footfall. |  |              |              |              |              |              |              |

| 1247178   | LPIO-23278 | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  |   |   |   |              |              |              |
| 1247179   | LPIO-23279 | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  |   |   |   |              |              |              |
| 1245146   | LPIO-2333  |   |  |   |   |   |              |              |              |
| 1248438   | LPIO-23763 | We are generally supportive of the Strategic Objectives, which are broadly consistent with the themes set out in the NPPF with a view to capturing the economic, social and environmental objectives of sustainable development. This includes sustainable travel, protection and enhancement of the natural and historic environment wherever possible, adaptation to climate change, flood-risk mitigation, high-quality design, infrastructure investment and economic investment (including the retail sector). Strategic Objective 7 focuses specifically on housing delivery and the need to provide sufficient housing to meet identified local housing needs and providing a choice of housing for people at all stages of life and incomes. We support this principle. There is a need to deliver a mix of market and affordable housing across the Wirral over the emerging Local Plan period. However, this needs to be a balanced approach to housing delivery. In this regard, the needs of people in West Wirral should not need to be met in East Wirral and vice versa. Whilst development in West Wirral will inevitably require the release of Green Belt land, the emerging Local Plan is the platform through which to undertake this process. By trying to avoid making difficult decisions, namely the release of Green Belt land, the Council's preferred approach will fail to deliver the sufficient housing which is needed to meet identified local needs and will fail to provide a choice of housing for people at all stage of life and incomes. Strategic Objective 7 will only be achieved through Spatial Option 2A. |  | <a href="https://wirral-consult.objective.co.uk/file/5684850">https://wirral-consult.objective.co.uk/file/5684850</a> | <a href="https://wirral-consult.objective.co.uk/file/5657890">https://wirral-consult.objective.co.uk/file/5657890</a> |   |              |              |              |
| 1242185   | LPIO-23894 | Yes, all twelve are good, but they could do with reordering in line with the NPPF, so that sustainable development to respond to the threat posed by climate change is dominant, and then a reduction of the 53 bullet points, to remove overlap, particularly concerning climate change.   |  | <a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a> | <a href="https://wirral-consult.objective.co.uk/file/5684263">https://wirral-consult.objective.co.uk/file/5684263</a> | <a href="https://wirral-consult.objective.co.uk/file/5657006">https://wirral-consult.objective.co.uk/file/5657006</a> |              |              |              |
| 1244826   | LPIO-2395  | I agree with the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk. |   |   |   |              |              |              |

| Person ID                        | ID         | Question 3.2a - If you don't agree with an objective, what would you change and why? |----------------------------------|------------|--|--|---|--------------|--------------|--------------|--------------|--------------|
| 1247798                          | LPIO-24235 | We are generally supportive of the Strategic Objectives, which are broadly consistent with the themes set out in the NPPF with a view to capturing the economic, social and environmental objectives of sustainable development. This includes sustainable travel, protection and enhancement of the natural and historic environment wherever possible, adaptation to climate change, flood-risk mitigation, high-quality design, infrastructure investment and economic investment (including the retail sector). Strategic Objective 7 focuses specifically on housing delivery and the need to provide sufficient housing to meet identified local housing needs and providing a choice of housing for people at all stages of life and incomes. We support this principle. There is a need to deliver a mix of market and affordable housing across the Wirral over the emerging Local Plan period. However, this needs to be a balanced approach to housing delivery. In this regard, the needs of people residing in West Wirral should not need to be met in East Wirral and vice versa. Whilst development in West Wirral will inevitably require the release of Green Belt land, the emerging Local Plan is the platform through which to undertake this process. By trying to avoid making difficult decisions, namely the release of Green Belt land, it is our position that the Council's preferred approach will fail to deliver the sufficient housing which is needed to meet identified local needs and will fail to provide a choice of housing for people at all stage of life and incomes. Accordingly, whilst we support the principle of Strategic Objective 7, this will only be achieved through Spatial Option 2A. |  | <a href="https://wirral-consult.objective.co.uk/file/5684846">https://wirral-consult.objective.co.uk/file/5684846</a> |              |              |              |              |              |
| 1248517                          | LPIO-24281 | The Strategic Objectives do not place sufficient weight upon identifying brownfield land thus whilst SO2 talks about realizing the potential of the Borough's industrial legacy, it should specifically do so in the context of previously developed land. We would propose the inclusion of a specific objective which requires the identification of previously developed land both within and without the Green Belt.   |  |   |              |              |              |              |              |
| 1248557<br>Environment<br>Agency | LPIO-24431 | We welcome and support many of the Strategic Objectives as they reflect many of our goals and those within the Governments 25 year Environmental Plan.   |  |   |              |              |              |              |              |
| 1248566<br>Natural England       | LPIO-24469 | We further acknowledge and support the strategic objectives identified and in particular Strategic Objective 5, which further identifies not only protection of the environmental assets but highlights environmental net gains. We have provided further advice on ensuring that you have a robust net gain policy in Annex B. [uploaded as separate attachment]  |  | <a href="https://wirral-consult.objective.co.uk/file/5667737">https://wirral-consult.objective.co.uk/file/5667737</a> |              |              |              |              |              |
| 1248567<br>Historic England      | LPIO-24517 | [Questions 3.1-3.3] In terms of the strategic objectives we welcome reference to the historic environment that it currently contains. However, the wording of some of the objectives is not consistent with national policy requirements. Within Strategic Objective 8 (bullet 1), it is not clear what significant elements of cultural heritage means, surely the intention would be to conserve and enhance the historic environment including local character and distinctiveness. It would be preferable if this policy was reworded to reflect this overall principle. In addition given the strategic objective includes reference to distinctive character there should be specific reference to this as well.   |  |   |              |              |              |              |              |

| Person ID                                    | ID         | Question 3.2a - If you don't agree with an objective, what would you change and why? |--|------------|---|--|---|---|---|---|--------------|--------------|
| 1248571<br>Cheshire West and Chester Council | LPIO-24544 | The Council supports Strategic Objective 3 transport strategy (page 46) however, it is noted that whilst there is less reliance on the private car in Wirral, than in this authority, this objective will be very challenging to deliver, based on the level of growth & new housing proposed. The ability to meet this objective will be influenced by the final decisions relating to the location of the planned housing growth. The obvious location which will best meet the transport objective, (& will have the least impact in cross-boundary travel) will be the proposals for Option 1A: Urban Intensification with its focus on development in and around the Birkenhead Docks. Option 2A: Dispersed Green Belt Release sites will perhaps be more challenging to achieve if relying on a planned shift to sustainable travel. Environment: Cheshire West and Chester notes that the objectives, (pages 46-49) relating to realising the potential of the waterside and improving accessibility & connectivity, may result in issues in terms of recreational disturbance & the Habitats Regulations Assessment. Potential conflicts, between plan objectives and Sustainability Appraisal (SA) objectives, would usually be highlighted in the SA, however an assessment of the compatibility of Local Plan objectives & SA framework does not seem to be included in the Interim SA report. Strategic Objective 5 refers to 'protect & improve the quality & accessibility of green space, green infrastructure & nature...'. The objective heading suggests improving accessibility is a priority, whilst the first bullet point below concentrates on managing development pressures & opportunities for access & enjoyment. Cheshire West would suggest that there may be a conflict between improving accessibility which may in turn, reduce quality and biodiversity. |  |   |   |   |   |              |              |
| 1246559<br>Cheshire Wildlife Trust           | LPIO-24555 | Whilst we support Objective 5, the wording is outdated as it reflects that in the 2012 NPPF and not the revised 2018 NPPF. Specifically we refer to the inclusion of the caveat 'where possible' when describing biodiversity net gain. This caveat does not appear in the 2018 version and should be removed. The new guidance refers to securing measurable gains for biodiversity in three sections of the NPPF: Paragraph 174b) - identify and pursue opportunities for securing measurable net gains for biodiversity; Paragraph 175 d) - development whose primary objective is to conserve or enhance biodiversity should be supported; while opportunities to incorporate biodiversity improvements in and around developments should be encouraged, especially where this can secure measurable net gains for biodiversity; Paragraph 170d) - minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures. We suggest this revised wording for Objective 5: Protect and improve the quality and accessibility of green space, green infrastructure and nature, whilst protecting and enhancing biodiversity and ensuring that development delivers MEASURABLE net environmental gains FOR BIODIVERSITY where possible.  |  |   |   |   |   |              |              |
| 1242697                                      | LPIO-24659 | Strategic Objectives (SO) 1 - 6 are largely good. But amendments are needed in a few places to reflect reality, to support the SO itself and the need to achieve regeneration.  |  | <a href="https://wirral-consult.objective.co.uk/file/5659118">https://wirral-consult.objective.co.uk/file/5659118</a> | <a href="https://wirral-consult.objective.co.uk/file/5659119">https://wirral-consult.objective.co.uk/file/5659119</a> | <a href="https://wirral-consult.objective.co.uk/file/5659120">https://wirral-consult.objective.co.uk/file/5659120</a> | <a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a> |              |              |
| 1242697                                      | LPIO-24660 | Strategic Objective SO2: Replace "Realise" by "Ensure".   |  | <a href="https://wirral-consult.objective.co.uk/file/5659118">https://wirral-consult.objective.co.uk/file/5659118</a> | <a href="https://wirral-consult.objective.co.uk/file/5659119">https://wirral-consult.objective.co.uk/file/5659119</a> | <a href="https://wirral-consult.objective.co.uk/file/5659120">https://wirral-consult.objective.co.uk/file/5659120</a> | <a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a> |              |              |
| 1242697                                      | LPIO-24661 | Strategic Objective SO3 Fifth bullet: Replace "To support the construction of new road infrastructure only where this is related to achieving sustainable development, environmental enhancement, public transport or road safety benefits" by "To support the construction of new road infrastructure by exception to achieving environmental enhancement, public transport or road safety benefits".  |  | <a href="https://wirral-consult.objective.co.uk/file/5659118">https://wirral-consult.objective.co.uk/file/5659118</a> | <a href="https://wirral-consult.objective.co.uk/file/5659119">https://wirral-consult.objective.co.uk/file/5659119</a> | <a href="https://wirral-consult.objective.co.uk/file/5659120">https://wirral-consult.objective.co.uk/file/5659120</a> | <a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a> |              |              |
| 1242697                                      | LPIO-24662 | Strategic Objective SO5: This SO needs a supporting statement on the need to preserve Green Belt for either public use or public appreciation of the green space which surrounds their living environment. It would fit in with the Council's preferred option not to release Green Belt.   |  | <a href="https://wirral-consult.objective.co.uk/file/5659118">https://wirral-consult.objective.co.uk/file/5659118</a> | <a href="https://wirral-consult.objective.co.uk/file/5659119">https://wirral-consult.objective.co.uk/file/5659119</a> | <a href="https://wirral-consult.objective.co.uk/file/5659120">https://wirral-consult.objective.co.uk/file/5659120</a> | <a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a> |              |              |
| 1242697                                      | LPIO-24663 | Strategic Objective SO6: It is good to see flood management issues as a SO. But the 5th & 6th bullets seem to contradict the SO and appear to allow development in areas subject to flooding or increased risk of it. Why not use words to agree with the SO main purpose? The core of it is to ensure: "Policies will direct development away from high risk coastal, river or areas which are prone to flooding, and will make space for water to drain."   |  | <a href="https://wirral-consult.objective.co.uk/file/5659118">https://wirral-consult.objective.co.uk/file/5659118</a> | <a href="https://wirral-consult.objective.co.uk/file/5659119">https://wirral-consult.objective.co.uk/file/5659119</a> | <a href="https://wirral-consult.objective.co.uk/file/5659120">https://wirral-consult.objective.co.uk/file/5659120</a> | <a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a> |              |              |

|----------------------------|----------------------|--|---|---|---|---|---|---|---|
| 1237546<br>Wirral Wildlife | LPIO-2574            | Wirral Wildlife support most objectives, but some do not go far enough, in a climate emergency and ecological emergency. SO2 need protection of coastal wildlife from increased people and dog pressure SO3 reduce the need to travel SO4 conserve soils SO5 all development must achieve net environmental gain SO7-8 all development must be zero-carbon in use SO12 needs to recognise that we need to consume less See attached document.  | If large-scale tree planting is to happen, then land has to be found for that, either itself or as canopy over other uses such as amenity space and streets. Wirral Wildlife consider that increasing tree canopy cover should be a part of the vision. "WBC will work with partners to achieve an increase in tree canopy cover across the Borough, with a target of a 50% net increase on current levels by 2030" (see Wirral Tree Strategy) It is vital that trees are retained as long as possible, natural regeneration is encouraged and "the right tree is planted in the right place" | <a href="https://wirral-consult.objective.co.uk/file/5676753">https://wirral-consult.objective.co.uk/file/5676753</a> |   |   |   |   |   |
| 1246458                    | LPIO-25778           | I agree on the brownfield first approach. I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.   | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.  |   |   |   |   |   |   |
| 1246459                    | LPIO-25779           | I agree on the brownfield first approach. I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.   | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.  |   |   |   |   |   |   |
| 1249100                    | LPIO-25875<br>1 of 3 | Agree the proposed objectives are suitable. There are no additional objectives that we wish to include at this stage. However, Strategic Objective 7 will not be achieved. It is currently likely that less than 10% of the identified affordable housing need will be met; smaller 1- and 2-bedroom homes comprise approximately 68% of the supply when only 35%-40% are needed; and larger 3- and 4-bedroom homes comprise just 32% of the supply despite there being a need for at least 60%-65%. |   | <a href="https://wirral-consult.objective.co.uk/file/5677514">https://wirral-consult.objective.co.uk/file/5677514</a> | <a href="https://wirral-consult.objective.co.uk/file/5677512">https://wirral-consult.objective.co.uk/file/5677512</a> | <a href="https://wirral-consult.objective.co.uk/file/5684898">https://wirral-consult.objective.co.uk/file/5684898</a> | <a href="https://wirral-consult.objective.co.uk/file/5684949">https://wirral-consult.objective.co.uk/file/5684949</a> | <a href="https://wirral-consult.objective.co.uk/file/5677509">https://wirral-consult.objective.co.uk/file/5677509</a> | <a href="https://wirral-consult.objective.co.uk/file/5684951">https://wirral-consult.objective.co.uk/file/5684951</a> |

| 1249271   | LPIO-26120<br>4 of 4 | Statistics for employment and commuting indicate the need for cooperation on strategic housing issues with both the Liverpool City Region (LCR) and Cheshire West and Chester.   |  | <a href="https://wirral-consult.objective.co.uk/file/5678238">https://wirral-consult.objective.co.uk/file/5678238</a> |   |   |   |   |   |
| 1249269   | LPIO-26144           | Support the aims of Strategic Objective 7 but do not believe the Council's Preferred Approach will achieve this without the release of additional Green Belt land.   |  | <a href="https://wirral-consult.objective.co.uk/file/5675699">https://wirral-consult.objective.co.uk/file/5675699</a> |   |   |   |   |   |
| 1249269   | LPIO-26145           | Support the aims of Strategic Objective 11 and the Council's ambitions for economic growth but Wirral's role as part of the wider City Region is understated and does not align with the Spatial Vision. The Local Plan must provide the appropriate quantity and quality of housing in the right locations to ensure this objective is met. |  | <a href="https://wirral-consult.objective.co.uk/file/5675699">https://wirral-consult.objective.co.uk/file/5675699</a> |   |   |   |   |   |
| 1249263   | LPIO-26170           | The delivery of new homes is not specifically addressed within the strategic objectives, which immediately raises questions over the Plan's soundness.   |  | <a href="https://wirral-consult.objective.co.uk/file/5684852">https://wirral-consult.objective.co.uk/file/5684852</a> |   |   |   |   |   |

| 1249309   | LPIO-26192           |  |  |   |   |   |   |   |   |
| 1249315   | LPIO-26200           | Your approach re. employment sites fails to recognise the fact that it is unsure if there will be a need for large industrial/manufacturing sites and with Ai, the Internet, Robots, Climate change awareness (if not a priority) and more work from home, the requirement will be for more units near good rail/road links.                 |  |   |   |   |   |   |   |
| 1249320   | LPIO-26213           | I believe you overstate the requirements for so much land for employment sites. Wirral is not going to attract large manufacturers and with the greater use of Ai, Robots, the internet & people working from home, what will be required is small units and you should not be so influenced by historical data & needs.                     |  |   |   |   |   |   |   |

| Person ID | ID                   | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)  | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here. | Attachment 1  | Attachment 2  | Attachment 3  | Attachment 4  | Attachment 5  | Attachment 6  |
|-----------|----------------------|--|--|---|---|---|---|---|---|
| 1249321   | LPIO-26227           | Disagree with any Green Belt release.  |  |   |   |   |   |   |   |
| 1247414   | LPIO-26239           | The first approach should be Brownfields at all costs - I do not feel any Greenbelt release should be authorised until absolutely all else has failed - I do agree with Wirral Waters objectives.  |  |   |   |   |   |   |   |
| 1249743   | LPIO-26361<br>1 of 3 | We do not fundamentally disagree with the Strategic Objectives as set out within the WLP, however there is a clear disjoint between these ambitions and the ability of the Preferred Strategy to actually achieve them. Strategic Objective 7: A consistent theme throughout this representation is that identified local housing needs will simply not be met in full during the plan period for a variety of reasons. In addition, the plan period should be adjusted to coincide with the timescales for the likely adoption of the Wirral Local Plan given it is likely to be beyond 2021 before it is adopted. At this stage 2022-2037 would appear to be a more realistic (and appropriate) plan period. The Consortium have concluded that an uplifted housing target of 1,300 dpa allows for the improvement of negatively performing market signals through the provision of additional supply, as well as helping to meet affordable housing needs and supporting economic growth. Using this figure would ensure compliance with the NPPF by significantly boosting the supply of housing and ensuring that the planning system does everything it can to support sustainable development. In addition, The Consortium have undertaken a Viability Assessment in relation to the Preferred Strategy to direct the majority of housing towards brownfield sites in Birkenhead and at Wirral Waters.  |  | <a href="https://wirral-consult.objective.co.uk/file/5684858">https://wirral-consult.objective.co.uk/file/5684858</a> |   |   |   |   |   |
| 1249743   | LPIO-26361<br>2 of 3 | It has confirmed that there are significant viability issues and a complete over-reliance upon public sector funding exists and so housing needs will not be met, particularly affordable housing if the currently intended strategy is pursued. The current Preferred Strategy to direct housing towards Birkenhead and Wirral Waters will therefore not achieve the quantum or quality of housing that whole of Wirral needs and so Strategic Objective 7 will not be fulfilled. Strategic Objective 9: The delivery of housing has many associated economic and social benefits. New residents moving in to an area will generate new spending on local services and goods, help to sustain vital community assets and through Section 106 contributions can help to facilitate improvements to (or the delivery of new) infrastructure, examples of which are set out in Strategic Objective 9. The current Preferred Strategy to direct housing growth towards Birkenhead and Wirral Waters will not promote local infrastructure needs across Wirral.  |  |   |   |   |   |   |   |
| 1249743   | LPIO-26361<br>3 of 3 | The over-concentration of residential development in a single geographical area that has significant viability issues will result in the WLP falling significantly short of the potential that could be realised through a dispersed approach to housing delivery, which could be achieved through Option 2A (subject to alternative sites being considered as part of that process). Strategic Objective 10: The current strategy only seeks to achieve this objective within a very specific part of the borough (Birkenhead and Wirral Waters). The remainder of the eastern part of the peninsula, including Bebington, will be denied the opportunities that exist to tackle social, economic and environmental deprivation that new housebuilding can achieve if the current Preferred Strategy is pursued. Strategic Objective 11: The Consortium has undertaken an assessment of the planned level of B-Class employment land growth. It confirms that a significantly higher housing target than the 800dpa currently proposed would be required to sustain the number of jobs that would be generated by the proposed 80 hectares employment land requirement. The conclusion is that the Council's employment land and housing targets are fundamentally misaligned and so an uplift to the housing requirement, to c. 1,300dpa would help to ensure that there is a sufficient working-age population to support the Council's economic growth aspirations. Without this alignment, Strategic Objective 11 will not be achieved. |  |   |   |   |   |   |   |
| 1249745   | LPIO-26380<br>1 of 2 | We support Strategic Objective 7, which seeks to provide sufficient housing to meet identified local housing needs and provide a choice of housing for people at all stages of life and incomes. It is imperative that sustainable and suitable Green Belt sites in Wirral which can deliver larger family homes, are released to counterbalance the proliferation of smaller units coming forward on urban sites. We therefore suggest that the following text is added to the second bullet under Strategic Objective 7: "To manage the release of sufficient land for housing to meet the Borough's locally assessed housing needs including the release of Green Belt land in the most suitable and sustainable locations".  |  | <a href="https://wirral-consult.objective.co.uk/file/5680005">https://wirral-consult.objective.co.uk/file/5680005</a> | <a href="https://wirral-consult.objective.co.uk/file/5684864">https://wirral-consult.objective.co.uk/file/5684864</a> | <a href="https://wirral-consult.objective.co.uk/file/5684863">https://wirral-consult.objective.co.uk/file/5684863</a> | <a href="https://wirral-consult.objective.co.uk/file/5680006">https://wirral-consult.objective.co.uk/file/5680006</a> | <a href="https://wirral-consult.objective.co.uk/file/5684860">https://wirral-consult.objective.co.uk/file/5684860</a> | <a href="https://wirral-consult.objective.co.uk/file/5684862">https://wirral-consult.objective.co.uk/file/5684862</a> |

| 1249746   | LPIO-26395<br>1 of 2 | Our primary interest is in Wirral as 'A special and healthy place to live' and in particular Strategic Objective 7 which is concerned with the provision of sufficient housing. Given that Strategic Objective 7 aims to manage the release of housing land sufficient to meet needs and to cater for the needs of different groups and amenities, we support the Objective as worded. In particular, the identified need for both affordable and aspirational housing is welcomed.   |  | <a href="https://wirral-consult.objective.co.uk/file/5683633">https://wirral-consult.objective.co.uk/file/5683633</a> | <a href="https://wirral-consult.objective.co.uk/file/5683637">https://wirral-consult.objective.co.uk/file/5683637</a> | <a href="https://wirral-consult.objective.co.uk/file/5683635">https://wirral-consult.objective.co.uk/file/5683635</a> | <a href="https://wirral-consult.objective.co.uk/file/5683638">https://wirral-consult.objective.co.uk/file/5683638</a> | <a href="https://wirral-consult.objective.co.uk/file/5683639">https://wirral-consult.objective.co.uk/file/5683639</a> | <a href="https://wirral-consult.objective.co.uk/file/5683636">https://wirral-consult.objective.co.uk/file/5683636</a> |
| 1249746   | LPIO-26395<br>2 of 2 | Our primary interest is in Wirral as 'A special and healthy place to live' and in particular Strategic Objective 7 which is concerned with the provision of sufficient housing. Given that Strategic Objective 7 aims to manage the release of housing land sufficient to meet needs and to cater for the needs of different groups and amenities, we support the Objective as worded. In particular, the identified need for both affordable and aspirational housing is welcomed.   |  | <a href="https://wirral-consult.objective.co.uk/file/5683657">https://wirral-consult.objective.co.uk/file/5683657</a> |   |   |   |   |   |
| 1249782   | LPIO-26422           | We do not have any particular comments on the proposed objectives, albeit as explained throughout these representations, have raised concerns that the Borough's housing needs will not be achieved (as per strategic objective 7). For this reason, the overall strategy of the Local Plan needs to be re-looked at in emerging consultation rounds of the Local Plan, not least in respect of identifying a sufficient quantum of land to meet the Borough's housing requirements. This will necessitate both brownfield land delivery and suitable green belt release sites. The overall Vision of the Local Plan will need to be updated to reflect this.   |  | <a href="https://wirral-consult.objective.co.uk/file/5683892">https://wirral-consult.objective.co.uk/file/5683892</a> |   |   |   |   |   |
| 1249219   | LPIO-26461           | We agree with the strategic objectives particularly a regeneration policy. By including green belt options however we do not feel it is satisfying Strategic Objective 5 – 'Protect and improve the quality of green space...'  |  | <a href="https://wirral-consult.objective.co.uk/file/5677529">https://wirral-consult.objective.co.uk/file/5677529</a> | <a href="https://wirral-consult.objective.co.uk/file/5677528">https://wirral-consult.objective.co.uk/file/5677528</a> |   |   |   |   |
| 1240932   | LPIO-26597           | No, we are concerned that the methods being proposed to deliver many of the objectives are not feasible, evidenced or realistic as explained in these representations as a whole. However, we do support the objective to ensure that the rural economy, including agriculture, can continue to operate, diversify and prosper. We note that this objective has not been highlighted elsewhere in the Council's Preferred Approach outlined in this Issues and Options document.  |  | <a href="https://wirral-consult.objective.co.uk/file/5683689">https://wirral-consult.objective.co.uk/file/5683689</a> | <a href="https://wirral-consult.objective.co.uk/file/5682697">https://wirral-consult.objective.co.uk/file/5682697</a> | <a href="https://wirral-consult.objective.co.uk/file/5682701">https://wirral-consult.objective.co.uk/file/5682701</a> |   |   |   |
| 1245180   | LPIO-2669            | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  |  |   |   |   |   |   |   |
| 1248223   | LPIO-26704           | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.   |  |   |   |   |   |   |   |
| 1248224   | LPIO-26705           | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.   |  |   |   |   |   |   |   |

| 1248232   | LPIO-26812 | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.  |  |              |              |              |              |              |              |
| 1250033   | LPIO-26819 | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.  |  |              |              |              |              |              |              |
| 1250036   | LPIO-26846 | Strategic Objective 5 misses an opportunity to include water space and blue infrastructure. The LLFA is aware that, whilst SuDS can deliver water quality benefits, the role of assessment of these benefits, and conversely, pollution caused as a result of development, is unclear. Including Wirral's water features within this Strategic Objective would help address this gap and satisfy the requirement of Paragraph 20 of the NPPF set out below. "Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision12 for: b) infrastructure for [...] flood risk and coastal change management  | Including Wirral's water features within this Strategic Objective would help address this gap and satisfy the requirement of Paragraph 20 of the NPPF set out below. "Strategic policies should set out an overall strategy for the pattern, scale and quality of development, and make sufficient provision12 for: b) infrastructure for [...] flood risk and coastal change management |              |              |              |              |              |              |
| 1250036   | LPIO-26851 | The LLFA supports Strategic Objective 6 for a sustainable peninsula which seeks to reduce risk to development by directing it away from higher risk areas. This is a sustainable approach. However, it is important that for large strategic sites future site allocations or parcels are not considered in isolation but form part of a masterplan for the management of water across the whole strategic site. Cumulative impacts of smaller sites can reduce and remove any benefits to flood risk that can be gained by considering larger strategic areas and opportunities for multi-benefit SuDS can be lost. Masterplanning should take account of existing hydrology and topography ensuring that catchments are persevered so that existing natural processes are mimicked during and post-development. Strategic Objective 6 for a sustainable peninsula must seek to satisfy Paragraph 148 of the NPPF Meeting the challenge of climate change, flooding and coastal erosion, which requires the planning system to support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change. "The LLFA is supportive of the equal consideration of surface water flood risk (objective states surface flooding) with tidal and fluvial flood risk, and recognises the approach adopted in the Strategic Flood Risk Assessment which applies this assessment. Note: sustainable urban drainage systems is no longer commonly used – SuDS stands for Sustainable Drainage Systems and the use of these systems are not restricted to urban environments. SuDS is also the term used within the NPPF and PPG. |  |              |              |              |              |              |              |
| 1250035   | LPIO-26853 | I agree with the proposed Strategic Objectives. Strategic Objective 5 (Green Space) and Strategic Objective 8 (Distinctive Character) are of particular importance in Noctorum. Green spaces such as Noctorum Field (OS140) work as part of a network of spaces to provide areas for sport, amenity, both physical and visual, and areas for biodiversity, and linkages to wildlife corridors, which also encourage walking and cycling. Along with the Wirral Golf Club and the nearby Bidston Hill, Hill Road allotments and Flaybrick Cemetery, it contributes to a high-quality green environment within the conurbation.  |  |              |              |              |              |              |              |
| 1250037   | LPIO-26854 | I agree with the proposed Strategic Objectives. |-----------|-----------|---|--|---|--------------|--------------|--------------|--------------|--------------|
| 1245073   | LPIO-2903 | I agree with the regeneration of Brownfield sites to meet these objectives. I do not agree with the release of Green Belt to meet any of the objectives. Building on Green Belt counter-productive to many of the objectives for the following reasons: Trees and plants absorb carbon dioxide (Objectives 1 and 4) Green Belt promotes clean air, leisure and fitness, environmental enhancement (Objective 3) Green Belt land provides a natural means for flood management by reducing run-off (Objective 6) Green Belt protects our cultural heritage, historic landscape character, historic environmental assets, healthier more active living, open space, leisure, water courses, and green corridors (Objective 8) Green Belt supports the re-use and redevelopment of Brownfield land (Objective 10) Green Belt ensures the rural economy including agriculture can prosper, encourages tourism, and protects the Borough's coast and countryside (Objective 12) This demonstrates the fact that the Green Belt is as important to today's objectives as it has ever been. In fact, it must have been hard to produce these objectives without explicitly mentioning the need for Green Belt ?? I do not believe that the Council has yet properly identified the "local" housing needs as it has not produced any evidence to support the proposed 12,000 homes making use of "local" facts and figures. | Protect the Green Belt at all cost to prevent urban sprawl and maintain the individual character of Wirral's historic villages and settlements   |   |              |              |              |              |              |
| 1244896   | LPIO-2924 | Objective 5 - agree generally but not to ANY development in Green Belt. Also, 'net environmental gain' CANNOT be an 'objective' as it is mandatory. Objective 7 - supply housing where there is real need, which does not mean 12,000 new dwellings added to the current existing supply total after regeneration, conversions, replacements, etc., as in the current Draft Local Plan This is misunderstood at the highest levels in the Council and by some Consultants, and threatens Green Belt. Objective 11 - do not 'land bank' excessively as currently and in the past. Release non-green belt sites for housing where appropriate to do so, reclassifying as necessary. First come, first served will assist delivery and protect Green Belt. Objective 12 - bring more dwellings into High Streets by reclassification of Uses. This will increase vitality and viability of those places and deliver sustainable dwellings without release of Green Belt. Also, see attached document.  | Don't release ANY Green Belt   | <a href="https://wirral-consult.objective.co.uk/file/5677099">https://wirral-consult.objective.co.uk/file/5677099</a> |              |              |              |              |              |
| 1245159   | LPIO-2968 | The wording should be strengthened as follows:- S05 - should include reference to the protection of playing fields and parks S08 should include specific reference to Conservation Areas.   |  |   |              |              |              |              |              |
| 1245287   | LPIO-3084 | Landscape design will play a vital role in delivery, so landscape designers and ecologists and community enablers should be at the heart of the delivery team.  |  |   |              |              |              |              |              |
| 1238645   | LPIO-3097 | Strategic objective 1 - add net-zero carbon local targets as set by Climate Change Strategy for Wirral  |  |   |              |              |              |              |              |
| 1239492   | LPIO-317  |   |  |   |              |              |              |              |              |
| 1237904   | LPIO-3176 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives   |  |   |              |              |              |              |              |
| 1245346   | LPIO-3257 | I suggest the following additions to the objectives:<br><ul style="list-style-type: none"> <li>• Strategic objective 1 - add zero carbon local targets as set by Climate Change Strategy for Wirral</li> <li>• Strategic objective 3 - reduce reliance on private cars, reduce freight distribution by road. There should be no new road building or widening schemes implemented except for essential access</li> <li>• Strategic objective 9 - play a more active role in the provision of health services, oppose the closure of local health facilities.</li> <li>• Strategy object 11 - to support a circular economy</li> </ul>   | Review all objectives against Council's declaration of climate emergency.  |   |              |              |              |              |              |
| 1241315   | LPIO-3263 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.   |   |              |              |              |              |              |
| 1245416   | LPIO-3364 |   |  |   |              |              |              |              |              |
| 1238549   | LPIO-347  |   |  |   |              |              |              |              |              |
| 1238156   | LPIO-35   | As I have outlined in response to Question 3.2b below, I think there is an omission here: I did not see any reference to partnership with or support for our vibrant and committed faith communities, who contribute so much to the life of our borough, both collectively and through the selfless service of individuals in many different arenas. Please could this be included: as part of Objective 9 would perhaps be the best place. Thank you.  | For me, there is one omission - I did not see any reference to partnership with or support for our vibrant and committed faith communities, who contribute so much to the life of our borough, both collectively and through the selfless service of individuals in many different arenas. Please could this be included: as part of Objective 9 would perhaps be the best place, if not as a separate Objective. Thank you. |   |              |              |              |              |              |

| Person ID | ID        | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)  | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here.   | Attachment 1 | Attachment 2 | Attachment 3 | Attachment 4 | Attachment 5 | Attachment 6 |
|-----------|-----------|--|--|--------------|--------------|--------------|--------------|--------------|--------------|
| 1245437   | LPIO-3509 | I agree that brownfield land needs to be developed first. I do not support any development on any green belt land.   |  |              |              |              |              |              |              |
| 1245451   | LPIO-3547 | The wording should be strengthened as follows:- S05 - should include reference to the protection of playing fields and parks S06 - should not allow development in areas of significant flood risk. S08 - should include specific reference to Conservation Areas.   |  |              |              |              |              |              |              |
| 1245462   | LPIO-3620 | S05 - should include reference to the protection of playing fields and parks S06 - should not allow development in areas of significant flood risk. S08 should include specific reference to Conservation Areas.   |  |              |              |              |              |              |              |
| 1245472   | LPIO-3689 | SO 8. The wording in the main document appears different from that in the question summary with respect to conservation and enhancement of our distinctive heritage assets. The main document requires that the "significant" buildings should be conserved without defining the meaning of that word. I suggest that this objective is strengthened through an objective to conserve and enhance ALL heritage assets as determined by assessment or appraisal through the adopted management plans for the accredited Conservation Areas. There should be a commitment in the Plan to publish and keep up to date these management plans as important guidance to planners, residents, builders and developers. | SO 8. Replace the word "significant" with "all"  |              |              |              |              |              |              |
| 1245288   | LPIO-3710 |  |  |              |              |              |              |              |              |
| 1237827   | LPIO-3779 |  |  |              |              |              |              |              |              |
| 1245457   | LPIO-3861 | These are all laudable objectives, but fall down if the insistence of an unreal target of 12000 new houses and a necessity to use green belt land persists. I only agree with the objectives if there is a commitment to use realistic new home figures, 327 pa in your own projection, and a stated irrefutable commitment to not building on green belt.   |  |              |              |              |              |              |              |
| 1240653   | LPIO-3916 | Objective 5) needs to be positive about delivering net environmental gains, and thus cannot include the phrase "where possible"  |  |              |              |              |              |              |              |
| 1241770   | LPIO-3917 | Objective 5 Protection of our green spaces and biodiversity needs to be protected at ALL costs, there should not be any discussion of "where possible" . If net environmental gains are not possible then the development MUST NOT proceed!  |  |              |              |              |              |              |              |
| 1245498   | LPIO-3931 | building on greenbelt is contradictory to objectives 4,5 and 6 and does not support objectives 2, 8,10 and 12  |  |              |              |              |              |              |              |
| 1245501   | LPIO-4007 | I believe that the method of calculation used in to deliver objective 7 is flawed. Specifically there should be no requirement to 'manage the release of sufficient (green belt or rural) land for housing to meet the Borough's locally assessed housing needs' as the total number of accurately calculated, not historically predicted residences required can be met with brownfield sites, specifically in the regeneration zones along the east of Wirral.   |  |              |              |              |              |              |              |
| 1240939   | LPIO-4114 | Within Objective 7 , it would be helpful to refer specifically to providing Social Housing within the choices available, to ensure affordability.  |  |              |              |              |              |              |              |
| 1245638   | LPIO-4225 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.   | Now more than ever we need our green spaces for the health and wellbeing of our communities. The environment and natural resources should be maintained for future generations to enjoy just as we have had the opportunity to do so. Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk. |              |              |              |              |              |              |
| 1238379   | LPIO-430  | I agree with the brownfield first approach and the Wirral Waters objectives. However, I DO NOT agree with including any Green Belt release.  |  |              |              |              |              |              |              |
| 1245153   | LPIO-4347 |  |  |              |              |              |              |              |              |
| 1244215   | LPIO-4509 |  |  |              |              |              |              |              |              |
| 1244629   | LPIO-4524 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.   |  |              |              |              |              |              |              |

| Person ID | ID        | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)   | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here.   | Attachment 1  | Attachment 2  | Attachment 3 | Attachment 4 | Attachment 5 | Attachment 6 |
|-----------|-----------|---|--|---|---|--------------|--------------|--------------|--------------|
| 1237667   | LPIO-4539 | In general the objectives reflect a sensible approach but I am concerned that options to encroach upon the Green Belt conflict with Objective 5 which would not be satisfied if such encroachment were to take place  |  |   |   |              |              |              |              |
| 1244720   | LPIO-4602 | Objective 1: Define "sustainable", since most building development and some aspects of tourism and leisure has very severe negative impacts on habitat and sustainability of wildlife. Objective 5: wording needs to be amended as follows: ..." ensuring that development delivers net environmental gains". Delete " where possible".   |  |   |   |              |              |              |              |
| 1237696   | LPIO-4688 |   |  |   |   |              |              |              |              |
| 1242528   | LPIO-477  | this is deliberately too long and too complicated to have many people comment on it   |  |   |   |              |              |              |              |
| 1237873   | LPIO-4826 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  |  |   |   |              |              |              |              |
| 1245794   | LPIO-4905 | Objective 5: Use of Green Belt is inconsistent with this Objective. Objective 8: Not always being delivered by Planners at the moment. For example, at the local level, two ugly new houses crammed in on Farr Hall Road, Heswall considerably detract from the local environment.  |  |   |   |              |              |              |              |
| 1241327   | LPIO-4964 |   |  |   |   |              |              |              |              |
| 1245713   | LPIO-5004 |   |  |   |   |              |              |              |              |
| 1237567   | LPIO-5187 | Our Client submits that the Strategic Objectives do not place sufficient weight upon identifying brownfield land thus whilst SO2 talks about realizing the potential of the Borough's industrial legacy it should specifically do so in the context of previously developed land  | The emerging plan should acknowledge the value of previously developed land both outside but also within the Green Belt  | <a href="https://wirral-consult.objective.co.uk/file/5658055">https://wirral-consult.objective.co.uk/file/5658055</a> | <a href="https://wirral-consult.objective.co.uk/file/5669873">https://wirral-consult.objective.co.uk/file/5669873</a> |              |              |              |              |
| 1239571   | LPIO-5253 | If the strategic objectives are listed in any sort of priority order, then 10 should be moved to the top. I strongly support strategic objective 5, for the sake of all on the peninsula, hence my concern over the acceptance and inclusion of the 'weak contribution' category deployed by ARUP in their report.  |  |   |   |              |              |              |              |
| 1242372   | LPIO-5314 | I fully support the Council's objectives' providing this does not impinge on the Wirral's Green Belt areas, as once it has been developed it will be lost forever   |  |   |   |              |              |              |              |
| 1246006   | LPIO-5316 | I suggest the following additions to the objectives: Strategic objective 1 – add net-zero carbon local targets as set by Climate Change Strategy for Wirral Strategic objective 3 – reduce reliance on private cars, reduce freight distribution by road. There should be no new road building or widening schemes implemented except for essential access Strategic objective 9 - play a more active role in the provision of health services, oppose the closure of local health facilities. Strategy object 11 – to support a circular economy | All objectives should be reviewed against the council's declaration of a climate emergency.  |   |   |              |              |              |              |
| 1240383   | LPIO-5419 | However, Strategic object 5 cannot be delivered if large areas of Green Belt are released for development since they already contribute to this objective.  |  |   |   |              |              |              |              |
| 1245954   | LPIO-5493 |   |  |   |   |              |              |              |              |
| 1245607   | LPIO-5504 |   |  |   |   |              |              |              |              |
| 1246041   | LPIO-5547 |   |  |   |   |              |              |              |              |
| 1246159   | LPIO-5592 |   |  |   |   |              |              |              |              |
| 1241661   | LPIO-5649 | Objective 6 could be more robust. Building on flood plains is not acceptable and we need to do more than "direct away" development from flood risk sites. All objectives should be rigorously reviewed against Council's declaration of a climate emergency.  |  |   |   |              |              |              |              |
| 1245767   | LPIO-5850 | The strategic objectives set out are excellent, but Objective 5 won't be achieved by releasing Green Belt for development.  |  |   |   |              |              |              |              |
| 1246303   | LPIO-5876 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution, and a large increase in pollution due to construction. Building the a smaller number of new homes would obviously reduce massively that pollution risk. |   |   |              |              |              |              |

| Person ID | ID        | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)   | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here.  | Attachment 1 | Attachment 2 | Attachment 3 | Attachment 4 | Attachment 5 | Attachment 6 |
|-----------|-----------|---|---|--------------|--------------|--------------|--------------|--------------|--------------|
| 1246310   | LPIO-5923 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.  | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.  |              |              |              |              |              |              |
| 1242751   | LPIO-594  | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives   |   |              |              |              |              |              |              |
| 1245984   | LPIO-5994 | We agree with the preferred option of housing on brownfield site. We do not agree that any greenbelt land should be released for housing.   | The climate crisis as declared by Wirral Council should take priority over unnecessary housebuilding. Any housing need for the Borough should be in line with population growth and homeless figures not vastly inflated figures.   |              |              |              |              |              |              |
| 1246342   | LPIO-6007 | Although urban intensification is the forward Green Spaces, Fresh Air, Plants are vital in everyone's life, not a luxury only for the rich. Accelerate identified brownfield sites. Produce evidence to show that the urbanisation of Greenbelt is not needed.  | New build should improve the thermal efficiency of the walls, windows & roof. Large developments to use district heating systems, use solar thermal panels, biomass boilers, combined heat & power systems. Dual flush w.c.'s, flow reducing taps, rain water harvesting systems, more natural light. A percentage of disability access homes, on site treatment of household waste. Energy efficient lighting & daylight shut off devices. |              |              |              |              |              |              |
| 1246345   | LPIO-6031 | Strategic Objective 2 appears to neglect the 12 Quays Terminal which is woefully neglected. re. public transport support for foot passengers to/from ferries.   |   |              |              |              |              |              |              |
| 1245599   | LPIO-6095 | Using brownfield to reach objectives but not using green belt. Evidence is that the council is ignoring some brownfield land that is available Why?   |   |              |              |              |              |              |              |
| 1246339   | LPIO-6104 | Housing figures need reduction  |   |              |              |              |              |              |              |
| 1238310   | LPIO-6132 | I agree with the 12 objectives but release of greenbelt will negatively impact, undermine or provide no benefit or assistance in achieving 11 of these objectives. Green belt release may help the wealthy who already have plenty of housing choice options to fulfil a small part of objective 7  | Do not release any greenbelt Protect the greenbelt as it promotes, underpins and supports all the other 12 objectives.  |              |              |              |              |              |              |
| 1240964   | LPIO-6166 |   |   |              |              |              |              |              |              |
| 1246161   | LPIO-6225 | WUTH agree with the inclusion of the 12 objectives that are described. WUTH particularly supports objectives 7-10 which look to promote Wirral as a healthy place to live. We would welcome more detail, in particular, around objective 7 to support the detailed assessment of the projected population health needs and objective 9, which looks to promote the infrastructure required around the increase in expected population. WUTH would welcome the opportunity to shape the detail behind how this infrastructure would need to be improved. |   |              |              |              |              |              |              |
| 1246372   | LPIO-6239 | There is plenty of usable building space it just needs to be reclassified for housing. The number of retail units is too high but the space could be re used for housing.   |   |              |              |              |              |              |              |
| 1245086   | LPIO-6272 | 7. Identified local housing needs have to be reassessed but I certainly agree that housing needs to be provided for people at all levels of income & for all ages. 11. Once again assessed employment needs will have to be looked at again.  |   |              |              |              |              |              |              |
| 1246352   | LPIO-6281 | Remove Option B Commit to building on 'brownfield sites only'   |   |              |              |              |              |              |              |
| 1239535   | LPIO-6328 |   |   |              |              |              |              |              |              |
| 1246393   | LPIO-6345 |   |   |              |              |              |              |              |              |
| 1246397   | LPIO-6365 | Subject to my comments in 2.2. Some areas in the Wirral are clearly old & out of date, and could therefore, in part, be added to the "Open spaces" description. A case in point is that very recently, it is becoming clear that the construction & development of vehicles may be reduced in the U.K., due in part to the costs of electric vehicles.  |   |              |              |              |              |              |              |
| 1242183   | LPIO-6377 | The Wirral does not need more executive homes but does need council housing & the development of its water front as a social economic development. also affordable housing for those who would like to aspire to owning their own homes.  |   |              |              |              |              |              |              |
| 1246410   | LPIO-6406 |   |   |              |              |              |              |              |              |
| 1246402   | LPIO-6408 | I support the brownfield first approach. Totally agree with the Wirral waters objectives but I do not agree with including any greenbelt release.   | Protect the existing green belt and sites of special visual character.  |              |              |              |              |              |              |
| 1246415   | LPIO-6427 | Only to challenge the governments figure of houses to be built.   |   |              |              |              |              |              |              |

| Person ID | ID                  | Question 3.2a - If you don't agree with an objective, what would you change and why? If you answered yes you can also comment here (If you are responding on more than one objective - please indicate which, e.g. Objective 1)  | Question 3.2b - Would you like to suggest a new objective/s. If so please give details here.   | Attachment 1  | Attachment 2 | Attachment 3 | Attachment 4 | Attachment 5 | Attachment 6 |
|-----------|---------------------|--|--|---|--------------|--------------|--------------|--------------|--------------|
| 1246401   | LPIO-6926           | I disagree with Strategic Objective 3 if that means the overloading of already congested villages with additional housing, vehicles and added strain on schools, poly clinics, dentists etc. This is exactly what is being planned in the green belt for Irby, Pensby and Thingwall. New communities in the likes of Birkenhead docklands need infrastructure to establish and maintain new communities.   |  |   |              |              |              |              |              |
| 1246482   | LPIO-7018           | Very clever questions ! I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.   |  |   |              |              |              |              |              |
| 1246456   | LPIO-7066           |  |  |   |              |              |              |              |              |
| 1246486   | LPIO-7086           |  |  |   |              |              |              |              |              |
| 1246488   | LPIO-7117           | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.   | Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.   |   |              |              |              |              |              |
| 1246495   | LPIO-7142           | Do not use Greenbelt Land. Do not use Farmland. Keep our open spaces. Use only Brownfield sites & Dock sites.  |  |   |              |              |              |              |              |
| 1246501   | LPIO-7160           |  |  |   |              |              |              |              |              |
| 1246504   | LPIO-7183           | The track record of Wirrals vision has been lamentable. The objectives I want to see must be based on reality and not fantasy. the Options document is a fantasy document to put in the fictional department.  |  |   |              |              |              |              |              |
| 1246515   | LPIO-7244           | Re: ITEM 7 - If there is a downward turn (recount) then the figure should be reduced as such.  | Re: ITEM 7 - If there is a downward turn (recount) then the figure should be reduced as such.  |   |              |              |              |              |              |
| 1246518   | LPIO-7265           | ITEM 7 - Add at the end "but not to the detriment of green spaced and specifically GREEN BELT.   |  |   |              |              |              |              |              |
| 1238102   | LPIO-7295           |  |  |   |              |              |              |              |              |
| 1246524   | LPIO-7320           | Objectives are fine, but in practice not always deliverable! Unless the Council is going to fund affordable housing on brown field sites, it then depends upon finding developers prepared to invest in sites - and they will only do so if economic conditions are good and they can get return on their money. Average profit developers look for £64,000 per home!  |  |   |              |              |              |              |              |
| 1246545   | LPIO-7398           |  |  |   |              |              |              |              |              |
| 1241958   | LPIO-740            |  |  |   |              |              |              |              |              |
| 1246549   | LPIO-7435           |  |  |   |              |              |              |              |              |
| 1246550   | LPIO-7451           | I agree on the brownfield first approach. I DO NOT agree with Wirral Waters objectives.  |  |   |              |              |              |              |              |
| 1246551   | LPIO-7476<br>1 of 2 | In response to Q3.2 the Borough should promote sustainable travel through strategic objective 3 by re-allocating land in existing urban areas that is proven to be deliverable and achievable by allowing the particular site to be developed for residential development. the Borough should promote sustainable travel through strategic objective 3 by re-allocating land in existing urban areas that is proven to be deliverable and achievable by allowing the particular site to be developed for residential development. The Borough should provide sufficient housing to meet identified local housing needs and provide a choice of housing for all people at all stages of life and incomes by prioritising the delivery of affordable housing schemes within existing urban areas by reallocating the use of the particular site for residential development. The particular site could provide a solution to the challenge of 'deliverable' urban sites on which new homes can be brought forward. Wirral's Local Plan Strategic Objective 1 (toward a sustainable peninsula) to support sustainable approaches to the location, design, construction, operation and impact of new development would be met as it is situated in a strategic development location with its proximity within 1,000m to the district centre of Hoylake Road. | In response to Q3.2 the Borough should promote sustainable travel through strategic objective 3 by re-allocating land in existing urban areas that is proven to be deliverable and achievable by allowing the particular site to be developed for residential development. the Borough should promote sustainable travel through strategic objective 3 by re-allocating land in existing urban areas that is proven to be deliverable and achievable by allowing the particular site to be developed for residential development. | 1242554 Port Sunlight Village Trust | LPIO-9645 |  |  |   |              |              |              |              |              |  |
| 1246693                             | LPIO-9646 | I cannot answer yes or no to these as the objectives are to open to interpretation and I believe that a simple yes or no will be used to justify whatever context the council wants it to. What I can say is that I along with every other Wirral residents that I speak to believe a brownfield first approach should be used properly. The brownfield first approach should NOT be based on the profit margins of the developers. Based on the brownfield site areas this would seem to fit in well with the Wirral Waters objective and then move redevelopment down through to areas such as Liscard and New Ferry. I can categorically say I DO NOT agree that greenbelt land, agricultural land, open spaces and parks should be developed or released for development.  | The Council has declared a climate emergency building more homes would increase the carbon monoxide levels and there would be more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk. In addition retaining greenbelt land, agricultural land, green open spaces and parks helps reduce the pollution levels - this is well established. To reduce these areas on Wirral would be in complete contrast to the climate emergency that has been declared.  |   |              |              |              |              |              |  |
| 1246691                             | LPIO-9731 | I agree with the strategic objectives particularly a regeneration policy. By including green belt options however I do not feel it is satisfying Strategic Objective 5 – "Protect and improve the quality of green space...".  |  |   |              |              |              |              |              |  |
| 1246719                             | LPIO-9879 | Many of these offer broad brushstroke "solutions" which require more detailed discussion and assessment, rather than a simple "yes" or "No" answer.  |  |   |              |              |              |              |              |  |
| 1246724                             | LPIO-9911 | I agree on the brownfield first approach, I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives  |  |   |              |              |              |              |              |  |
| 1238147                             | LPIO-9943 | The review of Green Belt land with a view to possible release is totally inconsistent with Objective 5   |  |   |              |              |              |              |              |  |
| 1241337                             | LPIO-9946 | Very much support the regeneration policy. However with the inclusion of Green Belt housing options I feel this does not meet Strategic Objective 5 - "protect and improve the quality of green space...".   |  |   |              |              |              |              |              |  |
| 1245994                             | LPIO-9949 | I agree with the regeneration of Brownfield sites to meet these objectives. I do not agree with the release of Green Belt to meet any of the objectives. Building on Green Belt counter-productive to many of the objectives. I do not believe that the Council has yet properly identified the "local" housing needs as it has not produced any evidence to support the proposed 12,000 homes making use of "local" facts and figures.  | I agree with the regeneration of Brownfield sites to meet these objectives. |-----------|------------|--|---|--------------|--------------|--------------|--------------|--------------|--------------|
| 1249015   | LPIO-25570 |  | Agree the proposed objectives are suitable. There are no additional objectives that we wish to include at this stage. However, Strategic Objective 7 will not be achieved. It is currently likely that less than 10% of the identified affordable housing need will be met; smaller 1- and 2-bedroom homes comprise approximately 68% of the supply when only 35%-40% are needed; and larger 3- and 4-bedroom homes comprise just 32% of the supply despite there being a need for at least 60%-65%.  |              |              |              |              |              |              |
| 1248833   | LPIO-25261 |  | Agree with the proposed objectives set out in the Issues and Options paper and there are no additional objectives that we wish to include at this stage. However, we consider that Strategic Objective 7 will not be achieved by the Plan. The proposed sites put forward are not deliverable and will further not provide the type of housing required in the Borough.   |              |              |              |              |              |              |
| 1248986   | LPIO-25457 |  | Agree with the proposed objectives set out in the Issues and Options paper and there are no additional objectives that we wish to include at this stage. However, we consider that Strategic Objective 7 will not be achieved by the Plan. The proposed sites put forward are not deliverable and will further not provide the type of housing required in the Borough.   |              |              |              |              |              |              |
| 1249116   | LPIO-25926 |  | Broadly agree with the proposed objectives but reserve the right to comment further on specific objectives at later stages of the plan preparation. We specifically support the objective which seeks to provide a sufficient choice of housing to meet local needs but would not support an approach which would render developments unviable or undeliverable to the point that meeting the Borough's genuine housing requirement is threatened.  |              |              |              |              |              |              |
| 1243420   | LPIO-6693  |  | It is the action taken on the objective which will be the test.   |              |              |              |              |              |              |
| 1249002   | LPIO-25521 |  | Merseytravel additionally welcomes the intention to promote sustainability as a Strategic Objective within the Plan (Strategic Objective 3), and would wish to request that Wirral Council includes the promotion and delivery of sustainable transport as an integral facet of the Plan.   |              |              |              |              |              |              |
| 1248472   | LPIO-24014 |  | The objectives should be amended to acknowledge that more Green Belt release will be required to accommodate housing needs and that it will take time for the regeneration areas of the Borough to meet their full potential.   |              |              |              |              |              |              |
| 1247066   | LPIO-10803 |  | To maintain the current farming on the Wirral in order to aid food supply for future self-sufficiency. To protect valuable arable and farming land from building.   |              |              |              |              |              |              |
| 1248542   | LPIO-24358 |  | We support the objectives, particularly the reference to climate change and transitioning to a low carbon Borough as outlined by Strategic Objective 1 and 4 and Strategic Objective 3 which promotes sustainable travel which will assist with a low carbon future. Strategic Objective 12 should reference leisure pursuits, as well as shopping patterns. Leisure activities are now a very important component of town centres and the more diverse a town centre is, the more linked trips can take place and the more sustainable it is. Providing a range of uses in the town centre means that people are more likely to visit which will make them healthier and more vibrant. |              |              |              |              |              |              |
| 1249116   | LPIO-25967 | Broadly agree with the proposed objectives but reserve the right to comment further on specific objectives at later stages of the plan preparation. We specifically support the objective which seeks to provide a sufficient choice of housing to meet local needs but would not support an approach which would render developments unviable or undeliverable to the point that meeting the Borough's genuine housing requirement is threatened. |   |              |              |              |              |              |              |
| 1249116   | LPIO-26027 | Broadly agree with the proposed objectives but reserve the right to comment further on specific objectives at later stages of the plan preparation. We specifically support the objective which seeks to provide a sufficient choice of housing to meet local needs but would not support an approach which would render developments unviable or undeliverable to the point that meeting the Borough's genuine housing requirement is threatened. |   |              |              |              |              |              |              |
| 1249116   | LPIO-26061 | Broadly agree with the proposed objectives but reserve the right to comment further on specific objectives at later stages of the plan preparation. We specifically support the objective which seeks to provide a sufficient choice of housing to meet local needs but would not support an approach which would render developments unviable or undeliverable to the point that meeting the Borough's genuine housing requirement is threatened. |   |              |              |              |              |              |              |

| Person ID | ID         | Question 3.2a - If you don't agree with an objective, what would you change and why? |-----------|------------|---|--|--------------|--------------|--------------|--------------|--------------|--------------|
| 1249271   | LPIO-26120 | Statistics for employment and commuting indicate the need for cooperation on strategic housing issues with both the Liverpool City Region (LCR) and Cheshire West and Chester.  |  |              |              |              |              |              |              |
| 1249271   | LPIO-26119 | The delivery of new homes is not specifically addressed within the strategic objectives, which immediately raises questions over the Plan's soundness.  |  |              |              |              |              |              |              |
| 1249745   | LPIO-26380 | We support Strategic Objective 7, which seeks to provide sufficient housing to meet identified local housing needs and provide a choice of housing for people at all stages of life and incomes. It is imperative that sustainable and suitable Green Belt sites in Wirral which can deliver larger family homes, are released to counterbalance the proliferation of smaller units coming forward on urban sites. We therefore suggest that the following text is added to the second bullet under Strategic Objective 7: "To manage the release of sufficient land for housing to meet the Borough's locally assessed housing needs including the release of Green Belt land in the most suitable and sustainable locations". |  |              |              |              |              |              |              |
