

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances?	Question 7.3a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246776	LPIO-10335	yes	There needs to be more emphasis on efficiency, renewable energy and local solutions. New builds should be built to high standards of energy efficiency. It should be an assumption that renewable energy systems are incorporated into all new developments. Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development. Orientate new build properties to the South. The Council should do all it can to promote further on- and off-shore wind electricity generation.						
1246763	LPIO-10380	yes	Our Client supports the principle of sustainability within the Local Plan and has included many sustainability and future-proofing elements into the masterplan for Bromborough Wharf. Bromborough Wharf will support the Council in assessing the cumulative impact in providing evidence within the Environmental Impact Assessment where possible.						
1244412	LPIO-1050	yes							
1246724	LPIO-10548	yes	I agree in part as long as there is not destruction of farms, fields and open spaces.						
1246803	LPIO-10726	yes							
1241337	LPIO-10747	yes							
1246242	LPIO-10986		As long as this is done without the decimation and destruction of farmland, green belt and open spaces.						
1243890	LPIO-1132	yes							
1247290	LPIO-11480		Point 7.3.8 claims that "there would be sufficient capacity ..... to accommodate the level of growth". This may very well be the case borough wide but I find it hard to believe that it would be the case with such a huge number of houses being concentrated into one area as is proposed in Option 2b. As with much of this plan it is too aspirational.						
1247196	LPIO-11608		I agree in part as long as there is no destruction of farms, fields and open spaces						
1247015	LPIO-11859		We agree in part as long as there is not destruction of farms, fields and open spaces						
1247214	LPIO-12438		I agree in part as long as there is no destruction of farms, fields and open spaces						
1247492	LPIO-12537		I agree in part as long as there is no destruction of farms, fields and open spaces						
1240843	LPIO-12699		I agree in part as long as there is no destruction of farms, fields and open spaces						
1247578	LPIO-12898		I agree in part as long as there is no destruction of farms, fields and open spaces						
1247510	LPIO-13022		I agree in part as long as there is no destruction of farms, fields and open spaces						
1246335	LPIO-13159		I agree in part as long as there is no destruction of farms, fields and open spaces						
1244681	LPIO-1319	no	There needs to be more emphasis on efficiency, renewable energy and local solutions. <ul style="list-style-type: none"> <li>• New builds should be built to high standards of energy efficiency.</li> <li>• It should be an assumption that renewable energy systems are incorporated into all new developments.</li> <li>• Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development.</li> <li>• Orientate new build properties to the South</li> <li>• The Council should do all it can to promote further on- and off-shore wind electricity generation</li> </ul>						
1246853	LPIO-13413		I agree in part as long as there is no destruction of farms, fields and open spaces						
1246852	LPIO-13536		I agree in part as long as there is no destruction of farms, fields and open spaces						
1247746	LPIO-13692		I agree in part as long as there is no destruction of farms, fields and open spaces						
1238192	LPIO-13814		We agree in part as long as there is not destruction of farms, fields and open spaces						
1247012	LPIO-13868		We agree in part as long as there is not destruction of farms, fields and open spaces						
1247014	LPIO-13922		We agree in part as long as there is not destruction of farms, fields and open spaces						
1242183	LPIO-14011		I agree in part as long as there is no destruction of farms, fields and open spaces						

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances? 1247179	LPIO-23351		We agree in part as long as there is not destruction of farms, fields and open spaces						

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances?	Question 7.3a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246598 (Hoylake Vision)	LPIO-23785		Stage 1 of the Infrastructure Delivery Plan is published alongside the Issues and Options document and that this sets out the baseline evidence including an overview of the quality and capacity of the existing infrastructure and what may be required to support the spatial options. The evidence base for the IDP includes the following documents which are pertinent to transport and are reviewed under our evidence submissions: Wirral Local Plan Baseline Modelling Report 2019 – which has highlighted that the areas likely to experience exacerbated congestion at junctions into the future. These include those in the vicinity of Wirral Waters, along the A41 south near the Wirral International Business Park, junctions 4 and 5 of the M53 and existing congestion hotspots on key routes to the M53 including the A552; and Draft Wirral Strategic Transport Framework 2019 and related studies including the Wirral Waters and A41 North Corridor Transport Studies, with a South Corridor one planned. The need to deliver high-quality transport networks as an essential part of the functioning of the Wirral, for both residents and businesses is addressed within Chapter 7 of the document. The document breaks transport into three broad categories – highways, public transport and active transport. Although the interaction of all three are important to the SRN, of main concern to Highways England is the highway implications.						
1248389 (Highways England)	LPIO-23829		Transport needs to remain a key consideration for the development of the Strategic Spatial Options and site allocations at the next stage of the Local Plan. There is a necessity to locate future development in sustainable locations, where active travel and public transport are integrated. This is crucial to counteracting the increasing pressure on the SRN. Highways England should therefore be informed and consulted as sites are further explored.						
1242185	LPIO-23937	yes		<a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a>	<a href="https://wirral-consult.objective.co.uk/file/5684263">https://wirral-consult.objective.co.uk/file/5684263</a>	<a href="https://wirral-consult.objective.co.uk/file/5657006">https://wirral-consult.objective.co.uk/file/5657006</a>			
1248496 (United Utilities)	LPIO-24180		It is essential for early and continued detailed discussions take place over any revised allocations, so United Utilities can most appropriately support their delivery. We strongly advise that contact is established at the earliest stage, ideally before any land transactions, and certainly prior to any planning application to explore infrastructure options as early as possible. At this stage, we have only limited information on the details of the development proposals. We recommend that you include a policy in the Plan to ensure that the delivery of development will be co-ordinated with the timing of any necessary infrastructure improvements and a comprehensive, site wide Infrastructure Strategy should be required to be submitted as part of any planning application for any strategic allocation.	<a href="https://wirral-consult.objective.co.uk/file/5684806">https://wirral-consult.objective.co.uk/file/5684806</a>					
1248496 (United Utilities)	LPIO-24182		All United Utilities assets and associated easements will need to be afforded due regard in the masterplanning process and may impact on deliverability dependent on their location within the site. We request early involvement in any site masterplanning process. Please direct developers to our free pre-application service to discuss their schemes and highlight any potential issues. We cannot stress highly enough the importance of contacting us as early as possible.	<a href="https://wirral-consult.objective.co.uk/file/5684806">https://wirral-consult.objective.co.uk/file/5684806</a>					
1248496 (United Utilities)	LPIO-24207	yes	Wirral poses particular challenges providing additional water supply to the northern areas of the Borough as it is a peninsular. Public water supply comes from the south, so the options to redistribute water supply to the north of the peninsular can prove challenging. Development priorities in Birkenhead/Bromborough/existing urban areas, which are at the top of the peninsular, will need to be carefully planned with United Utilities. We would also recommend a water efficiency policy to ensure the delivery of sustainable development is fully considered in the design of new development, to include water saving and recycling measures to minimise water usage, to take the long-term implications for water supply in the borough into account, whilst delivering comprehensive, sustainable regeneration to the boroughs urban areas	<a href="https://wirral-consult.objective.co.uk/file/5684806">https://wirral-consult.objective.co.uk/file/5684806</a>					
1248557 (Environment Agency)	LPIO-24456		We welcome consideration of cumulative impact(s) of development on the utilities networks, including improvements to water efficiency and sustainable drainage. Again we point to the contribution green and blue infrastructure can have.						
1244826	LPIO-2458	yes	I agree in part as long as there is not the destruction of farms, fields and open spaces.						
1242697	LPIO-24709		The evidence from the supporting text strongly suggests that development should be focussed in the regeneration areas and at the southerly Option 2B, if Green Belt release is absolutely necessary.	<a href="https://wirral-consult.objective.co.uk/file/5659118">https://wirral-consult.objective.co.uk/file/5659118</a>	<a href="https://wirral-consult.objective.co.uk/file/5659119">https://wirral-consult.objective.co.uk/file/5659119</a>	<a href="https://wirral-consult.objective.co.uk/file/5659120">https://wirral-consult.objective.co.uk/file/5659120</a>	<a href="https://wirral-consult.objective.co.uk/file/5659121">https://wirral-consult.objective.co.uk/file/5659121</a>		

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances?	Question 7.3a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1248749	LPIO-24898		We agree with the approach. We note that further assessment will be required at the time of the Draft local plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Development Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly Wirral Waters and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5684847">https://wirral-consult.objective.co.uk/file/5684847</a>	<a href="https://wirral-consult.objective.co.uk/file/5684848">https://wirral-consult.objective.co.uk/file/5684848</a>	<a href="https://wirral-consult.objective.co.uk/file/5684845">https://wirral-consult.objective.co.uk/file/5684845</a>			
1248769	LPIO-25017		We agree with the approach. We note that further assessment will be required at the time of the Draft local plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Development Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly Wirral Waters and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5659045">https://wirral-consult.objective.co.uk/file/5659045</a>	<a href="https://wirral-consult.objective.co.uk/file/5684957">https://wirral-consult.objective.co.uk/file/5684957</a>	<a href="https://wirral-consult.objective.co.uk/file/5659039">https://wirral-consult.objective.co.uk/file/5659039</a>	<a href="https://wirral-consult.objective.co.uk/file/5659038">https://wirral-consult.objective.co.uk/file/5659038</a>	<a href="https://wirral-consult.objective.co.uk/file/5684956">https://wirral-consult.objective.co.uk/file/5684956</a>	
1248823	LPIO-25121		We agree with the approach. We note that further assessment will be required at the time of the Draft local plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Development Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly Wirral Waters and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5674317">https://wirral-consult.objective.co.uk/file/5674317</a>	<a href="https://wirral-consult.objective.co.uk/file/5684865">https://wirral-consult.objective.co.uk/file/5684865</a>	<a href="https://wirral-consult.objective.co.uk/file/5684849">https://wirral-consult.objective.co.uk/file/5684849</a>			
1248832	LPIO-25231		We agree with the approach. We note that further assessment will be required at the time of the Draft local plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Development Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly Wirral Waters and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5684857">https://wirral-consult.objective.co.uk/file/5684857</a>	<a href="https://wirral-consult.objective.co.uk/file/5659562">https://wirral-consult.objective.co.uk/file/5659562</a>				
1248833	LPIO-25335		We agree with the approach. We note that further assessment will be required at the time of the Draft local plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Development Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly Wirral Waters and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5661125">https://wirral-consult.objective.co.uk/file/5661125</a>	<a href="https://wirral-consult.objective.co.uk/file/5661100">https://wirral-consult.objective.co.uk/file/5661100</a>	<a href="https://wirral-consult.objective.co.uk/file/5661124">https://wirral-consult.objective.co.uk/file/5661124</a>	<a href="https://wirral-consult.objective.co.uk/file/5661129">https://wirral-consult.objective.co.uk/file/5661129</a>		
1248956	LPIO-25413		Agree with the proposed approach. We note that further assessment will be required at the time of the Draft Local Plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Delivery Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly at Wirral Waters, and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5677474">https://wirral-consult.objective.co.uk/file/5677474</a>	<a href="https://wirral-consult.objective.co.uk/file/5684859">https://wirral-consult.objective.co.uk/file/5684859</a>				
1246763	LPIO-25424		X supports the principle of sustainability within the Local Plan and has included many sustainability and future-proofing elements into the masterplan for Bromborough Wharf. Bromborough Wharf will support the Council in assessing the cumulative impact in providing evidence within the Environmental Impact Assessment where possible.						
1249002	LPIO-25515		With respect to the identified housing targets for the Borough and the Issues and Options Document's proposed methods for meeting these targets, and the potential locations for housing developments to satisfy these requirements. Merseytravel supports the process that Wirral Council is seeking to adopt, and would wish to collaborate with the Council in ensuring that all new residential developments are suitably located and designed, with good access for public transport and active travel options, or appropriate combinations of these travel modes.						
1248986	LPIO-25545		We agree with the approach. We note that further assessment will be required at the time of the Draft local plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Development Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly Wirral Waters and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5662723">https://wirral-consult.objective.co.uk/file/5662723</a>	<a href="https://wirral-consult.objective.co.uk/file/5662725">https://wirral-consult.objective.co.uk/file/5662725</a>	<a href="https://wirral-consult.objective.co.uk/file/5662770">https://wirral-consult.objective.co.uk/file/5662770</a>			
1249015	LPIO-25601		Agree with the proposed approach. We note that further assessment will be required at the time of the Draft Local Plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Delivery Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly at Wirral Waters, and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5684897">https://wirral-consult.objective.co.uk/file/5684897</a>					
1246458	LPIO-25796		I agree in part as long as there is no destruction of farms, fields and open spaces						
1246459	LPIO-25797		I agree in part as long as there is no destruction of farms, fields and open spaces						
1249116	LPIO-25937		We support a reduced reliance on fossil fuels, improved water efficiency and sustainable drainage but would not support any policy requirement which would render developments unviable or undeliverable and reserve the right to comment when further detail is released at a later stage of the process.	<a href="https://wirral-consult.objective.co.uk/file/5674092">https://wirral-consult.objective.co.uk/file/5674092</a>	<a href="https://wirral-consult.objective.co.uk/file/5684836">https://wirral-consult.objective.co.uk/file/5684836</a>	<a href="https://wirral-consult.objective.co.uk/file/5674096">https://wirral-consult.objective.co.uk/file/5674096</a>	<a href="https://wirral-consult.objective.co.uk/file/5674095">https://wirral-consult.objective.co.uk/file/5674095</a>	<a href="https://wirral-consult.objective.co.uk/file/5674093">https://wirral-consult.objective.co.uk/file/5674093</a>	<a href="https://wirral-consult.objective.co.uk/file/5684833">https://wirral-consult.objective.co.uk/file/5684833</a>

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances?	Question 7.3a - If you answered No, what what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1249100	LPIO-25983 1 of 3		Agree with the proposed approach. We note that further assessment will be required at the time of the Draft Local Plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Delivery Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly at Wirral Waters, and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5677514">https://wirral-consult.objective.co.uk/file/5677514</a>	<a href="https://wirral-consult.objective.co.uk/file/5677512">https://wirral-consult.objective.co.uk/file/5677512</a>	<a href="https://wirral-consult.objective.co.uk/file/5684898">https://wirral-consult.objective.co.uk/file/5684898</a>	<a href="https://wirral-consult.objective.co.uk/file/5677513">https://wirral-consult.objective.co.uk/file/5677513</a>	<a href="https://wirral-consult.objective.co.uk/file/5677509">https://wirral-consult.objective.co.uk/file/5677509</a>	<a href="https://wirral-consult.objective.co.uk/file/5684951">https://wirral-consult.objective.co.uk/file/5684951</a>
1249100	LPIO-25983 2 of 3		Agree with the proposed approach. We note that further assessment will be required at the time of the Draft Local Plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Delivery Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly at Wirral Waters, and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5684895">https://wirral-consult.objective.co.uk/file/5684895</a>	<a href="https://wirral-consult.objective.co.uk/file/5677508">https://wirral-consult.objective.co.uk/file/5677508</a>	<a href="https://wirral-consult.objective.co.uk/file/5677511">https://wirral-consult.objective.co.uk/file/5677511</a>	<a href="https://wirral-consult.objective.co.uk/file/5684949">https://wirral-consult.objective.co.uk/file/5684949</a>	<a href="https://wirral-consult.objective.co.uk/file/5677516">https://wirral-consult.objective.co.uk/file/5677516</a>	<a href="https://wirral-consult.objective.co.uk/file/5677507">https://wirral-consult.objective.co.uk/file/5677507</a>
1249100	LPIO-25983 3 of 3		Agree with the proposed approach. We note that further assessment will be required at the time of the Draft Local Plan so that the cost of infrastructure requirements can be incorporated into the Infrastructure Delivery Plan. These will need to take account of the additional water supply that may be required to the northern part of the Borough, particularly at Wirral Waters, and connections of utilities to the extremities of the Borough.	<a href="https://wirral-consult.objective.co.uk/file/5677510">https://wirral-consult.objective.co.uk/file/5677510</a>					
1249116	LPIO-25992 1 of 2		We support a reduced reliance on fossil fuels, improved water efficiency and sustainable drainage but would not support any policy requirement which would render developments unviable or undeliverable and reserve the right to comment when further detail is released at a later stage of the process.	<a href="https://wirral-consult.objective.co.uk/file/5675698">https://wirral-consult.objective.co.uk/file/5675698</a>	<a href="https://wirral-consult.objective.co.uk/file/5675693">https://wirral-consult.objective.co.uk/file/5675693</a>	<a href="https://wirral-consult.objective.co.uk/file/5675700">https://wirral-consult.objective.co.uk/file/5675700</a>	<a href="https://wirral-consult.objective.co.uk/file/5675692">https://wirral-consult.objective.co.uk/file/5675692</a>	<a href="https://wirral-consult.objective.co.uk/file/5675697">https://wirral-consult.objective.co.uk/file/5675697</a>	<a href="https://wirral-consult.objective.co.uk/file/5675694">https://wirral-consult.objective.co.uk/file/5675694</a>
1249116	LPIO-25992 2 of 2		We support a reduced reliance on fossil fuels, improved water efficiency and sustainable drainage but would not support any policy requirement which would render developments unviable or undeliverable and reserve the right to comment when further detail is released at a later stage of the process.	<a href="https://wirral-consult.objective.co.uk/file/5675696">https://wirral-consult.objective.co.uk/file/5675696</a>					
1249116	LPIO-26039		We support a reduced reliance on fossil fuels, improved water efficiency and sustainable drainage but would not support any policy requirement which would render developments unviable or undeliverable and reserve the right to comment when further detail is released at a later stage of the process.	<a href="https://wirral-consult.objective.co.uk/file/5684802">https://wirral-consult.objective.co.uk/file/5684802</a>	<a href="https://wirral-consult.objective.co.uk/file/5684835">https://wirral-consult.objective.co.uk/file/5684835</a>	<a href="https://wirral-consult.objective.co.uk/file/5677041">https://wirral-consult.objective.co.uk/file/5677041</a>	<a href="https://wirral-consult.objective.co.uk/file/5677037">https://wirral-consult.objective.co.uk/file/5677037</a>	<a href="https://wirral-consult.objective.co.uk/file/5684804">https://wirral-consult.objective.co.uk/file/5684804</a>	
1249116	LPIO-26073		We support a reduced reliance on fossil fuels, improved water efficiency and sustainable drainage but would not support any policy requirement which would render developments unviable or undeliverable and reserve the right to comment when further detail is released at a later stage of the process.	<a href="https://wirral-consult.objective.co.uk/file/5674240">https://wirral-consult.objective.co.uk/file/5674240</a>	<a href="https://wirral-consult.objective.co.uk/file/5684832">https://wirral-consult.objective.co.uk/file/5684832</a>	<a href="https://wirral-consult.objective.co.uk/file/5674256">https://wirral-consult.objective.co.uk/file/5674256</a>	<a href="https://wirral-consult.objective.co.uk/file/5684834">https://wirral-consult.objective.co.uk/file/5684834</a>	<a href="https://wirral-consult.objective.co.uk/file/5684837">https://wirral-consult.objective.co.uk/file/5684837</a>	
1243721	LPIO-2614	yes	as long as there is not destruction of farms, fields and open spaces.						
1249782	LPIO-26445		We do not have any particular comments on this matter, other than to note that further assessment will be required to understand the cost of such infrastructure requirements. This will be incorporated into the IDP, which will be an important part of the evidence base to justify that the preferred spatial strategy is achievable.	<a href="https://wirral-consult.objective.co.uk/file/5683892">https://wirral-consult.objective.co.uk/file/5683892</a>					
1249219	LPIO-26484		We agree in part as long as there is not destruction of farms, fields and open spaces.	<a href="https://wirral-consult.objective.co.uk/file/5677529">https://wirral-consult.objective.co.uk/file/5677529</a>	<a href="https://wirral-consult.objective.co.uk/file/5677528">https://wirral-consult.objective.co.uk/file/5677528</a>				
1245180	LPIO-2752	yes	I agree in part as long as there is not destruction of farms, fields and open spaces.						
1245058	LPIO-2807	no	There needs to be more emphasis on efficiency, renewable energy and local solutions. ? New builds should be built to high standards of energy efficiency. ? It should be an assumption that renewable energy systems are incorporated into all new developments. ? Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development. ? Orientate new build properties to the South ? The Council should do all it can to promote further on- and off-shore wind electricity generation						
1237546	LPIO-2874	no	In view of the climate emergency, Wirral Wildlife consider this policy needs strengthening from "where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage" to "new development will be required to incorporate measures to reduce fossil fuel use, improve water efficiency and use sustainable drainage. All new development should be designed to be "zero carbon in use" to avoid expensive re-fits that will otherwise be required in the near future." This is to comply with the Wirral BC and Liverpool City Region policies of being net zero-carbon by 2040 or 2041. National policy is already to have no new gas connections to housing after 2024. Builders need to change their designs now.						

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances?	Question 7.3a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1238835	LPIO-2941	yes	I agree provided there is no detrimental affect to the Greenbelt i.e. there is no destruction of farms, fields nor any open spaces.						
1245287	LPIO-3152	yes	But the thrust should be to capitalise on the local potential for offshore wind to make Wirral the Carbon neutral community ahead of 2050.						
1238645	LPIO-3180	yes	New builds should be built to high standards of energy efficiency. It should be an assumption that renewable energy systems are incorporated into all new developments. Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development. The Council should do all it can to promote further on- and off-shore wind electricity generation						
1241315	LPIO-3305	yes	I agree in part as long as there is not destruction of farms, fields and open spaces.						
1237944	LPIO-3427	yes							
1237827	LPIO-3816	yes							
1245288	LPIO-3886	yes							
1245498	LPIO-3976	yes							
1245599	LPIO-4058	yes	I agree to developing future technology advances however not if it is to the detriment of our open spaces which are so important for the well being of people and the environment. We need are farms and fields for live stock and food.						
1245346	LPIO-4158	no	There needs to be more emphasis on efficiency, renewable energy and local solutions. New builds should be built to high standards of energy efficiency. It should be an assumption that renewable energy systems are incorporated into all new developments. Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development. Orientate new build properties to the South. The Council should do all it can to promote further on- and off-shore wind electricity generation. Ending reliance on fossil fuels is not an aspiration, it's an emergency.						
1240939	LPIO-4165	yes							
1237943	LPIO-42	yes							
1245638	LPIO-4298	yes	I agree in part as long as there is not destruction of farms, fields and open spaces.						
1245153	LPIO-4401	yes							
1245501	LPIO-4459		I agree in part as long as there is not destruction of farms, fields and open spaces.						
1237667	LPIO-4582	yes							
1245416	LPIO-4649	yes							
1244720	LPIO-4692	yes	Insofar as Central Government has allowed local authorities to plan for this. If their policy towards green energy changes, WBC should review their plans as we are in a uniques position to develop green energy infrastructure - coast, wind and water power						
1237696	LPIO-4731	yes	If only road drains were emptied more frequently, road flooding would reduce.						
1244629	LPIO-4789		I agree in part as long as there is not destruction of farms, fields and open spaces.						
1245713	LPIO-5113	yes	Agree as long as this does not have destructive impact on farms, fields and open spaces						
1241065	LPIO-513	no	there is a very strong case put forward in the council's COOL2 draft (A strategy for Wirral in the face of the global climate emergency) to cease using fossil fuels. "where possible reduce reliance on fossil fuels" is not an option. The use of fossil fuels needed to be stopped 10 years ago						
1245496	LPIO-5237	yes							
1239571	LPIO-5276	yes							
1242372	LPIO-5341	yes							

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances?	Question 7.3a - If you answered No, what what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1246006	LPIO-5342	no	There needs to be more emphasis on efficiency, renewable energy and local solutions. New builds should be built to high standards of energy efficiency. It should be an assumption that renewable energy systems are incorporated into all new developments. Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development. Orientate new build properties to the South The Council should do all it can to promote further on- and off-shore wind electricity generation						
1240383	LPIO-5443	yes	Provided that Green Beltland is not considered as an easy option route to service utilities networks.						
1245954	LPIO-5523	yes							
1241800	LPIO-5595	yes							
1245984	LPIO-5753		We welcome the renewable energy study and hope that it does inform the Local Plan and therefore reduce reliance on fossil fuels. New development should only have sustainable energy sources so no new gas lines should be laid to connect to new developments. Solar panels and wind power should be used.						
1244896	LPIO-5835	yes	YES, we agree with the Council's approach as long as there is no destruction of farms, fields and open spaces, and development is sustainable.						
1246310	LPIO-5963	yes	I agree in part as long as there is not destruction of farms, fields and open spaces.						
1245767	LPIO-6038	yes							
1238310	LPIO-6181	no	The approach laid out in the document is not employed or reflected in the plan Site selections for greenbelt options have been made without proper consideration of available utilities 7.26 Assessment of site allocations and cumulative impact will be undertaken with costs and lead in times for any reinforcement requirements included within the IDP schedule. Further site studies and increased lead in times could be required if Green Belt options were to be progressed where connections will need to be made to utilities at the extremities of the existing networks. Greenbelt site selections have already been made. Appendix 4.7 greenbelt selection process does not consider utility provision. 7.26 is stating the suitability, practicality or ability to provide those sites with utilities is currently unknown. This appears to be in complete contradiction to item 7.20 below. 7.20 Paragraph 16, of the National Planning Policy Framework identifies the need for early engagement with infrastructure and service providers. Paragraph 20 states that strategic policy should make sufficient provision for energy infrastructure Option 2a Irby is in Area 7 of the spatial portrait utilities report The local sewer network is limited by pumping stations, storage tanks and impacts on Combined Sewer Overflow discharges. To reduce pressure on the existing sewer network, there needs to be a sustainable approach to the management of surface water. There will be an expectation for only foul flows to communicate with the public sewer in this area. This confirms surface water system is at capacity. 1250 new home in Irby are to drain into Greasby brook and Arrowe brook. They already flood. Cadent gas state Area7 is near capacity to the north and South. They have no major reinforcement or upgrade planned. Irby is North and Gayton South. None of these issues have been considered in the greenbelt selection process Appendix4.7						
1246161	LPIO-6246	yes	Yes, WUTH is supportive of this approach						
1242541	LPIO-6342	no	There needs to be more emphasis on efficiency, renewable energy and local solutions. <ul style="list-style-type: none"> <li>• New builds should be built to high standards of energy efficiency.</li> <li>• It should be an assumption that renewable energy systems are incorporated into all new developments.</li> <li>• Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development.</li> <li>• Orientate new build properties to the South</li> <li>• The Council should do all it can to promote further on- and off-shore wind electricity generation.</li> </ul>						
1242751	LPIO-636	yes	I agree in part as long as there is not destruction of farms, fields and open spaces.						
1246402	LPIO-6468	yes							
1241800	LPIO-6772	yes	I would only say that this should be a priority, and to "consider" our situation doesn't reflect the urgency which I feel this topic should be given						

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances?	Question 7.3a - If you answered No, what what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1241661	LPIO-6826	yes	There needs to be more emphasis on efficiency, renewable energy and local solutions. <ul style="list-style-type: none"> <li>• New builds should be built to high standards of energy efficiency.</li> <li>• It should be an assumption that renewable energy systems are incorporated into all new developments.</li> <li>• Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development.</li> <li>• Orientate new build properties to the South</li> <li>• The Council should do all it can to promote further on- and off-shore wind electricity generation.</li> </ul>						
1245086	LPIO-6901	no	I do not agree with the approach as it does not go far enough in reducing the use of carbon fuels. We are at a point now when we really need to take the climate emergency very seriously & any plan should aim at carbon neutrality in very much the short term. It is not good enough to state "where possible reduce reliance on fossil fuels". We must reduce them drastically and with immediate effect.						
1241723	LPIO-6914	yes	There needs to be more emphasis on efficiency, renewable energy and local solutions. All new builds should be built to high standards of energy efficiency including Passivhaus. It should be an assumption that renewable energy systems are incorporated into all new developments. Water-efficiency and sustainable drainage (soft landscaping within developments) must be included in any development. Attempt tp orientate new build properties to the South to maximise solar energy. (PV) The Council should do all it can to promote further on- and off-shore wind electricity generation						
1237647	LPIO-704	yes	It doesn't sound as if much work has been done in the detailed provision of utility-network resilience and more specialist effort targeted here would be beneficial.						
1246488	LPIO-7255		I agree in part as long as there is no destruction of farms, fields and open spaces						
1246348	LPIO-7313	no	Unrealistic at the present time. Can't see how this marries up with building so many unnecessary houses, etc. If we lose any part of our green belt or farms it becomes a mockery.						
1241958	LPIO-755	yes							
1246581	LPIO-7654	no	I agree but subject to no destruction of farms, fields and open spaces						
1246592	LPIO-7795	yes	agree in part as long as there is not destruction of farms, fields and open spaces						
1246594	LPIO-7933	yes	I agree in part as long as there is not destruction of farms, fields and open spaces.						
1240903	LPIO-7997	yes	However no destruction of greenbelt, fields or open green spaces used as an excuse in achieving this.						
1246596	LPIO-8080	yes	Yes as long as no destruction of farms, fields and open spaces.						
1246605	LPIO-8180	yes	I agree in part as long as there is not destruction of farms, fields and open spaces						
1241096	LPIO-8342	yes		<a href="https://wirral-consult.objective.co.uk/file/5684262">https://wirral-consult.objective.co.uk/file/5684262</a>	<a href="https://wirral-consult.objective.co.uk/file/5661944">https://wirral-consult.objective.co.uk/file/5661944</a>				
1246612	LPIO-8385	yes							
1237882	LPIO-8455	yes	I agree in part as long as there is not destruction of farms, fields and open spaces.						
1241852	LPIO-8566	yes							
1246523	LPIO-8645	yes	Makes sure that the outcome meets up to high ideals.						
1246598 (Hoylake Vision)	LPIO-8722	yes	Surface water drainage and polluted water on the beach are significant issues for emerging habitats. Viewed holistically, some water could be collected and accreted sand repurposed to facilitate landscaping behind Hoylake. Natural England have suggested this as a possibility.						
1246202	LPIO-8863	yes							
1240653	LPIO-8877	no	You must insist on the reductions and improvements, not merely agree where possible....						

Person ID	ID	Question 7.3 - Do you agree with our approach to consider the cumulative impact of development on the utilities networks to ensure resilience, where possible reduce reliance on fossil fuels, improve water efficiency and sustainable drainage and to monitor and respond to future technological advances?	Question 7.3a - If you answered No, what would you change and why? If Yes, comment here.	Attachment 1	Attachment 2	Attachment 3	Attachment 4	Attachment 5	Attachment 6
1241770	LPIO-8881	no	Reliance on fossil fuels must be stopped, the proviso of 'where possible' is not acceptable. We are in climate crisis now therefore we need to act now and find alternative methods. Get out clauses are not acceptable.						
1246631	LPIO-8938	yes							
1245034	LPIO-9040	yes							
1246667	LPIO-9050	yes							
1239377	LPIO-9189	yes	As long as this objective can be achieved without the removal of farms, fields and open spaces.						
1246651	LPIO-9191		The needs to be more emphasis on efficiency, renewable energy and local solutions. New builds should be built to high standards of energy efficiency. It should be an assumption that renewable energy systems are incorporated into all new developments. Water efficiency and sustainable drainage, perhaps via soft landscaping within developments, must be included in any development. All new build properties should be orientated to the South. The Council should do all it can to promote further on and offshore wind electricity generation.						
1243448	LPIO-930	yes	These developments should not have a long term impact on green belt/field sites. Developers should be instructed to include individual energy generating and insulation in new developments. e.g. solar panels and insulation for housing. Solar panels, wind turbines and insulation for commercial premises.						
1245289	LPIO-9320	yes							
1246678	LPIO-9374	yes							
1246624	LPIO-9450	yes							
1241495	LPIO-9453	yes	Yes, I would support this approach. Every effort must be made to reduce reliance on fossil fuels. All new development should be designed to be "zero carbon in use".						
1242554	LPIO-9695	yes	However we believe that the Local Plan should include strategic policies to enable climate change adaptability for existing communities. Please see policy recommendations at the end of the consultation document. We note recurring small scale flooding and drainage issues disrupt lives, damage landscapes and buildings in the village. Additional development in the setting of Port Sunlight could exacerbate the already challenging drainage system. New development must include sustainable drainage.
