

	ID	Question 3.3 - Are there any additional objectives you would want to include?	Question 3.3a - Please set out your suggested objective with reasons below:	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1245044	LPIO-10018	yes	There should be a rural tranquility objective, including dark skys						
1246747	LPIO-10063	yes	See my previous answer in 3.2b						
1246760	LPIO-10103	yes	Protect the Green Belt at all cost to prevent urban sprawl and maintain the individual character of Wirral's historic villages and settlements						
1241319	LPIO-10155	yes	Protection of the Green Belt and protection of the farming areas and agriculture.						
1244412	LPIO-1021	no							
1241065	LPIO-10339	yes	The local plan should clearly state as an objective the use of the Council's Climate Emergency Strategy. Though some of the Strategies objectives can be found hinted at in the local plan's objectives it would be clearer to all how important the situation is and how important the council views the crisis.						
1246772	LPIO-10348	yes	ensure that brown field redevelopment is priorities well above use of green belt						
1246731	LPIO-10414	yes	The Green Belt Review should be reinterpreted and its misleading conclusions represented and incorporated into more robust objective of securing a truly developable and deliverable supply of sites.						
1246778	LPIO-10415	yes	Enhance key beauty spots alongside the coastline in Wirral - all parts. Wirral West needs some clear focus too and is largely excluded form the local plan. It is very important to have a clear vision for our coastal towns or they will decline in future years - such as Hoylake, Meols, West Kirby, Caldly shore, Heswall shore etc						
1248825	LPIO-10662	yes	The importance of Wirral Waters and the surrounding inner urban area to economic, social and environmental sustainability warrants a standalone, bespoke, Strategic Objective, to capture the scale of the opportunity and the approach to be taken to capitalise on it.	https://wirral-consult.objective.co.uk/file/5684264					
1247066	LPIO-10804	yes	To maintain the current farming on the Wirral in order to aid food supply for future self-sufficiency. To protect valuable arable and farming land from building.						
1247073	LPIO-10826	no							
1237930	LPIO-10840	yes	Council's objectives should reflect their own climate change emergency. More homes mean more carbon dioxide and more pollution. Building the correct number of homes (327 per year) would reduce pollution risk.						
1247077	LPIO-10856	yes	Council's objectives should reflect their own climate change emergency. More homes mean more carbon dioxide and more pollution. Building the correct number of homes (327 per year) would reduce pollution risk.						
1247087	LPIO-10889	yes	Why is the solution not joined up with the rest of Merseyside? What proportion of the Wirral population work in Liverpool?						
1247097	LPIO-10904	yes	You need to focus on the employment side, and how can you attract business to the area. Most towns and cities have a large employer which brings in a lot of jobs and money into the local economy (e.g. Airbus in Deeside, Home Bargains Liverpool, Rolls Royce in Derby etc). We lack that here.						
1243890	LPIO-1091	no							
1247098	LPIO-10919	yes	Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.						
1247103	LPIO-10937	yes	Councils objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would reduce massively that pollution risk.						
1247120	LPIO-10956	yes	To address climate change emergency by decreasing the number of proposed homes in order (and in line with population needs)						
1247128	LPIO-11023	yes	The regeneration needs to focus around the Birkenhead Docklands areas. Due to decades of decline and neglect. No residential building should take place on greenfield sites. The Greenbelt house building option, should be removed completely. To promote development on Brown field sites. While the option of Greenbelt is available house builders will avoid development on Brown field sites. Good urban planning is needed to include green spaces for residents. Parks and open spaces are required, as they do in the planning in places like Holland. Cycle route on roads are inadequate. Again looking at designs used in Holland. Bikes and cars are apart. Housing and employment should also be focused around the railway links in Birkenhead. All derelict land and disused buildings in the Birkenhead area, should be regenerated as a priority over other areas. There needs to be more support from grants and incentives to promote development and regeneration.						
1247129	LPIO-11039	yes	The focus of Brown field sites and urban regeneration to the Birkenhead area is key to improving the prosperity and economy of the area. Recognising the value also of the Green Belt has in making Wirral such an attractive place to live and visit, which is so accurately described in the Council's own Visitor Economy Strategy, "Wirral Peninsula is a unique and attractive place to live, work and visit". The Green Belt helps make Wirral so attractive and interesting by separating distinct residential towns and villages allowing easy access to the countryside for residents and visitors.						
1247130	LPIO-11052	yes	Councils objectives should involve being more inclusive with their own climate change emergency. More homes means more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously massively reduce that pollution risk.						

	ID	Question 3.3 - Are there any additional objectives you would want to include?	Question 3.3a - Please set out your suggested objective with reasons below:	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1247132	LPIO-11070	yes							
1247135	LPIO-11101	yes	Absolute protection of greenbelt land, parks and open spaces.						
1245190	LPIO-11122	no							
1247144	LPIO-11136	yes	The objectives should be more inline with the Councils own climate change emergency.						
1247146	LPIO-11153	yes	Only building the correct number of houses needed - 327 per year - would massively educe the pollution risk & therefore be more conclusive with the Climate Change Emergency the council declared in July 2019.						
1246647	LPIO-11167	no							
1247154	LPIO-11191	yes	There should be more emphasis on climate change issues e.g. reduced number of new houses means fewer emissions. Those houses that are built should be environmentally friendly.						
1241412	LPIO-131	yes	Give assurances that parking/car use is part of planning applications. Our roads are too congested with cars and so need to encourage people to use public transport instead. Some roads have 3/4 cars per 1 house. Maybe the Council should look at this as well especially in resident parking areas.						
1243700	LPIO-1352	yes	WBC should prioritize their contrasting climate emergency policies and development policies in order to achieve their overriding vision and policy. 12,000 net new dwellings mean more cars, more carbon and nitrogen dioxide. Targeting 327 homes per annum against 800+ would go a long way towards acceptance of the current options document. One objective should be to take politics out of the running of the borough and run the borough for the constituents. The present position of the Council leaves an aura of confusion instead of certainty.						
1238043	LPIO-1610	no							
1244969	LPIO-1616	yes	Recognise that all Green Belt within the current Green Belt boundary serves to enhance many of the proposed objectives.						
1239377	LPIO-1628	yes	The Council's unrealistic projections for housing need are somewhat at odds with its 'Cool Wirral' climate change initiative. Over-inflated housing need figures mean more carbon monoxide and more particulate pollution. If the Council used the more real-world figure of 327 new homes p/a then carbon emissions would be reduced.						
1245069	LPIO-1850	yes	There will be no development on Green Belt. This will serve to protect Wirral's environment and preserve the area for future generations.						
1242519	LPIO-1980	yes	The council should take note of there own climate change emergency and reduce the housing number.						
1245083	LPIO-2026	no							
1245112	LPIO-2142	no							
1238835	LPIO-2276	yes	Council's objective should be more inclusive of their own identified Climate Change Emergency. An unnecessary increase in the number of houses being built is just going to detrimentally impact all residents of the Borough. Council should consider existing residents first and reduce the numbers of houses to be built, to more realistic numbers ie 300 per annum.						
1237944	LPIO-2295	yes	Bring forward development by having a design guide for developments in specific areas. For example, Birkenhead Central Station & Hind Street have very distinctive architectural features from the Georgian half Crescent (by the side of the burnt out Central Hotel), the Edwardian style railway station, and the historic 1900's clock in front of the Central Hotel. The existing, but abandoned, public toilets below the historic clock could be successfully converted into a bar/restaurant, creating a easy public transport accessible arts/cultural zone direct from Chester/Liverpool. The ancient, and historic Birkenhead Priory could be enhanced as a tourist destination with strategic treeplanting on the route from Woodside to the Priory Buildings. Linking this historic sites to the original Priory Ferry would significantly add to the proposed policy to improve improve the tourist and cultural improvements of Birkenhead as a tourist destination, providing local employment and local business enhancement.						
1242185	LPIO-23895	yes	No additional objective but the inclusion of a bullet under the strategic objective one, to enable more localism, by encouraging local communities to embrace Neighbourhood Planning, to ensure local character and distinctiveness, including heritage and natural capital is better protected by the operation of this third tier of planning power. Rural characteristics, such as, tranquillity could be better protected, by progressing Neighbourhood Planning as appropriate to ensure there are places where people can enjoy peace and quiet and natural wonders such as dark skies and other countryside characteristics. The Local Plan ought to promote good health and well-being.	https://wirral-consult.objective.co.uk/file/5659121	https://wirral-consult.objective.co.uk/file/5684263	https://wirral-consult.objective.co.uk/file/5657006			
1244826	LPIO-2399	yes	I agree with the brownfield first approach. I do not agree with including any greenbelt release. I do agree with Wirral Waters objectives.						

	ID	Question 3.3 - Are there any additional objectives you would want to include?	Question 3.3a - Please set out your suggested objective with reasons below:	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1248472	LPIO-24015	yes	It is evident that further Green Belt release will be required to meet housing needs. Accordingly, the objectives of the Local Plan should be broadened to acknowledge this and to acknowledge that the release of Green Belt sites would help to boost the supply of housing whilst urban regeneration schemes take time to start delivering their full potential. In that respect an objective of the Plan should be to direct growth to the sites that perform the poorest in Green Belt terms. In that respect our land along the Dee coast in Heswall (SHLAA 1938, 1939, 1940, 1941, 1967, 1968) is a prime candidate for allocation for housing.	https://wirral-consult.objective.co.uk/file/5684824	https://wirral-consult.objective.co.uk/file/5684823				
1248557 Environment Agency	LPIO-24432	yes	We have no additional objectives recommended for inclusion at this time because the Strategic Objectives appear to reflect matters we would expect to see within any Local Plan.						
1237546 Wirral Wildlife	LPIO-2570	yes	If large-scale tree planting is to happen, then land has to be found for that, either itself or as canopy over other uses such as amenity space and streets. Wirral Wildlife consider that increasing tree canopy cover should be a part of the vision. "WBC will work with partners to achieve an increase in tree canopy cover across the Borough, with a target of a 50% net increase on current levels by 2030" (see Wirral Tree Strategy). It is vital that trees are retained as long as possible, natural regeneration is encouraged and "the right tree is planted in the right place"						
1249116	LPIO-25927	yes	Based on the Consortium representations, it is clear that substantial Green Belt release is necessary for the Borough to meet its housing targets over the plan period. A clear reference should be made as part of the proposed objectives, worded to say: "Ensure that sufficient appropriate sites are released from the Green Belt and sensitively developed for housing within all settlement areas in order to meet the Borough's housing targets in a comprehensive way."	https://wirral-consult.objective.co.uk/file/5674092	https://wirral-consult.objective.co.uk/file/5674093	https://wirral-consult.objective.co.uk/file/5674095	https://wirral-consult.objective.co.uk/file/5674096	https://wirral-consult.objective.co.uk/file/5684833	https://wirral-consult.objective.co.uk/file/5684836
1249116	LPIO-25971 1 OF 2	yes	Based on the Consortium representations, it is clear that substantial Green Belt release is necessary for the Borough to meet its housing targets over the plan period. A clear reference should be made as part of the proposed objectives, worded to say: "Ensure that sufficient appropriate sites are released from the Green Belt and sensitively developed for housing within all settlement areas in order to meet the Borough's housing targets in a comprehensive way."	https://wirral-consult.objective.co.uk/file/5675698	https://wirral-consult.objective.co.uk/file/5675693	https://wirral-consult.objective.co.uk/file/5675700	https://wirral-consult.objective.co.uk/file/5675692		
1249116	LPIO-25971 2 OF 2	yes	Based on the Consortium representations, it is clear that substantial Green Belt release is necessary for the Borough to meet its housing targets over the plan period. A clear reference should be made as part of the proposed objectives, worded to say: "Ensure that sufficient appropriate sites are released from the Green Belt and sensitively developed for housing within all settlement areas in order to meet the Borough's housing targets in a comprehensive way."	https://wirral-consult.objective.co.uk/file/5675697	https://wirral-consult.objective.co.uk/file/5675694	https://wirral-consult.objective.co.uk/file/5675696			
1249116	LPIO-26028	yes	Based on the Consortium representations, it is clear that substantial Green Belt release is necessary for the Borough to meet its housing targets over the plan period. A clear reference should be made as part of the proposed objectives, worded to say: "Ensure that sufficient appropriate sites are released from the Green Belt and sensitively developed for housing within all settlement areas in order to meet the Borough's housing targets in a comprehensive way."	https://wirral-consult.objective.co.uk/file/5684802	https://wirral-consult.objective.co.uk/file/5684835	https://wirral-consult.objective.co.uk/file/5677041	https://wirral-consult.objective.co.uk/file/5677037	https://wirral-consult.objective.co.uk/file/5684804	https://wirral-consult.objective.co.uk/file/5684804
1249116	LPIO-26062	yes	Based on the Consortium representations, it is clear that substantial Green Belt release is necessary for the Borough to meet its housing targets over the plan period. A clear reference should be made as part of the proposed objectives, worded to say: "Ensure that sufficient appropriate sites are released from the Green Belt and sensitively developed for housing within all settlement areas in order to meet the Borough's housing targets in a comprehensive way."	https://wirral-consult.objective.co.uk/file/5674240	https://wirral-consult.objective.co.uk/file/5684832	https://wirral-consult.objective.co.uk/file/5674256	https://wirral-consult.objective.co.uk/file/5684834	https://wirral-consult.objective.co.uk/file/5684837	https://wirral-consult.objective.co.uk/file/5684837
1249315	LPIO-26201	no							
1249320	LPIO-26214	no							
1249321	LPIO-26228	yes	Stronger emphasis on the Climate Emergency, eg in 1 & 4 to aim for the highest environmental standards in building. Realistic aim of 327 homes per year reduces emissions.						
1247414	LPIO-26240	yes	Think and consider climate change more homes, more carbon monoxide which aides pollution and effects the health of the population and children. Again lets keep Wirral green and healthy.						
1240932	LPIO-26598	yes	Yes, given our concerns around the deliverability of the Preferred Approach, we suggest adding an objective specifically related to delivery. We have the ability to assist in the delivery of sustainable growth across the Borough and the creation of new communities in line with the Council's Vision and objectives. Therefore, we recommend an additional objective along the following lines: "To ensure the timely delivery of the spatial vision for Wirral and its underpinning strategic objectives, we will work proactively with public and private sector partners including landowners and developers".	https://wirral-consult.objective.co.uk/file/5683689	https://wirral-consult.objective.co.uk/file/5682697	https://wirral-consult.objective.co.uk/file/5682701			
1245180	LPIO-2670	yes	Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.						
1245058	LPIO-2706	yes	All objectives should pass scrutiny in line with the council's Climate Emergency declaration						
1245073	LPIO-2905	yes	Protect the Green Belt at all cost to prevent urban sprawl and maintain the individual character of Wirral's historic villages and settlements						
1244896	LPIO-2925	yes	Have sufficient expertise within the Council to objectively assess the work of advisers who may not be delivering appropriate outputs and suggestions and/or may have conflicts of interest. This may entail appointing independent scrutinisers.						
1245159	LPIO-3046	no							

	ID	Question 3.3 - Are there any additional objectives you would want to include?	Question 3.3a - Please set out your suggested objective with reasons below:	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1245287	LPIO-3085	yes	Connecting the rather divided landscape zones up, to form functioning landscape corridors should be a priority, and these should be distributed throughout the new developments.						
1237904	LPIO-3177	yes	Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.						
1245416	LPIO-3365	no							
1238549	LPIO-348	no							
1245437	LPIO-3510	no							
1245451	LPIO-3548	no							
1238156	LPIO-36	yes	As I have also answered to question 3.2 (my apologies - I wasn't sure which was the best question to use to address my comment here): For me, there is one omission - I did not see any reference to partnership with or support for our vibrant and committed faith communities, who contribute so much to the life of our borough, both collectively and through the selfless service of individuals in many different arenas. Please could this be included. Thank you.						
1245462	LPIO-3621	no							
1245288	LPIO-3711	yes	Objective would be to add more Green Spaces for all Wirral residents, irrespective of income, age or geographical residency. Mental Health issues are rising year on year. One of the greatest things in life, is nature and being able to see, feel and be a part of it is fundamental to the health of the human race.						
1237827	LPIO-3780	yes	There should be a specific objective to absolutely minimise the impact of the Local Plan on the Green Belt in an on-going way. Use of the Green Belt should only take place if and when other options and opportunities cannot be made to work. The Council should be held to account on this,						
1245457	LPIO-3863	yes	As per previous answer, use a realistic new home target and do so without utilising existing open green spaces. Only this weekend (14/15 March 2020), we have seen Salford being named as one of the greenest, sustainable developments in the UK. Imagine Wirral getting the same kudos.						
1240653	LPIO-3918	no							
1241770	LPIO-3919	no							
1245501	LPIO-4009	yes	A more accurate and honest acceptance of the true number of new homes required annually, (372) not 800+ in the location that meets current demand for affordable housing on eastern side of Wirral would be a relevant objective that would actually be worth standing behind and delivering.						
1240939	LPIO-4115	no							
1244215	LPIO-4516	yes	To seek to invest in the West Wirral and its future, to develop and sustain heightened, tourist and economic activity, to support wealth generation, small businesses and local services, enabling a proper balance between wealth generation and redistribution across the borough. Don't treat the West Wirral as a resource for regenerating East Wirral.						
1244720	LPIO-4603	yes	To carry out detailed environmental impact assessments on any proposed development anywhere in the Borough. To protect the natural and semi natural habitats of Wirral, including the common and heathland areas of Thurstaston, Grange Hill, Bidston Hill, and Caldly Hill, Heswall Dales and Beacons, and prevent further degradation on these sites by Friends groups, however well meaning they may be. To consider closing to the public certain areas of the Wirral, for set periods of time, to allow regeneration of grassland, woodland or heath, or to protect birds as in Hilbre Island.						
1237696	LPIO-4689	no							
1237873	LPIO-4827	yes	Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.						
1245713	LPIO-5005	yes	More houses, more cars, more pollution. More strain on services in Borough						
1237567	LPIO-5188	yes	Our Client would propose the inclusion of a specific objective which requires the identification of previously developed land both within and without the Green Belt	https://wirral-consult.objective.co.uk/file/5658055	https://wirral-consult.objective.co.uk/file/5669873				
1245496	LPIO-5200	yes	I agree on the brownfield first approach. I agree with the Wirral Waters objectives. I do not agree with including the release of Greenbelt release.						
1242947	LPIO-550	yes	Make sure schools are fit for purpose and a place our young people will enjoy learning and develop the life skills they will need. Providing our young people with life skills that will enable them to have good economic well being.						
1245607	LPIO-5508	no							
1246041	LPIO-5548	yes	Maintain the green belt						

	ID	Question 3.3 - Are there any additional objectives you would want to include?	Question 3.3a - Please set out your suggested objective with reasons below:	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1242751	LPIO-595	yes	Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.						
1246342	LPIO-6008	yes	New build should improve the thermal efficiency of the walls, windows & roof. Large developments to use district heating systems, use solar thermal panels, biomass boilers, combined heat & power systems. Dual flush w.c.'s, flow reducing taps, rain water harvesting systems, more natural light. A percentage of disability access homes, on site treatment of household waste. Energy efficient lighting & daylight shut off devices.						
1238310	LPIO-6133	yes	Do not release any greenbelt Protect the greenbelt as it promotes, underpins and supports all the other 12 objectives.						
1246161	LPIO-6226	no							
1245086	LPIO-6273	yes	To go much further than prescribed measures to combat the climate change emergency. "Even if we stopped emitting greenhouse gases today, global warming would continue to happen for at least several more decades, if not centuries."(NASA website). It is vitally important that we aim to be at least carbon neutral in the next few years.						
1246352	LPIO-6282	yes	Remove parking charges in Birkenhead Town Centre to promote retail trade. Look at Cheshire Oaks & Bromborough Retail Park. Protect Historical sites - East of M53 (Junction 4) - site of "Battle of Brunanburh" - also east of Rigby Drive, Greasby.						
1242090	LPIO-6357	yes	To allow for a "tweaking" of Greenbelt lines to allow residential properties where part of their property falls in to the "Greenbelt" area to be redrawn as entirely residential.						
1246397	LPIO-6367	yes	From time to time, the use of the "Wirral Globe" newspaper for referring to major works etc should be made.						
1242183	LPIO-6379	yes	Total regeneration of all docklands, run down areas & once industrial areas. As the councils figures of 12,000 houses is a nonsense there is enough Brownfield sites to accommodate all our housing needs.						
1246410	LPIO-6407	yes	Leasehold - Rip offs. Housing Associations - Out of control. see: Leasehold Knowledge Partnership website (Registered Charity)						
1246402	LPIO-6410	yes	Protect the green belt and sites of special visual character.						
1246419	LPIO-6487	yes							
1246348	LPIO-6591	yes	No building on green belt. The farms in Wirral should be valued and supported as the agricultural soil is of a high grade. However, the farmers have this sword of damocles hanging over their heads which is no way to help them prosper. Lever Estates should be put in their place.						
1246435	LPIO-6625	yes	Yes, the council has recognised that we have a 'Climate Motion was passed unanimously stating that NO productive agricultural land will be released for development. More homes mean more carbon monoxide and more particulate pollution. building the correct number of homes (327 per Year) would obviously reduce massively that pollution risk. The Local Plan Options fail to adhere to this commitment.						
1245286	LPIO-6642	yes	Yes, the council has recognised that we have a 'Climate Motion was passed unanimously stating that NO productive agricultural land will be released for development. More homes mean more carbon monoxide and more particulate pollution. building the correct number of homes (327 per Year) would obviously reduce massively that pollution risk. The Local Plan Options fail to adhere to this commitment.						
1246438	LPIO-6660	yes	Yes, the council has recognised that we have a 'Climate Motion was passed unanimously stating that NO productive agricultural land will be released for development. More homes mean more carbon monoxide and more particulate pollution. building the correct number of homes (327 per Year) would obviously reduce massively that pollution risk. The Local Plan Options fail to adhere to this commitment.						
1241910	LPIO-6677	yes	Council objectives should involve being more conclusive with their own climate change emergency. More homes/cars means more co and particulate pollution. Building the correct number of homes (327pa) would massively reduce the pollution risk.						
1243420	LPIO-6694	no							
1246441	LPIO-6717	yes	Yes, the council has recognised that we have a 'Climate Motion was passed unanimously stating that NO productive agricultural land will be released for development. More homes mean more carbon monoxide and more particulate pollution. building the correct number of homes (327 per Year) would obviously reduce massively that pollution risk. The Local Plan Options fail to adhere to this commitment.						
1246445	LPIO-6738	no							
1246447	LPIO-6764	yes	Building 327 new homes per year would reduce environmental & pollution concerns. This would be more in line with climate change emergency policy.						
1246452	LPIO-6783	yes	The Council's objectives should be more in line with their climate change emergency. Building the correct number of homes (327 per year) would reduce pollution and environmental concerns.						
1246455	LPIO-6800	no							

	ID	Question 3.3 - Are there any additional objectives you would want to include?	Question 3.3a - Please set out your suggested objective with reasons below:	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246401	LPIO-6989	yes	There needs to be more emphasis on reducing pollution and the boroughs carbon footprint. A study is required to assess the impact of increased energy consumption and emissions from provision of new dwellings and associated traffic and vehicular movements.						
1238695	LPIO-700	yes	There is a possibility that the Council might consider developing a village community to replace The Grange Road Shopping Precinct in Birkenhead, which is a failed retail endeavour. House of Frazer has finally posted a "closing down" notice following a long struggle. This surely is the writing on the wall. Keep the Market as a centrepiece and the odd successful enterprise. The infrastructure is in place and the amenities include a State of the Art bus station and rail links to national lines. A leisure complex including a swimming pool, an entertainment plaza, The Hive Complex for the younger population is close by and there is generous car parking. This could be an attractive village development which if planned with imagination would create affordable homes infusing new life in an area which is listed as deprived.						
1246456	LPIO-7067	yes	Keep our green spaces - not build on the turning beautiful Wirral into on large urban sprawl.						
1246486	LPIO-7090	yes	More houses in the area, will mean more cars which means more emissions. And this would impact on the health of the Wirral people - Wirral B.C. should be adopting a better quality of life for every resident and not impacting on it - wake up W.B.C. before its too late.						
1246495	LPIO-7143	yes	Keep our villages separate. Maintain our village identity.						
1246501	LPIO-7161	yes	Yes, more homes equals more pollution. Road use and would impact the countryside.						
1246504	LPIO-7184	yes	To retain the Greenbelt, within its existing boarders, as set out by the 1983 Public Enquiry.						
1244604	LPIO-7211	yes	Item 3. To move towards "car free" town centres accessible in the main by pedestrians and cyclist only (shop keepers access by vehicles during certain prescribed times) Item 5. Green Belt land to be "sacrosanct" - no matter what.						
1246515	LPIO-7246	yes	Add (item 3 perhaps) - Priority to be given to pedestrians & cyclists over motorised travel. Add (item 5) - GREEN BELT to be sacrosanct and preserved for future generations.						
1246518	LPIO-7268	yes	ITEM 5 - Inadequate...Somewhere within the paragraph IT NEEDS TO SPECIFICALLY MENTION "PROTECTION OF GREEN BELT"						
1238102	LPIO-7297	yes	Improve the maintenance of council owned green spaces, verges and parks to ensure lower carbon emissions & help for wildlife. Increase tree planting & hedge planting, ensuring that all are properly maintained.						
1246524	LPIO-7321	yes	Yes, the power to alter/change "objectives" in light of a) Social mobility b) Local & National economy c) The type of housing required. All without destroying the Borough's collective of individual towns, villages and Green Belt.						
1241025	LPIO-7357	yes	To ensure Wirral maintains its present Green belt capacity to contribute the openness of borough contributing in making Wirral such an attractive place to live and visit.						
1246545	LPIO-7399	yes	To find suitable brownfield and sites already with planning permission to be developed.						
1237978	LPIO-7418	yes	See Objective 9. Provide increased protection for libraries and all other cultural services and activities.						
1246549	LPIO-7436	yes	To ensure the dredging, cleaning of rivers to stop flooding. The Fender & Birket. Plus grid cleaning. I have one outside my house that has a fine crop of weeds growing on it, it is so silted up.						
1246551	LPIO-7477	yes	In response to Q3.3 there should be a Strategic Objective to utilise achievable land within the existing urban areas for the delivery of affordable housing at high residential densities so as to ensure the soundness of the Local Plan with regard to being achievable in deliverable terms while also retaining the wider strategic vision and objectives to retain the Green Belt without releasing land to meet the Borough's immediate development needs.	https://wirral-consult.objective.co.uk/file/5679674					
1246550	LPIO-7496	yes	Written commitment to brownfield first approach.						
1240932	LPIO-7608	yes	Yes, given our Client's concern around the deliverability of the Preferred Approach, we suggest adding an objective specifically related to delivery. As the largest landowner in Wirral, Leverhulme has the ability to assist in the delivery of sustainable growth across the Borough and the creation of new communities in line with the Council's Vision and objectives. Therefore, our Client recommend an additional objective along the following lines: "To ensure the timely delivery of the spatial vision for Wirral and its underpinning strategic objectives, we will work proactively with public and private sector partners including landowners and developers".	https://wirral-consult.objective.co.uk/file/5683689	https://wirral-consult.objective.co.uk/file/5682697	https://wirral-consult.objective.co.uk/file/5682701			
1246592	LPIO-7704	yes	Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk. Also include as an objective the preservation of all greenbelt and agricultural land from development						
1240903	LPIO-7728	yes	Priority to the Birkenhead regeneration and NOT rural greenbelt areas.						

	ID	Question 3.3 - Are there any additional objectives you would want to include?	Question 3.3a - Please set out your suggested objective with reasons below:	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246594	LPIO-7771	no							
1245690	LPIO-7885	yes	I agree with the proposals and as stated about providing a high quality of life, this should be achieved without using any green belt land						
1246591	LPIO-7891	no							
1246605	LPIO-8131	yes	Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.						
1246598 Hoylake Vision	LPIO-8181	yes	Greater emphasis on promoting the distinct character of the Borough's Town (and district) centres, villages and rural areas to develop the visitor economy. Greater emphasis on promoting the quality of the natural environment, especially the coast, to develop the visitor economy.						
1239029	LPIO-823	yes	Leave the Green Belt as it is. You say your preference is for Brownfield sites but how will the public know how much effort will be made to secure these sites or will you take the easy option and allow developers to use the Green Belt.						
1246612	LPIO-8292	yes	I think there should be a specific objective that all other objectives should be delivered by utilising brownfield sites and there should be no reliance on building on greenbelt whatsoever. You can do this and by stating it early you will get everyone on your side. At present everyone is focussed on protecting the greenbelt so they cannot see the vision!!						
1244670	LPIO-8435	yes	Council's objectives should involve being more conclusive with their own climate change emergency. More homes mean more carbon monoxide, more particulate pollution. Building the correct number of homes (327 per year) would obviously reduce massively that pollution risk.						
1243448	LPIO-856	yes	Vigorously promote tourism to attract visitor income by promoting local attractions and assets of Wirral. e.g. golf courses, parks, beaches, industrial and maritime history, art galleries and museums. Develop a very strong and well resourced WBC tourism department to work in partnership with tourism departments of Liverpool, Chester, North Wales, Manchester and the Lake District etc to develop mutual beneficial tourism partnerships and projects. Develop tourist hotels at a few strategic locations on Wirral and implement a small tourist tax per person per night in these hotels which would support the maintenance and cleaning of tourist areas. Hotels on the waterfronts on each side of Wirral would have fantastic views of either the Liverpool waterfront or of North Wales.						
1246631	LPIO-8698	no							
1245787	LPIO-8788	yes	This is really to reiterate that it may be better to have two objectives in place of Strategic Objective 5 which is too broad to be SMART. Propose: Strategic Objective 5A: 'Protect and improve the quality and accessibility of green space, green infrastructure and natural landscapes'. Propose: Strategic Objective 5B: 'Protect and enhance biodiversity ensuring that development always delivers net environmental gains'. The sub-objective would benefit from including a focus on the recovery of nature and wildlife as follows: <ul style="list-style-type: none"> • 'To conserve, expand and link natural habitats through habitat management, restoration and creation to ensure a robust, coherent network of sites and linking corridors that promotes the recovery of nature and wildlife within the Borough and beyond its boundaries'. 						
1237807	LPIO-8919	yes	No incursions into the green belt. Maintain the countryside better. Complete the round the coast footpath from Eastham to Burton and include the Ellesmere Port Boat Museum as a start/finish objective. Reinstate the old public footpath between Eastham and Bromborough. Open the banks of the Manchester ship canal to enable the footpath from Eastham to the Boat Museum to be completed. These are the sort of visions that are required.						
1240872	LPIO-8972	yes	Biodiversity shall be increased through retention of existing greenbelt and its expansion over the local planning period by 5-10% Green spaces and corridors will be given special protections and buffer zones to prevent development within 200m of any designated greenbelt or greenzone. All trees will be protected and the removal of any tree shall be offset by trees being planted giving an equivalent carbon dioxide capture rate.						
1237724	LPIO-8979	yes	To ensure a stable local economy once the Corona pandemic is over. This will require concentration on the here and now and looking after those in need.						
1246666	LPIO-8994	yes	Yes, the council has recognised that we have a 'Climate Motion was passed unanimously stating that NO productive agricultural land will be released for development. More homes mean more carbon monoxide and more particulate pollution. building the correct number of homes (327 per Year) would obviously reduce massively that pollution risk. The Local Plan Options fail to adhere to this commitment.						
1246671	LPIO-9101	no							
1246672	LPIO-9145	no							
1246678	LPIO-9305	yes	The main objective should be to use empty houses first - this is not mentioned in the Local Plan; and to regenerate the run down areas to make them attractive in order to preserve Green Belt for future generations						
1246692	LPIO-9506	no
