Future Housing Trajectory Potential for Double Counting Analysis
2020 to 2035

1 Overview

1.1 Introduction

- 1.1.1 Ove Arup and Partners (Arup) has been appointed to provide planning policy support for Wirral Council in relation to their Regulation 18 consultation. This paper has been prepared in support of Task 2 'Empty Homes Housing Supply Methodology'.
- 1.1.2 The Task 1 report explored the Council's current strategies in place to bring back homes into active residential use and analysed the Council's draft 2017 SHLAA methodology, consultation responses from the 2016 SHMA and SHLAA as well as the 2018 Development Options Review, the Council's current housing trajectory and windfall approach. The report also examined the surrounding local authorities' approaches to reducing the number of empty homes. The report concluded that there is precedent to include empty homes within housing trajectories but that further work is required to outline a robust methodology for doing so for Wirral Council.
- 1.1.3 The Task 2 report builds on the research within the Task 1 report. This Task 2 report sets out a review of current policy and develops the precedent for including empty homes as part of housing supplies with supporting case studies.
- 1.1.4 The report also analyses Wirral's current position in terms of empty homes, windfall and overall housing delivery, in addition to addressing the issue of the potential for double counting within existing delivery records, which are currently held for different monitoring purposes and if an allowance for empty homes was also to be included in the emerging Local Plan. The report then outlines the justification and proposed methodology for including empty homes within the housing supply within the Wirral Local Plan.
- 1.1.5 This paper will be published for public comment alongside the Regulation 18 Local Plan.

1.2 Report Structure

- 1.2.1 This paper comprises 6 sections to outline a methodology to include empty homes within the Council's overall housing supply:
- 1.2.2 Section 2 – introduces the topic of empty homes, building on the Task 1 report, to outline their potential role in contributing to the Council's overall housing supply within the Plan period
- 1.2.3 Section 3 – reviews national policy, guidance, case law and the current precedent for including empty homes within housing supplies
- 1.2.4 Section 4 – analyses Wirral's current delivery rates of bringing empty homes back into use and overall housing delivery over the past 10 years. It also reports on the issue of the potential for double counting within existing monitoring records, if an allowance for empty homes was to be included in the emerging Local Plan.
- 1.2.5 Section 5 – outlines the potential justification for including empty homes as part of the land supply in the emerging Local Plan and a proposed methodology for doing so
- 1.2.6 Section 6 – outlines the implications for the upcoming Regulation 18 consultation and the potential role of empty homes within the Local Plan's future housing supply

1.3 Key Findings

- 1.3.1 There has been substantial progress to reduce the number of total empty homes and long-term empty homes within Wirral over the past decade. There is justification for including empty homes as part of the Local Plan's housing supply, with consistent evidence in the delivery of empty homes brought back into use over the past 10 years. This excellent past delivery has shown to be key in the case studies explored within this report.
- 1.3.2 Three potential options have been proposed with the potential to contribute between 1,125 and 1,425 empty homes brought back into use across the Plan period which we advise could be added to the overall housing supply in the emerging Local Plan (Table 1).

Table 1: Proposed Options for Empty Homes to be included within the Local Plan Housing Trajectory

Option	2020 - 2025	2025 – 2030	2030 – 2035	Total Number of Empty Homes Brought Back into Use
1 Consistent Number (Low)	375 homes 75 homes per annum	375 homes 75 homes per annum	375 homes 75 homes per annum	1,125 homes
2 Consistent Number (High)	475 homes 95 homes per annum	475 homes 95 homes per annum	475 homes 95 homes per annum	1,425 homes
3 Phased Approach (Reducing)	500 homes 100 homes per annum	450 homes 90 homes per annum	400 homes 80 homes per annum	1,350 homes

2 Introduction

- 2.1.1 A contribution from empty homes is not currently included in Wirral Council's calculations of its future housing land supply but the Council wishes to know whether it can now do so, on the basis of national policy and guidance and seeks advice on how best this can be achieved.
- 2.1.2 This report builds on the work which was conducted earlier in the year in the Task 1 report, which explored the current extent of empty homes within Wirral and the Council's current proactive approach to addressing the number of empty homes, which currently includes empty homes premiums, empty property grants and initiatives funded as part their corporate Housing Strategy.
- 2.1.3 The Task 1 report then explored consultation responses to the 2017 Strategic Housing Land Availability Assessment (SHLAA) draft methodology consultation; on the 2016 SHLAA and Strategic Housing Market Assessment (SHMA); and on the 2018 Development Options Review consultation. The report also reviewed the Council's current windfall approach and examined the surrounding local authorities' approaches to the management of empty homes.
- 2.1.4 This Task 2 report has found that with the support of national policy and guidance and the precedent set in other recently adopted Local Plans, that empty homes can be included within a local plan housing supply. Different approaches have been taken in case studies, with specific Local Plan policies or inclusion in a SHLAA and a clear source of supply required to justify their inclusion. The issue of empty homes must, however, be addressed in compliance with NPPG.
- 2.1.5 There has been substantial progress to reduce the total number of empty homes and long-term empty homes within Wirral over the past decade. Existing records of past delivery including windfalls and past and future housing delivery have therefore been analysed and checked. It was found that in some cases dwellings had been included in more than one set of records

held by different sections in the Council, particularly where their reuse had also required planning permission to be granted.

- 2.1.6 To avoid the future potential risk of double counting, we advise that more rigorous cross-referencing needs to be undertaken if the contribution from empty homes is to be consistently and robustly recorded as the basis for future policy and monitoring. The Council must also ensure that empty homes are kept separate from and not duplicated by normal completions records and are clearly treated separately in future SHLAA and land supply calculations. The total number of long term empty homes will also need to be separated from Wirral's overall dwelling count.
- 2.1.7 Overall, we have found that there is a justification for including a contribution from empty homes as part of the Local Plan housing supply, based on both consistent evidence in the delivery of empty homes brought back into use over the past 10 years and on a future commitment in both policy and practice in future years.
- 2.1.8 The methodology we propose sets out three potential options with the potential to contribute between 1,125 and 1,425 empty homes to the overall housing supply over the Plan period. While a local plan policy is proposed, we have found that its inclusion is not mandatory and that an appropriate strategy can alone be sufficient, as demonstrated by the different approaches identified in the case studies explored.

3 Policy, Guidance and Case Law

- 3.1.1 An analysis of current policy, guidance and precedent within the planning system has been undertaken to provide a breakdown of the current role of empty homes within housing supplies.

3.2 National Planning Policy Framework

- 3.2.1 A review of the National Planning Policy Framework (NPPF) has been undertaken to ensure the proposed methodology is policy compliant. The most relevant paragraphs of the NPPF¹ are outlined below (Table 2).

Table 2: NPPF Review

Para	Policy text	Summary
67	Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability. Planning policies should identify a supply of: a) specific, deliverable sites for years one to five of the plan period and b) specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.	Describes the requirement for a SHLAA to set out specific, deliverable sites for a range of plan periods between one and 15 years
68	Small and medium sized sites can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly. To promote the development of a good mix of sites local planning authorities should: a) identify, through the development plan and brownfield registers, land to accommodate at least 10% of their housing requirement on sites no larger than one hectare; unless it can be shown,	Describes the importance of a diverse mix of sites. Para 68 states a preferred percentage of small site sizes.

¹NPPF. Source: https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/810197/NPPF_Feb_2019_revised.pdf

	through the preparation of relevant plan policies, that there are strong reasons why this 10% target cannot be achieved;	
70	Where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends. Plans should consider the case for setting out policies to resist inappropriate development of residential gardens, for example where development would cause harm to the local area.	Seeks to achieve clarity on windfall sites and reliable evidence for the allowance made.
117	Planning policies and decisions should promote an effective use of land in meeting the need for homes and other uses, while safeguarding and improving the environment and ensuring safe and healthy living conditions. Strategic policies should set out a clear strategy for accommodating objectively assessed needs, in a way that makes as much use as possible of previously-developed or 'brownfield' land.	Seeks to promote the effective use of land whilst safeguarding the environment and public health. Promotes the use of previously developed land.
118	<p>...d) promote and support the development of under-utilised land and buildings, especially if this would help to meet identified needs for housing where land supply is constrained and available sites could be used more effectively (for example converting space above shops, and building on or above service yards, car parks, lock-ups and railway infrastructure)⁴⁵; and...</p> <p>Footnote 45:</p> <p>45 As part of this approach, <u>plans and decisions should support efforts to identify and bring back into residential use empty homes</u> and other buildings, supported by the use of compulsory purchase powers where appropriate.</p>	Promotes the use of underutilised land and buildings in areas of poor land supply. Seeks to identify and bring empty homes back into use.

119	Local planning authorities, and other plan-making bodies, should take a proactive role in identifying and helping to bring forward land that may be suitable for meeting development needs, including suitable sites on brownfield registers or held in public ownership, using the full range of powers available to them. This should include identifying opportunities to facilitate land assembly, supported where necessary by compulsory purchase powers, where this can help to bring more land forward for meeting development needs and/or secure better development outcomes.”	Promotes a range of measures to bring forward land to meet development needs, including compulsory purchase.
137	<p>Before concluding that exceptional circumstances exist to justify changes to Green Belt boundaries, the strategic policy-making authority should be able to demonstrate that it has examined fully all other reasonable options for meeting its identified need for development. This will be assessed through the examination of its strategic policies, which will take into account the preceding paragraph, and whether the strategy:</p> <p>a) makes as much use as possible of suitable brownfield sites and underutilised land;</p> <p>b) optimises the density of development in line with the policies in chapter 11 of this Framework, including whether policies promote a significant uplift in minimum density standards in town and city centres and other locations well served by public transport; and...</p>	To justify any changes to the Green Belt, exceptional circumstances need to exist with the local authority demonstrating they have considered all other reasonable options for meeting its identified need for development. Therefore, all options of using brownfield sites, underutilised land and optimising density in areas well served by public transport need to be taken into account and fully utilised in the housing supply.

3.3 National Planning Policy Guidance

3.3.1 The National Planning Policy Guidance (NPPG)² has also been reviewed to ensure the proposed methodology is compliant with national guidance. The most relevant paragraphs of the NPPG are outlined below (Table 3).

Table 3: NPPG Review

Para	Guidance text	Summary
Paragraph: 029 Reference ID: 68-029-20190722	<p>What counts as a completion?</p> <p>For the purposes of calculating 5 year land supply, housing completions include new build dwellings, conversions, changes of use and demolitions and redevelopments. Completions should be <u>net figures</u>, so should offset any demolitions.</p> <p>Revision date: 22 July 2019</p>	<p>Completions include new build dwellings, conversions, changes of use, demolitions and redevelopments.</p>
Paragraph: 030 Reference ID: 68-030-20190722	<p>How should authorities count bringing empty homes back into use?</p> <p>To be included as a contribution to completions it would be for the authority to ensure that empty homes had not already been counted as part of the existing stock of dwellings to avoid double counting.</p> <p>Revision date: 22 July 2019</p>	<p>To include empty homes as completions, the proposed methodology needs to be ensure that dwellings have not been double counted within the existing dwelling stock.</p>

| Issue | 9 January 2020

3.4 Precedents

- 3.4.1 A variety of case studies have been explored to understand the current precedents for including the reuse of empty homes in the future housing supply across England. These case studies include approaches which have recently been consulted on, found sound or adopted within the past two years across England.

3.5 Case Study 1 – Royal Borough of Kensington and Chelsea

- 3.5.1 Kensington and Chelsea’s Local Plan was found sound in July 2019 and was adopted on the 11th September 2019 with an allowance of 46 dwellings per year from long term vacant units returning to use, forming part of the Council’s five-year housing land supply. This approach was outlined in London’s 2013 SHLAA, supporting the London Plan.
- 3.5.2 The 2013 SHLAA states that “The London Plan aims to reduce the number of long term empty properties down to 1% of the housing stock. Previous SHLAAs have been based on the premise that London will aim to reduce private sector long term vacants to 1% of the private sector stock in each borough over ten years”³ continuing to state that London has an “on-going commitment to bring empty properties back into use.”⁴
- 3.5.3 It should however be noted that the next London Plan will not be including long term empty homes within the housing trajectory;

“Since 2004 the overall number of long-term vacant homes in London has reduced by half and now accounts for only 0.6% of the total housing stock, with variations at a borough level. Data on long-term vacancy suggests that this is now a local issue for a number of boroughs and not necessarily a strategic issue for the SHLAA to consider in detail, with only 8 boroughs below the previous benchmark

³ The London Strategic Housing Land Availability Assessment. Source: <https://www.london.gov.uk/file/15569/download?token=M9dckY12>. Pg 39

⁴ The London Strategic Housing Land Availability Assessment. Source: <https://www.london.gov.uk/file/15569/download?token=M9dckY12>. Pg 41
| Issue | 9 January 2020

(0.75%) used in the previous SHLAA and all but three boroughs below the current London Plan target of 1%.

To inform the methodology for the new SHLAA study, GLA officers have run two tests – one assumes that the number of long-term vacant homes would return to 0.5% of the current housing stock; and another based on the 0.75% figure used in the previous SHLAA. These findings are presented in Appendix B. Following the same methodology as the 2013 SHLAA would result in targets only being applied to 8 boroughs. Using an alternative benchmark of 0.5% would result in targets being applied in 15 boroughs.

There are also a number of other issues to consider:

- Whilst long-term vacant homes returning to use have made an important contribution to overall housing completions over the past 10 years, data returns show lumpy and unpredictable patterns which have resulted in negative returns for three of the last 10 years, which can have significant monitoring impacts locally*
- The extent that this can be counted as new supply is questionable*
- The data used to monitor vacant homes relies on Council tax records, so trends may illustrate how homes are being classified for Council tax purposes, rather than whether or not homes are actually occupied and the same home could be reclassified a number of times.*

Whilst the number of empty homes will continue to be a key Mayoral priority and addressed by policies in the London Plan and Housing Strategy, as well as targeted local interventions, it is recommended that this issue is not considered in the next SHLAA or in terms of monitoring forthcoming targets in the next London Plan.

As part of consultation on the SHLAA the GLA officers are keen to hear from boroughs on how the Mayor's strong commitment to reducing and bringing back into use the number of long-term

vacant homes should be addressed through the London Plan and other non-planning initiatives.

3.5.4 *For the reasons outlined in the draft methodology, assumptions about the number of vacant homes returning to use will now not be included in the SHLAA study.”⁵*

3.5.5 However, Kensington and Chelsea’s Local Plan used the currently adopted SHLAA from 2013 to justify the inclusion of long term empty homes within their housing trajectory and five-year housing land supply (Table 4). It is unclear if long term empty homes will be included in the remaining Local Plan period.

Table 4: Kensington and Chelsea’s approved five-year housing land supply⁶

Year	Projected Completions	Small Sites Estimate	Vacant Units	Total
2017-18	461	0	46	507
2018-19	389	0	46	435
2019-20	1,083	0	46	1,129
2020-21	1,003	152	46	1,201
2021-22	940	152	46	1,138
Total	3,876	304	230	4,410

Inspectors Comments

3.5.6 The Kensington and Chelsea Inspector did not question in written evidence adding empty homes to the housing supply or question the 46 homes planned to be brought back into use each year for the first 5 years of the Local Plan. The Inspectors letter support’s the Council’s approach, stating that “...*The remainder of the supply will largely come from the annual windfall allowances for small sites and vacant units coming back into use...*”⁷. The Inspector continued to agree with long term empty homes being included as part of the five-year housing land supply; “*finally the allowances for small sites (152 dpa) and vacant homes brought back into use (46 dpa) are*

| Issue | 9 January 2020

based on reliable SHLAA evidence of consistent historic delivery from these sources which informed the London Plan.”⁸

Implications for Wirral Borough Council

- The basis of including long term empty homes within this Local Plan was the inclusion within the London SHLAA from 2013.
- An ongoing commitment to reduce the amount of long term empty homes was shown since 2004 up until 2019 when the Local Plan was adopted.
- You can include long term empty homes within the five-year housing trajectory and this has been supported by a Planning Inspector
- There is a warning based on the Greater London Authority no longer including long term empty homes within their SHLAA

3.6 Case Study 2 – Borough of Barrow in Furness

3.6.1 The Borough of Barrow in Furness’s Local Plan was found sound on the 20th March 2019 and was adopted on the 4th June 2019. The Local Plan identified empty homes as a key issue within the Borough. However, it was decided not to include a policy to encourage their reuse or an allowance within the Local Plan housing trajectory because the Borough did not have an Empty Homes Strategy which identifies how many long term empty homes could be brought back into use across the Plan period. The accompanying housing topic paper also notes that many of the homes are in a poor condition and may not meet modern requirements therefore needing significant additional work to bring forward.

3.6.2 An extract from the Local Plan is reproduced below;⁹

“There were 1,613 vacant dwellings in the Borough in October 2016, representing a vacancy rate of 5% of the Borough’s

⁸ Inspectors Letter. Source: <https://www.rbkc.gov.uk/planning-and-building-control/planning-policy/local-plan/local-plan>. Pg 23.

⁹ Borough of Barrow in Furness Local Plan. Page 138. Source: <https://www.barrowbc.gov.uk/residents/planning/planning-policy/local-plan/> | Issue | 9 January 2020

dwelling stock. As this figure is derived from council tax records it excludes exempt properties, such as properties that are the subject of mortgage possession (i.e. the owner has been declared bankrupt). There are a number of such properties on Barrow Island. The SHMA recommends that that the Council should continue to consider identifying reasons why properties are empty and to identify mechanisms for bringing them back into use.

In 2012 the Council was allocated £3.4 million from the Clusters of Empty Homes Fund to help bring empty properties back into use. Most of the funding was used to work with the owners of the largest two property portfolios on Barrow Island, which together contain around 750 flats. A successful bid was submitted to bring 229 flats back into residential use. The funds were used to provide better quality accommodation and accelerate the programme of refurbishment, to date 200 flats have been completed and brought back into use. Around a third of the fund was used to carry out a programme of improvements to the surrounding environment, which addressed some of the streetscape issues raised in the Conservation Area Appraisal for the area.

As the Council does not have a strategy document for bringing empty homes back into beneficial use at present (e.g. which sets out a methodology and financing for such projects across the Borough), Local Plan examinations elsewhere indicate that the housing requirement should not be reduced to take into account such stock (reducing the need for additional new housing). Policy H10 sets out how the Council will seek to increase the number of empty homes being brought back into use.”

Inspectors Comments

- 3.6.3 The Barrow Local Plan Inspector included a specific paragraph dedicated to empty homes. The Inspector noted the high number of empty homes, as outlined above, within the borough and therefore included an empty homes policy as a suggested main modification within the Local Plan. The Inspector stated that not having a strategy for bringing back empty homes, as described above, *“is not consistent with objectives in the NPPF*

which seek to bring back empty homes and buildings into residential use.”¹⁰

- 3.6.4 Main Modification 34 provided the supporting text to the new policy with the commitment “*to explore mechanisms for bringing empty homes back into use.*”¹¹ Therefore, the inspector could not progress the Local Plan without this additional policy, to ensure the Local Plan was compliant with the NPPF. This policy is reproduced below:

Policy H10 – Empty Homes¹²

“Empty property can blight otherwise attractive neighbourhoods, and can attract antisocial behaviour, such as fly tipping and drug taking. Empty properties are also a wasted resource that could in other circumstances be providing homes for people who need them. Bringing empty homes back into use is a sustainable way of increasing the overall supply of housing and reducing blight on neighbourhoods.

The production of an Empty Homes Strategy would set a clear direction for empty homes work in the Borough. The Council will explore mechanisms for increasing the number of empty homes being brought back into use, including maximising innovative funding opportunities; directing resources to multi-agency groups whose remit includes tackling empty properties; and utilising enforcement options.

The Council will maximise the use of the existing housing stock by working with developers and partners through the production of an Empty Homes Strategy to increase the number of empty homes being brought back into use.”

¹¹ Inspectors Report to Barrow Borough Council. Page 13. Source: <https://www.barrowbc.gov.uk/residents/planning/planning-policy/examination-of-local-plan/>

¹² Borough of Burrow in Furness Local Plan. Pages 156 – 157. Source: <https://www.barrowbc.gov.uk/residents/planning/planning-policy/local-plan/>
| Issue | 9 January 2020

- 3.6.5 As a result, without a Strategy to provide a clear supply, empty homes were not included within the housing numbers, but a policy was still required to be included to ensure compliance with the NPPG.

Implications for Wirral Borough Council

- The Council did not have an empty homes strategy therefore they did not have a clearly identified source to include within the Local Plan's trajectory.
- The Council originally did not address empty homes within the Local Plan, but the Inspector included an empty homes policy as a main modification to ensure the Local Plan was compliant with the NPPG.
- The inspector outlined that other Local Plan examinations showed that the council's housing requirements should not be reduced to the amount of empty housing stock.

3.7 Case Study 3 – East Lindsey Council

- 3.7.1 East Lindsey Council's Local Plan was found sound and was adopted on the 18th July 2018. The Local Plan identified long term empty homes as a problem which "can blight a community"¹³. The Local Plan included a target for 15 empty homes per annum to be brought back into use through their Housing Strategy¹⁴. The text of the Local Plan policy is reproduced below;

*"Empty houses can blight a community and are an additional source of housing. The Council is committed to bringing empty houses back into use and has a target in its Housing Strategy of 15 such properties a year. The Council will if necessary support this commitment through the planning process."*¹⁵

¹⁵ East Lindsey Local Plan Core Strategy 2018. Pg 31. Source: <https://www.e-lindsey.gov.uk/localplan2018>

| Issue | 9 January 2020

Implications for Wirral Borough Council

- East Lindsey Council had a clear housing strategy target which the Local Plan could use as evidence of a reliable supply.

3.8 Case Study 4 – Birmingham City Council

- 3.8.1 Birmingham City Council's Development Plan was found sound on the 11th March 2016 and was adopted on the 10th January 2017. The Local Plan identified long term empty homes as a key issue and they were included in their overall housing supply across the Plan period. The 2014 SHLAA identifies 800 dwellings (Table 5) adding to the plan's housing capacity and supply by "bringing back vacant properties back into use" through an empty property register and strategy which focuses long term empty dwellings. The 800 dwellings were planned to be brought back between 2014 and 2018. Due to funding running out in 2018, long term empty homes were only included within the first period of the Local Plan.

Allocation in Draft Plan	7,726
Other Opportunity within a BDP Growth Area	6,682
Other Opportunity outside the BDP Growth Areas	5,360
Sub Total – Identified Sites	38,395
Bringing vacant properties back into use	800
Windfalls Below the SHLAA survey threshold (<0.06ha)	935
Windfalls Above the SHLAA survey threshold (>=0.06ha)	6,700
Broad Areas for Growth	0
Sub Total – Unidentified Sites	8,435
Total SHLAA	46,830

3.8.2 The Birmingham SHLAA stated that;

“The 2014 SHLAA consists of 1,312 identified sites with a capacity of 38,395 dwellings. An additional unidentified capacity of 7,635 windfall dwellings together with 800 currently long term empty dwellings which will be brought back into use brings the total SHLAA capacity to 46,830 dwellings.”¹⁷

3.8.3 The Local Plan also has a policy which includes empty homes supporting bringing them back into use. The Local Plan policy is reproduced below:

¹⁶ Strategic Housing Land Availability Assessment (SHLAA) 2014. Page 4. Source: https://www.birmingham.gov.uk/downloads/file/1172/strategic_housing_land_availability_assessment_report_2014pdf

¹⁷ Strategic Housing Land Availability Assessment (SHLAA) 2014. Page 4. Source: https://www.birmingham.gov.uk/downloads/file/1172/strategic_housing_land_availability_assessment_report_2014pdf

Policy TP35 – The Existing Housing Stock¹⁸

“Best use will be made of the existing dwelling stock and the City Council will seek to:

- *Develop and implement initiatives which will improve the condition of both the older private sector stock and the City Council’s own dwellings. Many of these initiatives involve the City Council working with public and private sector partners.*
- *Prevent the loss to other uses (through conversion or redevelopment) of housing which is in good condition or could be restored to good condition at reasonable cost. Such loss of residential accommodation will only be permitted if there are good planning justifications or an identified social need for the proposed use.*
- *Bring vacant residential properties back into use. Whilst vacancies are highest in the private sector, the City Council will seek, through implementation of its Empty Homes Strategy, to encourage the physical improvement and occupation of vacant homes of all tenures including where necessary the use of its compulsory purchase powers.*

The City Council will also encourage retrofitting of the existing dwelling stock to achieve the sustainability standards set out in other planning policies.”

Inspectors Comments

- 3.8.4 The Birmingham Local Plan Inspector noted the level of long term empty homes contributing to the housing supply, describing it as a “modest allowance of 800 additional dwellings from the Council’s Empty Homes Strategy.”¹⁹ The Inspector continues to state that “there is clear evidence that the Strategy has succeeded in bringing well over 200 long-term empty homes back into use each year since 2011. The allowance of 800 assumes that 200 more will have been brought back into use each year until 2018, when current funding for the Strategy runs out. That is a realistic assumption.”

| Issue | 9 January 2020

Implications for Wirral Borough Council

- Birmingham City Council included long term empty homes within their housing trajectory across the Local Plan period and empty homes were also included within the Council's SHLAA, providing sufficient long-term evidence since 2011.
- The Council also had a Local Plan policy, encouraging bringing empty homes back into active residential use.
- The Inspector supported this approach with evidence of the Council bringing back over 200 long term empty homes since 2011 and concluded that this allowance was a realistic assumption based their track record and committed funding.

3.9 Additional Case Studies

3.9.1 There are other additional case studies where empty homes have been included within authorities' housing trajectories but where no final resolution has yet been obtained (Table 6). Only Northumberland County Council have included a policy but no allowance for empty homes within their housing trajectory. As these approaches have not yet been through their Local Plan examinations, they have not been relied upon within the methodology that we are recommending is applied in Wirral.

Table 6: Additional Case Studies

Council	Status	Inclusion of Empty Homes
Durham County Council	Local Plan submitted to Secretary of State on 28 th June 2019. The examination is expected later this year.	The Council have included empty homes as a component of their housing need with 50pa with 850 across the plan period. The Council average ~100 homes a year gross but offset by those that move from short to long term empty during that time.
City of Westminster	The Regulation 19 Consultation was held in Summer 2019	Empty homes are included in the Council's housing trajectory which has a non-self-contained and vacant homes allowance with 440 over the plan period with

		vacant units forming 10 units a year.
Sevenoaks District Council	The Local Plan has been submitted to Secretary of State to the in summer 2019	The Council has a policy to encourage bringing empty homes back into use and inclusion in the housing trajectory with 55 empty homes planned to be brought back over the five-year period, with 11 being the average brought back each year currently.
Northumberland County Council	The Local Plan was submitted to the Secretary of State on 29 th May 2019 and Phase 1 of the hearing sessions began in October	The Council has a policy to encourage bringing empty homes back into use but no set number within their housing trajectories.

3.10 Case Law

- 3.10.1 A search was undertaken using the search term “empty homes” and twenty-seven results were found which predominantly referred to case law in connection with CPO properties. References to Case Law in other Planning Authority reports (SHLAA, etc) were reviewed and found not to be directly relevant to this report.

3.11 Summary of Findings

- 3.11.1 Overall, there is policy, guidance and practice to support the inclusion of empty homes within a council’s Local Plan housing trajectory. The case studies explored above are not considered to be directly comparable to Wirral due to each local authority having their own local circumstances. Key findings include:

- National policy promotes the use of underutilised land and buildings in areas of poor land supply, including identifying and bringing empty homes back into use.
- Any Local Plan approach must be compliant with the NPPF and NPPG.
- Only long term empty homes are considered to be an appropriate source of supply within housing trajectories.
- To ensure compliance with national guidance, long term empty homes need to be removed from the total dwelling stock to allow long term empty homes to be part of the overall housing supply within the Local Plan.
- The case studies support the inclusion of a Local Plan policy encouraging the re-use of long term empty homes into active residential use with national policy and guidance.
- Past and consistent delivery is the evidence required to justify the quantity of long term empty homes within housing trajectories, though it is noted that assumptions need to be realistic.
- Different approaches have been taken to include empty homes within overall housing supplies and five-year housing trajectories, with specific Local Plan policies or inclusion in a SHLAA and a clear source of ongoing supply is required to justify their inclusion.

4 Analysis of Past Monitoring of Empty Homes, Windfalls and Overall Housing Delivery Rates in Wirral

- 4.1.1 An analysis of Wirral’s current delivery rates for bringing empty homes back into use, for the generation of windfall sites and overall housing delivery over the past 10 years has been undertaken to provide a greater understanding of the role empty homes could have within the Wirral Local Plan housing supply. We have also completed a checking process against local housing trajectory information, to ensure future compliance with the NPPG.

4.2 Empty Homes within Wirral

- 4.2.1 The scale of empty homes in Wirral was previously explored in the Task 1 report.
- 4.2.2 Only long term empty dwellings were considered appropriate to use within housing trajectories within the case studies explored in section 3.
- 4.2.3 The Government defines long term empty homes as “dwellings which have been unoccupied and substantially unfurnished for over six months”²⁰. Short term empty homes are considered a part of normal market turnover. Therefore, this report will focus only on long term empty homes.

The Current Role of Empty Homes in Housing Supply

- 4.2.4 Empty homes are currently only partially included in the Borough’s housing supply as a secondary by-product of the monitoring of demolitions and completions through redevelopment and conversion that require planning permission. This is through annual monitoring and the Strategic Housing Land Availability Assessment.

²⁰ Table 615 – Vacant Dwellings by Local Authority District: England, from 2004. Source: <https://www.gov.uk/government/statistical-data-sets/live-tables-on-dwelling-stock-including-vacants>

4.2.5 While the Wirral Council website, acknowledges, in a recent FAQ, that “the Council can take account of the reuse of empty properties where it can demonstrate that an active programme is in place in accordance with average past performance. This is included in the allowance for ‘windfall’ sites over the plan period.”²¹, it has not yet done so in any of its published calculations.

Analysis of Long Term Empty Homes Being Brought Back into Use

4.2.6 There has been a continual upward trend of long term empty homes being brought back into active residential use within Wirral (Appendix A). Overall, Wirral Council has a consistent and reliable supply of empty homes being brought back into use each year (Figure 1). This will be needed to justify including long term empty homes within the overall housing trajectory, as explored in section 3 of this Task 2 report.

Figure 1: Number of Long Term Empty Homes Brought Back into Use within Wirral

4.3 Potential for Double Counting in Existing Record Keeping

- 4.3.1 To avoid the risk of double counting in future land supply calculations, windfalls and empty homes have been analysed alongside the future housing trajectory for the Local Plan.
- 4.3.2 At present, some empty homes are included within the housing supply through annual allowances for conversions and demolitions, some as a part of redevelopment proposals and potentially as windfalls but only where an empty home is to be replaced by new development²². As the Council's records of empty homes are held by different departments and for different purposes, cross referencing was undertaken to check for the potential for the future double counting of long term empty homes.
- 4.3.3 Future cross-referencing will also need to be undertaken to avoid any potential double counting of empty properties in the future. Long term empty homes also need to be separated from the Council's overall recorded dwelling stock. Long term empty homes should also not be included as part of any separate recording of windfalls, demolitions, redevelopments or conversions. This is to ensure the proposed methodology is compliant with policy and guidance and will not result in inaccurate housing delivery figures. This was highlighted in Section 0.
- 4.2.1 4.3.4 to 4.3.9 outlines the checks that have been made with any past double counting highlighted.

Past Delivery

- 4.3.4 Past delivery data has been examined to check for the potential to count the same long term empty homes in separate records of different aspects of housing delivery. This has been done by analysing the addresses of long term empty homes that have already been recorded as having been brought back into use, as part of the Council's Housing Strategy monitoring and

²² Because of the use of an annual allowance of net gain from conversions and changes of use, the Council only records the contribution of new build windfalls as part of its land supply calculations

against the completions recorded by the Planning Service in the Council's statutory Annual Monitoring Report (Appendix B)²³.

4.3.5 It was found that forty-two properties over the period between 2011/12 and 2018/19 had appeared within both sets of Council records (Table 7). Three dwellings were also identified as potentially having been duplicated due to similar addresses which are marked with a '*' in Table 7 below.

Table 7: Double Counted Properties in Past Housing Delivery and Empty Homes Records

Monitoring Period	Address
2011/12	Flat 2, 32 Elm Grove, Tranmere*
2014/15	211a Seaview Road, Liscard*
2017/18	7 Woodchurch Lane, Prenton*
2011/12	8 Woodburn Drive, Gayton

2015/16	Flat 15, Cygnet Court, Watson Street, Birkenhead
2017/18	1 Torrington Road, Liscard
2017/18	4 Springfield Avenue, Newton

Windfalls

- 4.3.6 Past windfall delivery data has been examined to again check for the potential for duplicate record keeping. This has been done by analysing the addresses of long term empty homes brought back into us against completions data for the 2011/12 to 2018/19 monitoring periods (Appendix C). It was found that two properties over that time period appeared to have been recorded in both sets of monitoring records (Table 8). This is, again, because windfall data only records data for development that requires planning permission.

Table 8: Double Counted Properties in Windfalls and Empty Homes Records

Monitoring Period	Address
2011/12	8 Woodburn Drive, Gayton
2015/16	46 Well Lane, Gayton

Demolitions

- 4.3.7 Past demolitions data has also been examined. This has been done by analysing the records for long term empty homes brought back into use against completions data from the Council's annual demolition schedule (Appendix D). It was found that four properties over that time period had been included as both demolished and brought back into use as an empty home within the same monitoring period (Table 9). This is probably because the number of empty properties had been recorded as having been reduced in one set of records and that

change had been recorded as a demolition in the other set of records.

Table 9: Double Counted Properties in Demolitions and Empty Homes Records

Monitoring Period	Address
2011/12	8 Woodburn Drive, Gayton
2011/12	11 Rochester Road, Rock Ferry
2011/12	17 Rochchester Road, Rock Ferry
2015/16	46 Well Lane, Gayton

Housing Trajectory

- 4.3.8 The emerging housing trajectory for the Local Plan has also been examined for any further potential for double counting over the Plan period.
- 4.3.9 As no specific long term empty homes addresses could be cross checked against the sites identified within the housing trajectory, we have only highlighted that there could still be a potential risk of double counting, to highlight where checks will need to be made to ensure long term empty housing is not being counted twice in any future calculations (Appendix E).

4.4 Summary of Findings

- 4.4.1 Overall, analysis of past and future housing delivery has been analysed to check the potential for future double counting, to support the robust and reliable use of empty homes data within the Local Plan's housing supply.
- 4.4.2 Key findings include:
- There has been substantial progress to reduce the number of long-term empty homes within Wirral over the past decade.
 - Long term empty homes will need to be carefully separated from the Council's existing monitoring records to avoid the potential for double counting, to ensure accurate housing delivery figures.
 - A current potential has already been identified, as 48 dwellings, plus 3 potential additional dwellings, had appeared in more than one set of previous records, where

the reuse of an empty property had required a grant of planning permission.

- Additional steps will need to be taken to avoid any further duplicate records when monitoring housing completions, demolitions, allowances for conversions and changes of use and windfalls, and future land allocations, if an allowance for empty homes is to be included in the future Local Plan housing trajectory.

5 Empty Homes as part of the Housing Supply in Wirral

5.1 Justification

- 5.1.1 To ensure a robust methodology for now including long term empty homes within Wirral's future housing supply, we need to consider the implications from policy (3.2), guidance (0) and practice (0). As a baseline, we need to ensure compliance with the NPPF and NPPG. Having a dedicated Local Plan policy has been supported to encourage bringing back empty homes into use. Several consultation responses also supported prioritising and including empty homes within the Council's housing trajectory, as explored within the Task 1 report.
- 5.1.2 There is a need to demonstrate an ongoing commitment and progress on reducing long term empty homes to provide evidence of a consistent supply. Wirral Council have clear evidence of reductions over the past 10 years with targets set and monitored through their corporate Housing Strategy. There has been continual evidence of vacant homes being brought back into use over a period of 10 years with 2,097 long term empty homes remaining in 2018 (Task 1, Table 1 refers).
- 5.1.3 In addition to the consistently high delivery, a target to reduce empty homes by 1,250 by 2020 was included within the Wirral Plan²⁴. This was achieved during 2019, ahead of the March 2020 deadline. Therefore, Wirral are in a strong position with an excellent track record of bringing back empty homes into use with Council targets being met. This is shown by all case studies explored in 3.4 to be vital evidence for including empty homes as part of their housing supply.
- 5.1.4 Following on from this research, including an analysis of the Council's past housing delivery, future trajectory and our analysis of the potential for double counting, our conclusion is that long term empty homes can form part of Wirral Local Plan

²⁴ The Wirral Plan: A 2020 Vision Wirral's Housing Strategy July 2016. Source: <https://www.wirral.gov.uk/sites/default/files/all/About%20the%20council/Wirral%20Plan/Housing%20Strategy.pdf>

period's housing supply provided a robust methodology can be secured.

5.2 Methodology

- 5.2.1 To include empty homes as part of the Local Plan's housing supply, a robust and policy compliant methodology needs to be implemented.
- 5.2.2 The Government defines long term empty homes as “dwellings which have been unoccupied and substantially unfurnished for over six months”²⁵. Homes that have been vacant for up to 6 months are considered to be part of normal market turnover. However, long term empty properties could be considered as having left the market (equivalent to having been ‘abandoned’ or ‘demolished’) after 6 months and therefore could be considered as re-entering the supply. Only long term empty dwellings were considered as appropriate to use within housing trajectories within the case studies explored in section 3. Our recommended method will, therefore, similarly, focus only on long term empty homes.
- 5.2.3 To include long term empty homes as part of the housing supply, we need to take the existing level of long term empty homes and separate them from the overall dwelling stock in Wirral to avoid double counting, allowing them to then be re-added to the supply of homes when they are brought back into use (Figure 2). This reflects national guidance previously explored (Section 3.3).
- 5.2.4 Double counting checks will also need to be undertaken each monitoring year to ensure the Council are not including any short or long term empty homes within the overall housing supply to ensure compliance with the NPPG (Section 4).

²⁵ Table 615 – Vacant Dwellings by Local Authority District: England, from 2004. Source: <https://www.gov.uk/government/statistical-data-sets/live-tables-on-dwelling-stock-including-vacants>

Figure 2: Empty Homes Contribution to the overall housing supply

5.2.5 The inclusion of long term empty homes within the Council's housing trajectory would then be considered like windfalls, with an allowance averaged out over each year of the Plan period and within the five-year housing supply based on past delivery within the Borough.

5.2.6 The calculated long-term average allowance across the past 8 years is 189.5 long term empty homes brought back into active residential use per annum, through Council intervention and support. This has been calculated by considering the number of long term empty homes brought back into use, less those that may have been double counted, divided by the number of years that a Council funded programme has been in place (Table 10 and Table 11).

Table 10: Number of Long Term Empty Properties Brought Back into Use

2011/ 12	2012/ 13	2013/ 14	2014/ 15	2015/ 16	2016/ 17	2017/ 18	2018/ 19
141	165	150	215	207	238	238	226

Table 11: Number of Long Term Empty Properties That May Have Been Double Counted

2011/12	2012/13	2013/14	2014/15	2015/16	2017/18	2018/19
6	15	7	1	16	0	3

5.2.7 The past return of empty properties has benefited from Government grants and Council led schemes, in addition to mortgage and fiscal tax changes such as the Long Term Empty Premiums introduced in 2013. It is planned to make additional increases to Council Tax in 2020 and 2021 but further

increases are not currently expected, as outlined in the Task 1 report.

- 5.2.8 Other Council led programs are set to continue but cannot necessarily be guaranteed over the lifetime of the Local Plan. There may be potential impacts from any future changes in national policy, the overall policy landscape and market conditions which may have the potential to significantly impact on the number of long term empty homes. Consequently, predicting future supply can be difficult.
- 5.2.9 There is a need to have evidence of a realistic and deliverable supply for the future. Therefore, the Council's chosen option to including empty homes within their housing supply will be reviewed at the Regulation 19 stage, subject to the confirmation of the Council's short, medium and long-term funding programmes.
- 5.2.10 We recommend having a clear target and funding programme set by the Council in place to provide a clear source of supply for long term empty homes allowance in the Local Plan housing trajectory.

Proposed Options

- 5.2.11 We have identified three options where empty homes could form part of the future housing supply, which could provide between 1,125 and 1,425 homes over the Plan period (Table 12).
- 5.2.12 We recommend that due to future unknowns and with the case studies explored in section 3.4, that having a cautious target below the Borough's long term average allowance of 189 would be appropriate and that this would also take account of any net flows, with new empty homes entering the system, offsetting the homes brought back into use over the Plan period. These options are based on the strong track record of Wirral bringing back long term empty homes into use over the past 10 years.
- Option 1: A static figure of 75 long term empty homes per annum brought back into use from year 1 to 15. This option

has the potential to deliver 1,125 dwellings over the Plan period.

- Option 2: A static figure of 95 long term empty homes per annum brought back into use from year 1 to 15, which has the potential to deliver 1,425 dwellings over the Plan period.
- Option 3: Introduce a phased delivery starting at 100 long term empty homes per annum in Year 1 which is slowly decreased over the Plan period to 80 at year 11 to 15. This option has the potential to deliver 1,350 dwellings over the Plan period.

Table 12: Options 1, 2 and 3 Empty Homes Contribution to Overall Housing Supply across the Plan Period (by financial year 1)

Year	Date	Option 1 Vacant Units	Option 2 Vacant Units	Option 3 Vacant Units
1	2020/21	75	95	100
2	2021/22	75	95	100
3	2022/23	75	95	100
4	2023/24	75	95	100
5	2024/25	75	95	100
6	2025/26	75	95	90
7	2026/27	75	95	90
8	2027/28	75	95	90
9	2028/29	75	95	90
10	2029/30	75	95	90
11	2030/31	75	95	80
12	2031/32	75	95	80
13	2032/33	75	95	80
14	2033/34	75	95	80
15	2034/35	75	95	80
	Total	1,125	1,425	1,350

Options Justification

5.2.13 The basis for the numbers outlined above within the three options is based on the precedence set in the case studies explored in section 3.4, whereby you need to have a strong history of delivery. Inspectors have accepted Councils that have had successful programs and strong past delivery rates to prove their future delivery to ensure a robust and reliable supply across the Plan period.

5.2.14 Option 1: The figure of 75 per annum was Wirral Council's initial proposed best-case scenario, based on a high degree of short

term confidence that empty homes can be delivered. However, it was considered that this was rather pessimistic and did not reflect the work that has been undertaken to date, the momentum gained and the potential for continued work through the Plan period.

- 5.2.15 Option 2: The figure of 95 per annum was half of 189.5, explained in 5.2.6, to take account of future potential impacts and funding programs, explained in 5.2.8 and 5.2.10. However, there is no guarantee that a higher figure could be maintained long-term with a risk of Wirral Council not meeting their target over the full Plan period, so a middle ground was sought.
- 5.2.16 Option 3: The figure of 100 dwellings in years 1 to 5 is above half of the average previous supply delivered by Wirral to take account of calculating the number of dwellings returned to the market each year offset by the number of dwellings becoming empty over a 10-year period as base, then progressively reducing the allowance of 90 and 80 dwellings (Table 12) representing a worst case scenario based on past delivery rates (based upon precedents set out above).
- 5.2.17 The combination of Options 1 and 2 gave rise to Option 3 which is also based on Wirral Council's higher degree of confidence in short term delivery. The reducing allowance, over years 6-10 and 11-15, seeks to offset any long-term risks.

5.3 Recommendation

- 5.3.1 Our recommendation is that Option 3 should be included within the Local Plan. This is because;
- We need to ensure the allowance is reasonable and based on realistic assumptions, as shown in the case studies.
 - Future funding streams and current Council led projects on a local, regional and national scale are currently unknown. This will depend on a future Council funding program, as discussed above. This will need to be reviewed at the Regulation 19 stage of the Local Plan.

- Increases in Council Tax may reduce the number of homes being held vacant over the longer term in future years through other means.
- A recommended Local Plan empty homes policy should continue to support efforts to bring long term empty homes back into active residential use, but we do not know the long-term effect of the policy due to Wirral never previously having a dedicated empty homes policy.
- The Local Plan has significant allocations which are only planned to be brought forward in the later years of the Plan period. The phased approach has the opportunity to ‘over-deliver’ in the first five years when funding is more certain, while fewer allocated sites are coming forward, reducing in the last five years when a number of larger sites will begin to be delivered, offsetting any potential future risk.
- The frontloading of empty homes could also serve to reduce any immediate pressure to release land within the Green Belt by further increasing the brownfield urban land supply in line with national policy, early in the Plan period.

5.3.2 Any figure can be adjusted in subsequent years in line with annual monitoring.

5.3.3 Should the delivery of long term empty homes exceed these expectations, this can be addressed in future housing assessments and added into annual calculations as an amended allowance as part of a future Local Plan review.

5.4 Local Plan Policy

5.4.1 There is potential for a specific policy to be included in the Wirral Local Plan.

5.4.2 While the case study from Kensington and Chelsea demonstrates that it is not necessary to have a specific Local Plan policy, the Birmingham case study shows that they can also be supported. The Local Plan Inspector in Barrow in Furness included a policy as a main modification to ensure the plan was compliant with the NPPG. A Local Plan policy is therefore recommended to be included in the Wirral Local Plan,

to support the Council's wider objectives for reducing the number of empty homes within Wirral.

- 5.4.3 It is recommended that potential policy wording included in the Local Plan, the detail of which will be addressed in detail at Regulation 19 stage, with Regulation 18 used to allow a wider range of views to be considered and a proposed draft policy wording is set out below:

*“Bringing empty homes back into use is a key priority for the Council. The Council will build on their past performance of actively bringing empty homes back into use, with a trajectory of **XX** empty homes predicted each year.*

The Council will support proposals for bringing empty homes back into residential use. Where changes require planning permission to bring the property back into residential use, the Council will work proactively with applicants to progress applications.”

5.5 Summary of Findings

- 5.5.1 The implications for the upcoming Regulation 18 consultation and the potential role of empty homes within the Local Plan's housing supply has been outlined, with a potential policy approach, justification and methodology set out.

Key findings include:

- 5.5.2 There is a justification for including empty homes as part of the overall housing supply in Wirral, with consistent evidence in the delivery of empty homes brought back into use over the past 10 years. This has proved a successful method in the case studies explored in 3.4.
- 5.5.3 The methodology suggests three potential options with the potential to deliver between 1,125 and 1,425 empty homes across the Plan period which could add to the overall housing supply.
- 5.5.4 A local plan policy is proposed on the basis of the success of the case studies explored in 3.4.

6 Implications for Regulation 18 Consultation

- 6.1.1 The approach set out in this report has the potential to provide an additional source of housing supply across the Local Plan period for Wirral.
- 6.1.2 It is proposed to include an empty homes section within the Regulation 18 Consultation Document with a question asking for feedback on how empty homes should be included within the Local Plan's housing supply. All three options would be proposed with our recommendation for option 3 as the Council's preferred approach, as explored in sections 5.2 and 5.4.

Appendix A

Empty homes brought back
into use 2011/12 to 2018/19
